Lancaster Farming

Serving The Central and Southeastern Pennsylvania Areas

Vol. 20 No. 51 | Lancaster Farming, Saturday, Nov. 8, 1975 | $3.00 Per Year

Health charts sold unlawfully

By Dieter Krieg

CENTERVILLE - There isn't another state in the country which can brag as much about animal health as Pennsylvania - we're No. 1 - "proclaimed Dr. Sam Guss, extension veterinarian at Penn State, during a speech he delivered before the third annual Dairy Seminar on Feeding and Health, held here at the Quality Courts Inn last Tuesday evening.

But that doesn't mean all is well. There's still a lot to be done.

The well-known and highly acclaimed veterniarian, who will be retiring at the end of the year, warned an audience of approximately 60 persons that there is considerable false security in some present programs, especially health certification. His listeners were mainly feed dealers, nutritionists, veternarians, and agri-business representatives.

Guss charged that there was at least one place within the state where an ear tag and accompanying health chart could be purchased for one dollar; a Pennsylvania cattle dealer has a box full of health charts; and there are some crooked dealers "around."

In an outspoken, straightforward manner, Guss said: "Health charts are good for toilet paper - if you like shiny toliet paper." Asked after the meeting if the statement included Pennsylvania health charts, Guss said simply that too much confidence is being placed in them. Health charts are not effective enough in bringing disease under control, those from other states are virtually meaningless.

Guss strongly recommends that cattle be tested after they are brought into a new herd. He notes that a number of disease problems break out in the state each year, in spite of the Commonwealth's overall good record, and the "we deserve'em."

"We have about 20 herds a year that are depopulated," he said, blaming much of it on insufficient precautions taken by dealers and farmers. "You should have

Schuylkill Co. miss named Pa.Poultry Queen for 1976

Dawn Heisler, (center) Schuylkill Co. was named as the Pa. Poultry Queen during pageant activities held Oct. 31 in Carlisle. Other contestants participating in the event were (from left) Julie Lanius, York County; Kathy Bicksler, the 1975 Queen and Judy Stoltzfus, Lancaster County.

By Melissa Piper

Miss Dawn Heisler, Tamaqua R1, was selected as Pa.'s State Poultry Queen during a pageant held Oct. 31, at the Embers Restaurant in Carlisle.

Dawn was one of three contestants vying for the title and was selected to represent Pa.'s poultry industry throughout the coming year.

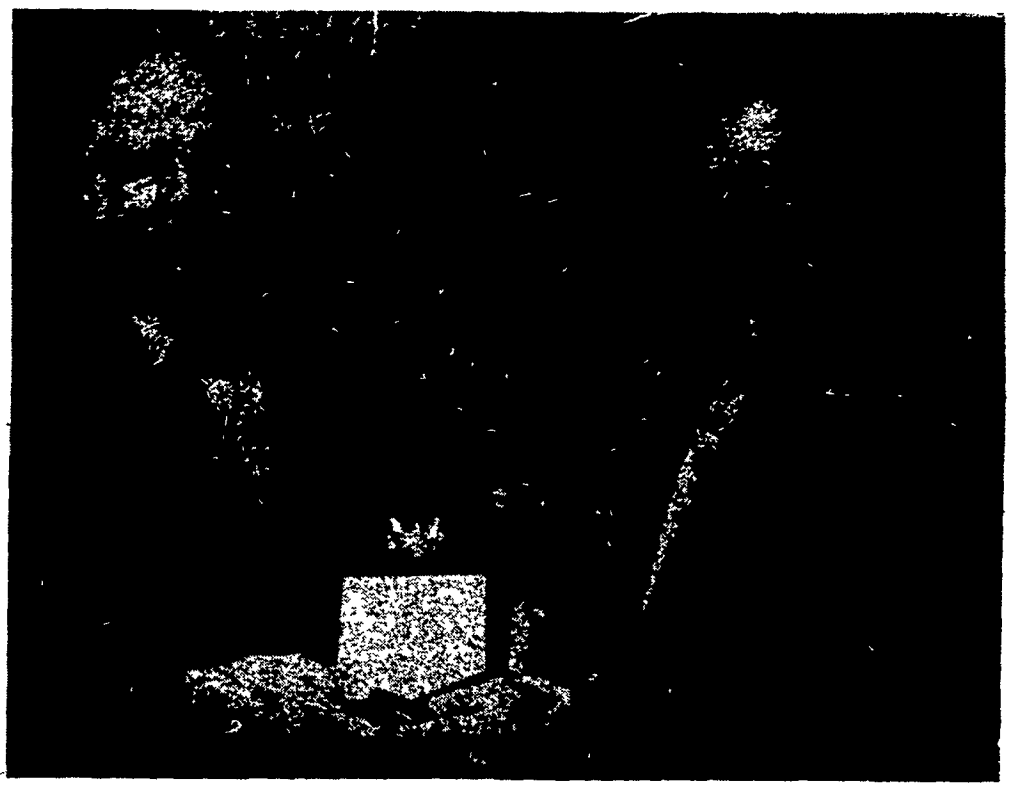
A student at the Pa. Junior College of Medical Arts, Dawn is the daughter of Mr. and Mrs. Jay Heisler, egg producing family from Schuylkill County.

By no means new to the farm, Dawn has helped sort, grade, candle and package eggs for a number of years.

"I've done just about everything," the livacious brunette noted, "but I enjoy delivering the eggs to the store more than anything."

Having a special interest in the field of music, Dawn has participated in several choral groups and is an accomplished pianist. The young lady recently won the

[Continued on Page 18]



Dr. Sam Guss, left, extension veterinarian from Penn State, was presented with a plaque last Tuesday evening following the 3rd annual Dairy Feeding Health Seminar at the Quality Courts Inn near Centerville. The presentation was made by County Agent John Smith of York County on behalf of dairymen in Lancaster and York Counties who appreciate the service Guss has provided for the past 24 years. The well-known veternarian will retire on Dec. 30 and will be honored at a party at University Park on Dec. 17.

Lew Ayres honored

By Dieter Krieg

EPHRATA — Lew Ayers, who was hired 15 years ago to become Ephrata High School's first vocational agriculture instructor and FFA advisor, has been nominated to receive the FFA's Honorary American Farmer Degree — the highest such award presented by that organization.

Lew Ayers, vo-ag instructor of Ephrata H.S. is one of three FFA teachers in the state to have been nominated for the Honorary American Farmer Degree.

One of only three teachers in Pennsylvania to receive the honor this year, Ayers was nominated by the state's FFA association and the nomination has been approved by the National Board of Directors which met last month in Alexandria, Va.

The degree is awarded on the basis of points scored by a teacher for his accomplishments as a vocational agriculture instructor, FFA advisor, and as a participant in professional vocational agriculture teachers' organizations.

During the 15 years he has been at Ephrata, Ayers has had three students who earned the American Farmer Degree; 40 who received the State Farmer Degree; and five recipients of the state proficiency award. He has had 21 of his students on national FFA judging teams and 29 on regional FFA judging teams. In addition, his chapter has had the grand champion dairy cow at the Pennsylvania

FFA chapters to receive nat'l awards

By Melissa Piper

Students from four Lancaster County schools, will be traveling to the National FFA Convention in Kansas City this coming week to receive a myriad of individual and chapter awards.

Seven members of the Cloister FFA Chapter in Ephrata High School will be traveling to the convention with their advisor, Lewis Ayers.

Members attending include: James Felpel, son of Mr. and Mrs. Melvin Felpel, Ephrata; Jay Gerhart, son of Mr. and Mrs. Charles Gerhart, Reinholds; Gerald Good, son of Mr. and Mrs. Lester T. Good, Ephrata; Harry Leininger, son of Mr. and Mrs. Harry A. Leininger, Ephrata; Calvin Sauder, son of Mr. and Mrs. Christ Sauder, Ephrata; Clifford Martin, son of Mr. and Mrs. Paul E. Martin,

Philadelphia Eggs

Wednesday, Nov. 5

Prices 2 cents higher on larger sizes, 1 cent higher on mediums. Cartoning demand fairly good. Offerings fully adequate on all sizes. Undertone fully steady.

Prices to retailers: Sales to volume buyers, consumer grades white eggs in cartons, delivered: store door A Extra Large 64½-68½; A Large 63½-67½; A Medium 58½-61.

Baltimore Eggs

Wednesday, Nov. 5

Prices were 2 cents higher on large sizes and unchanged on mediums. Demand was slow to fair for the fully adequate supplies and offerings of most sizes.

Cartoned eggs: prices to retailers, state graded (min one case sale) white Grade A Lge 66-69, mostly none; Grade A Med. 60-63, mostly none.

Delmarva

Broiler-Fryer Market

Wednesday, Nov. 5

Ready to cook movement continues good with clearances close. Slaughter schedules fairly heavy at most plants though occasional plant not operating today. Today's less than trucklot asking prices unchanged on both Plant and US Grade A. Advance interest slow in developing. Live supplies short of full needs with weights in a wide range. Undertone fully steady.

Negotiated trucklot prices 2-3 lb. ready to cook broiler-fryers for delivery this week: Plant Grade 50.

Current broiler-fryer negotiated prices for immediate delivery mostly multiple-drop shipments to New York City from Delmarva.

Range: US Grade A 50-52; Plant Grade 49-51; Premium US Grade A 53-56; Premium Plant Grade 52-54.

Wtd. Avg.: US Grade A 51.05; Plant Grade 50.08; Premium US Grade A 55.29; Premium Plant Grade 53.90.

Eastern PA & NJ

Live Hen Report

Wednesday, Nov. 5

Prices slightly higher on light type hens. Country offerings increased slightly but still short of a good demand. Offerings of heavy type barely adequate for a good call.

Prices paid at farm: light type hens 7-10, mostly 8¾-9¼ in PA, mostly 9-10 in NJ. Heavy type hens TFEWR.

Oklahoma Cattle

Nov. 6

New Shell Poultry Spray and Larvicide stops mites . . . leaves no harmful residue

(Controls flies, lice and larvae, too.)

Shell Poultry Spray and Larvicide solves the problem of stopping mites. Shell Poultry Spray and Larvicide can be applied directly to the vent area of the bird, making it ideal for caged layers or pullets. This new insecticide can also be used to treat litter, walls, roosts and other spots around the poultry house. And you'll control those pests that have become resistant to the older miticides. Shell Poultry Spray and Larvicide gives long-lasting fly, lice, and larvae control, too. Its residual effect avoids re-infestation by these costly insects. You can simplify your purchasing, while saving on labor. Combine your mite, fly and maggot control in one product . . . Shell Poultry Spray and Larvicide . . . Emulsible Concentrate.

Bull Beef

Yld. Gr. 1 & 2 500-1000's 48.50 steady.

Lamb

CH & PR YG 2&3 35-65's 100.00-101.00 3.50 higher.

Fresh Pork Cuts

Loins (reg.) 8-14's 101.50-102.00, 14-17's 100.50 2.50-3.00 higher, 17-20's 89.25-90.25 STDY.-1.00 lower.

Picnics (reg.) 4-8's 64.00-65.00, 8's & up 58.75-61.00.

Boston Butts 4-8's 92.25-92.50.

Spareribs 1½-3's 98.50; 3-5's 83.50.

Hams (skd.) 14-17's 97.50-97.75 2.00 higher, 17-20's 93.50-94.50 2.-3.00 higher, 20-26's 88.50-89.50 2.50-3.50 higher.

Bellies (sdls. Skin On) 12-14's 78.50 1.00 up on low quote; 14-16's 78.25 1.25 higher; 16-18's 75.00 1.-1.50 higher, 18-20's 70.00 50 higher.

Local Grain

Friday, Nov. 7

These prices are made up of the average prices quoted by a number of participating local feed and grain concerns. It should be noted, however, that not every dealer or broker handles each commodity. All prices are per bushel except ear corn which is per ton.

The average local grain prices quoted Friday, Nov. 7, are as follows:

	Bid+	Offered+
Ear Corn		
Old	70.70	78.30
New	47.25	56.25
Shelled Corn	2.46½	2.67
Barley	1.79	1.95½
Oats		
Local	1.44	1.65
Western	1.71	1.86
Wheat		
Millers	3.15	3.38
Feed	1.87	——
Soybeans	4.47½	4.80

+Bid is the price the dealer will buy from the farmer delivered to the mill. Offered is the price the dealer will sell for at his mill.

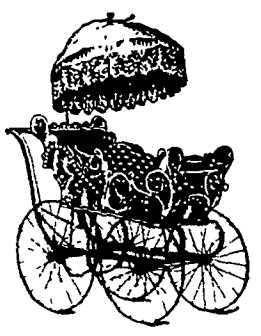
THE OLD FARMER'S ALMANAC

NOV. 10-16, 1975

Oldsters probably stay at home, for fear of cold.

Bank up the house with hay and save fuel . James Michael Curley died Nov 12, 1958 . . . First quarter of the moon Nov. 10 . . . Indian Summer begins this week . . . Average length of days for the week, 9 hours, 52 minutes . . Standish discovered Indian corn this week in 1620 (O.S.) . U.S.A recognized U S S.R. Nov 16, 1933 . World War I ended Nov. 11, 1918 . . . *Put not faith in tale bearers*



Old Farmer's Riddle: What comes right up to the door, but never enters the house? (Answer below.)

Ask the Old Farmer: What is the story on why we call a cow "Bossy," and say "s-o-o, Boss," when we want her to stand still at milking time? D.W , Portland, Oregon.

"Bos" is the Latin word for the genus of ruminants, cattle Probably ten thousand years old, more or less.

Home Hints: When a damaged asphalt tile must be taken up, heat a household iron, wrap it with cloth, and place it on the tile to be removed **Riddle answer:** The sidewalk

OLD FARMER'S WEATHER FORECASTS

New England: Week begins with heavy rain, then thunderstorms in south and light snow in mountains, clearing but seasonably cold latter part.

Greater New York-New Jersey: Heavy rain and scattered thunderstorms at first, then less rain, sunny and fair with slight warming over weekend

Middle Atlantic Coastal: Early week cloudy, cold and rainy; with some snow in west; clear and cold latter part, warming by weekend

Piedmont & Southeast Coastal: Cold, rainy and thunderstorms to start, then snow in north and west, clearing and cold for the season through weekend

Florida: Some showers at first, frost in north and low temperatures, latter part mostly sunny, but very cool, with slight warming by weekend.

Upstate N.Y.-Toronto & Montreal: First part of week cold with rain, heavy at times except in southwest, and snow in mountains, partly cloudy and average cold latter part

Greater Ohio Valley: Week begins cloudy, windy and cold, then light rain and snow, gradual clearing and becoming seasonably cool end of week

Deep South: Light snow in northeast, clear and freezing in south and central; latter part sunny, with warm days and cold nights

Chicago & Southern Great Lakes: Beginning of week cloudy and cold with snow or rain and snow, then clearing in north, generally sunny and mild through weekend

Northern Great Lakes: Fair and cool to midweek, then warmer with light showers in east, generally sunny, dry and warm latter part.

Central Great Plains: Sunny and cold to start, then warming in north and west, rain or snow in south and east, sunny, warm and dry rest of week

Texas-Oklahoma: Some rain in central and east, locally heavy on Gulf, then very cold; latter part sunny and warm in daytime.

Rocky Mountain: Week begins sunny, with slightly below-normal temperatures, then some showers in south; fair and seasonable, but rain in northwest latter part

Southwest Desert: Sunny, warm and dry with highs in 70's throughout week, except in east, where cool weather and lows near freezing prevail

Pacific Northwest: Week begins cool in north, mild in south, then rain; cloudy and mild with light rain from midweek on, becoming heavier in north.

California: *Cool and overcast in west, then clearing, sunny and dry inland, continued sunny and warm in south and inland, mild in north, then moderately heavy rain at week's end.*

the perfect beginning...

Valuable calves need a clean and fast-gaining environment, totally free of disease and those sanitation problems so common to an indoor pen. The calf stall design should make it impossible for a calf to spread disease to other calves.

The New Martin CALF STALLS

You can do more with MARTIN CALF STALLS to save your calves and be certain they realize their full potential. And you can do all of this most conveniently. Keeping our calf stall clean and sanitary is easier because of the one-piece steel sidewall construction—and the removable floor that lifts out for very thorough cleaning. Each stall comes complete with two buckets for feeding, a chain and a removable metal hayrack.

Place your order now for MARTIN CALF STALLS and know how easy it is to protect all of your valuable calves to give each one a perfect start.

Farm Commentary

By Dieter Krieg

Equal responsibility

Something is apparently rotten in Harrisburg, and if it's tied in with government that shouldn't be too surprising

Earlier this year I walked into a man's barn which had manure scattered in the stalls and in the litter alley. Cows and calves were running around loose in the same stable The pipeline was so covered with dust and splattered manure that I had to examine it closely to be sure it wasn't the vacuum line.

Up in the feed alley there was an accumulation of paper bags, baler twine and scraps of hay. The place was filthy.

As though the inside of the barn wasn't bad enough, the exterior conditions were equally shameful. Some of the cows were even in disgraceful shape, especially their feet because the dairyman didn't believe in letting his cows out. That's why they were allowed to run loose inside the stanchion barn - for some exercise and heat detection

The mess didn't stop there - it carried over to the house and surroundings as well, but that doesn't concern either me or the health officials

That particular farm was by far the sloppiest I have ever seen, and ironically, it has a reputation as the home of one of the highest producing herds in the state DHIA testers have made observations basically the same as my own. Breed officials and representatives from a national magazine - have walked away in disgust.

The fieldman from the dairy cooperative has attempted to correct the situation on numberous occasions - even going as far as shutting the individual off four times within a year.

Each time the dairyman was cut off, the decision was overruled in Harrisburg, according to the milk inspector.

I checked into the situation myself one day and was given the typical run-around

My opinion is - if 99 farmers out of 100 can abide by the rules and regulations of the health department, the 100th fellow can too And he should no matter what kind of influence he may or may not have in Harrisburg.

The fellow who ignores quality and health standards and-or DHIA testing regulations gives the entire industry a bad image

Appreciate the inspector

Fieldmen from dairy cooperatives are probably some of the least appreciated men involved in the dairy business

I'm not proud to admit it, but I remember when I used to get nervous about seeing him pull up to the milkhouse in his car and then check off a couple of things he wasn't satisfied with There was never a comfortable feeling involved with that, and I'm sure I'm not by myself in feeling this way

It wasn't until after I was shut off for three days for high leucocyte counts that my appreciation took a turn in the opposite direction Then it finally became clear to me that the inspector is of more benefit than a hindrance Maybe that's debatable in some cases and with some inspectors - but that's my thought now

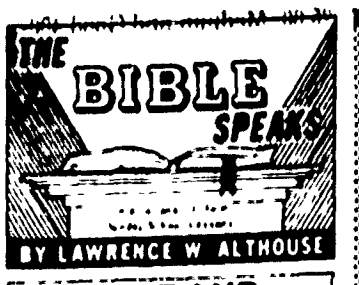
In my own experience, several years ago, I was concerned about the leucocyte problem (and accompanying cases of mastitis - much of it subclinical) but I wasn't concerned enough It wasn't until after drastic steps were taken by the dairy that I straightened things up In the meantime lots of profits were lost - not just because of a lost market for three days - but because of reduced production for weeks and months

As a result of it, I've come to the conclusion that it's wise to pay a little closer attention to the milk inspector Yet, I wonder how many dairymen really appreciate the fieldman from the cooperative And I'll admit that if I were dairying today I'd get nervous about seeing him come But I'd heed his advice more

Dairy specialists, veterinarians and milk inspectors tell us about various problems and potential problems encountered on the dairy farm. Mastitis is one subject they dwell upon most frequently. Recently Don Ace, Penn State dairy specialist, stated that 20 per cent of milk porduction is lost when the leucocyte count reached 800,000 At a level of 1 5 million the cut in production could be as high as 40 per cent

Some time ago the Holstein-Friesian World published a report which said that at least 50 per cent of the nation's dairy cows become infected with mastitis, and of those that do, the National Mastitis Council says three out of four will be infected for 75 per cent of their milking lives

The Council figures that the disease costs the dairyman $100 per cow per year I'm sure the fieldman could save dairymen a portion of this expense if they'd just listen a little more



PRIDE AND PREJUDICE

Lesson for November 9, 1975

Background Scripture: Genesis 28.10-22; 32:1-33.4

Devotional Reading: Galatians 1·10-17.

Dreams were very important in the life of Israel and his family

Two dreams had changed Israel's life· the mysterious dream of a heavenly ladder as he fled the wrath of his brother, Esau, and the strange nocturnal wrestling with a heavenly messenger from God himself. Because of his dreams, crafty Jacob had become Israel, God's chosen heir to the covenant.

"I had a dream . . ."

Joseph, his second youngest son, also was a dreamer. The only difference was that Joseph's dreams got him into serious trouble and almost cost him his life.

Of course there was a troubled household. Israel had two wives, Rachel and Leah, and two concubines. That alone was reason for jealousy and tension. Furthermore, Israel had children by the two wives and the two concubines and the competition between the four women was reflected in the twelve children. Such a household was bound to arouse suspicion of favoritism and in Israel's house it was more than just a "suspicion."

Rachel, to begin with, was his favorite wife and Joseph, his son by Rachel, was his favorite son What's more, the favoritism showed, particularly in Israel's gift to Joseph of a beautiful multi-colored coat.

So Joseph was his father's favorite and there is the suggestion that perhaps he was a bit of a "spoiled brat"! The problem was not just with his dreams, but with the way he related to his brothers. What he said and did was almost guaranteed to provoke their jealous resentment.

One did not have to be a mental giant to interpret his dreams: both of them rather clearly indicated that Joseph saw himself as greatly superior to his brothers. The brothers understandably interpreted the dreams to indicate that Joseph thought that he was in a class apart.

"Here comes this dreamer . . ."

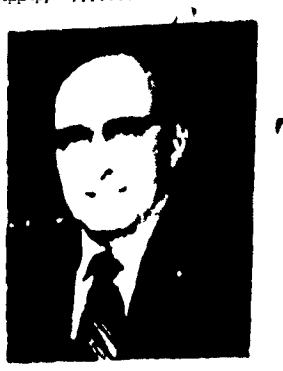
Actually, however, the dreams were precognitive in nature: they foretold something that was to come to pass in the future. They represented not just Joseph's inflated self-image, but a situation that was actually to occur in the years ahead: his brothers would eventually bow to him many years later!

But to the brothers the dreams spoke, not of the future, but of the present and they bitterly determined to do away with this "spoiled brat"! Thus, we see the natural consequence that often follows from the presence of pride and prejudice side by side: violence!

Still, there was more at work than just pride and prejudice — there was also God's providence. For as the seething brothers plotted to kill him, Reuben, the oldest of the brothers, was moved by God to intervene so that Joseph's life could be saved. The brothers intended Joseph's death, but God intended for him to survive and live to do important things for him.

Even in the jealousy-ridden, hate-infested home of Israel, there was an opportunity for the grace of God to thwart the evil of man and bring good out of a bad situation. God salvaged victory out of the seeming defeat of Joseph at Dothan. From that defeat there came an ultimate victory for God and his will.

So, despite pride and prejudice in Israel's household, God's providence prevailed.



NOW IS THE TIME . . .

To Protect Water Pipes

Colder weather is soon to come and exposed water pipes should get some protection. They may be buried at least 24 inches into the soil, or wrapped with electric heating cable. Water supplies are a constant need on most farms and to make repairs, or thaw out frozen pipes when temperatures are near zero can be avoided. The electric cable is a very easy way to prevent freezing but directions should be followed in applying the cable. If any splicing or cutting is to be done, an electrician should be consulted or do the work. Mishandling of the cable could result in a fire hazard.

To Handle New Corn Carefully

The grinding of the current ear corn crop for livestock is a very common practice as soon as it is picked; however, with high moisture content there could be a problem of heating and molding of this freshly ground corn chop. We suggest that livestock and dairy producers grind frequently rather than only once per week. Most of this new corn that has not been heat dried, will start to mold after about 48 hours in the bag or in a feeder. Moldy corn could be toxic to many animals especially breeding females, and extreme care should be exercised to prevent it from spoiling.

To Winterize Farm Machinery

Freezing weather means trouble in water-cooled motors and engines unless there is anti-freeze added, or the motor drained. The motors used daily often are prepared for colder weather, but those on combines or balers are sometimes forgotten and allowed to freeze Also, the protection of machinery from the weather is very important during the winter and we urge all farmers to get their machinery under cover as soon as the last work is done in the fall. A separate machinery shed is recommended so that all of the machinery supplies, and livestock are not housed in the main barn. Machinery wet from snow or rain mean rusty machinery, and rust is the main enemy of a longer machinery life.

To Consider Nitrogen Purchase

The annual question of when is the best time to buy fertilizer, and especially nitrogen, is facing most farmers this fall. This time last year there were indications of shortages and higher prices in the spring, however, that did not happen and many growers could have bought cheaper by waiting until spring. According to our Extension Agronomist, James Eakin, at Penn State the reverse might be true this coming winter and spring. His suggestion is to buy nitrogen now and store, if possible, or apply to heavy soils with vegetative cover. Due to the possibility of natural gas shortages this winter or spring, fertilizer prices might be higher next spring. In most years, the early ordering and accepting of lime and fertilizer needs has been to the advantage of the producer.

Farm Calendar

Saturday, Nov. 8

Keystone International Livestock Exposition slated for the Farm Show Building. Runs through the 14th. For complete schedule see story in this edition.

Wednesday, Nov. 12

Southeastern Pa. Fruitgrowers meeting to be held at the Gilbertsville Fire Hall. For further information contact Herbert Wetzel at the Berks Co. Extension office.

Thursday, Nov. 13

E-town young farmers meeting on corn production. E-town H.S ag classroom at 7:00 p.m.

Friday, Nov. 14

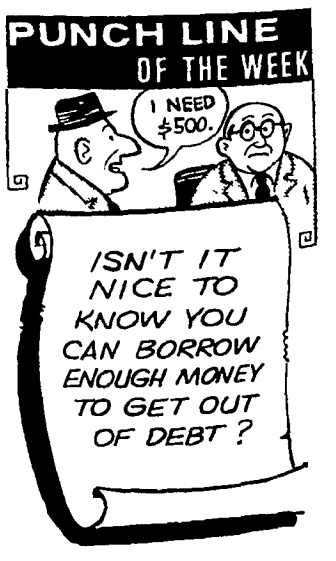
Tillage and soil management meeting at the Willow Valley Motor Inn 7:45 p.m.

Monday, Nov. 17

Pa. Farm and Power Equipment Association convention in Taminent Resort Hotel.

Tuesday, Nov. 18

Lebanon Co. DHIA banquet at the Schaefferstown Fire Hall 7:00 p.m.



Chambersburg

Chambersburg, PA
October 30, 1975

CATTLE 362. Compared with last Thursday's market, slaughter cows mostly $2 to $3 lower. Choice slaughter steers 42.50-46.35, Good 41.50-42.00, Standard 36.50-39.00, Utility 32.00-33.50. Choice slaughter heifers 38.50-42.00, Good 32.50-37.00, Standard 28.00-30.00, few Utility 15.00-25.00. Utility and High Dressing Cutter slaughter cows 22.00-24.75, few to 26.00, Cutters 19.00-21.50, Canners 16.00-18.50, Shells down to 12.00. Yield Grade No. 1, slaughter bulls 28.00-32.00, Yield Grade No. 2, 22.00-26.00. Medium and Good 400-550 lbs. feeder steers 22.00-25.50. Medium and Good 400-550 lbs. feeder heifers 15.00-18.50. Medium and Good 400-550 lbs. feeder bulls 20.00-24.00.

CALVES 537. Vealers mostly $2 to $4 lower. Few Prime vealers 66.00-67.50, Choice 55.00-65.00, Good 40.00-55.00, Standard 35.00-40.00, Utility 110-130 lbs. 25.00-30.00, 90-110 lbs. 18.00-22.00.

HOGS 80. Barrows and gilts $5 lower. US No. 1-3 200-250 lbs. barrows and gilts 51.00-53.00. US No. 1-3 300-575 lbs. sows 42.00-44.00. Boars 36.00-38.10.

FEEDER PIGS 73. US No. 1-3 20-25 lbs. feeder pigs 22.00-26.00 per head, No. 1-3 35-40 lbs. 35.00-45.00 per head.

More health tests required for Canadian cattle imports

WASHINGTON - The U.S. Department of Agriculture (USDA) has been notified that Canada has changed its anaplasmosis and bluetongue regulations for non-slaughter cattle exported from the United States into Canada. The new requirements on the two diseases became effective Oct. 27.

Officials of USDA's Animal and Plant Health Inspection Service emphasized that the new Canadian regulations do not affect cattle shipped to Canada for immediate slaughter.

The new import rules require all cattle in the herd of origin to be inspected within 30 days before importation and found free of these two communicable livestock diseases. Examining veterinarians will also have to certify that to the best of their knowledge neither anaplasmosis nor bluetounge has existed in the herd for two years before export to Canada.

Exported animals must be shown free of anaplasmosis by a negative complement-fixation test within 30 days before export.

Freedom from bluetounge must be shown by two such tests - the first one being made not less than 30 days nor more than 90 days before export, and the second within 30 days. Animals being tested must be isolated from other animals that have not been tested.

The requirements are modified to some extent if the herds of origin have been tested and found free of these diseases within the preceding year, including prescribed tests on the animals being shipped.

Canadian import regulations previously had required veterinarians to cerftify herd-of-origin freedom only for anaplasmosis, and had required only one test for bluetounge.

Additional information on Canadian cattle import regulations may be obtained from offices of APHIS' Veterinary Service, and from the Import-Export staff, APHIS, U.S. Department of Agriculture, Hyattsville, Md. 20872.

xxx

When Dan Reeves, star halfback for the Dallas Cowboys, went to the hospital a few years back to see his wife and newborn son for the first time, he was thrown for a big loss. Rushing into the hospital room, he asked to hold his son, Michael. "Not on your life," his wife said emphatically.

Reeves looked as if a blitzing linebacker had just nailed him in the backfield. "Why not?" he asked.

"You fumble too much," his wife replied.

Hydraulically Powered Submersible Mini-Pump

A small (11" x 8") lightweight (9½ lbs.) and powerful (250 gallons per minute) submersible pump, designed for dewatering and fire fighting, is now available from Robinson Industries, Santa Fe Springs, Calif.

The HSP-250 develops over 100 feet of head and pumps at the rate of 250 GPM, enough to drain an average swimming pool in 1½ hours. Power source may be a tractor, hydraulic power pack or mobile unit with hydraulic power of four to seven GPM at 1500 to 200 psi.

The unique design of the HSP-250 provides for hookups in multiples, either series or parallel, for any volume or head required.

Oil lubricated seals preclude damage when run dry. The unit is self-priming and entirely submersible. It is spark and vapor-free for complete safety.

Outlet size is 2" IPS. Hose port size for hydraulics is ⅜" IPS. All maintenance may be perfomred by owner service personnel using standard tools, according to the manufacturer.

Robinson Industries manufactures a complete line of hydraulic and pneumatic pruning tools, saws and other equipment for agriculture, public utilities and municipal governments under the trade name Limb-Lopper.

xxx

Victor Borge told a friend that he could tell time by his piano. His friend was incredulous, so Borge volunteered to demonstrate. He pounded out a crashing march. Immediately there came a banging on the wall and a shrill voice screamed, "Stop that noise. Don't you know it's 1:30 in the morning?"

Annual meeting held

Agway sales surpass $billion

SYRACUSE — Stockholders and guests at Agway's annual meeting on Oct. 30 and 31 were told that the farmer-owned cooperative topped the billion dollar mark in sales this year. It is the first time it has occurred in Agway's 11-year history.

Among the more than 5,000 member-shockholders in attendance for the two-day meeting were nearly 100 from southeastern and southcentral Pennsylvania.

Ronald C. Goddard, Agway's executive vice-president and chief executive officer, told the group that sales totaled $1,000,702,000 for the year ending last June 30. Net margins after taxes were 17.5 million dollars, an increase of $2.8 million over 1973-74.

Agway Inc. is a farm supply and food marketing cooperative owned by 117,000 member-stockholders and serving agriculture in 12 northeastern states. It was formed in 1964 by the merger of three regional cooperatives.

In his annual report to the membership, Goddard listed some of the more serious problems facing northeastern farmers and outlined Agway's plans for working toward their solutions.

Inflation and the cost-price squeeze that it imposes on farmers were, and are, the most serious obstacles to profitable farm operation, Goddard said. To help ease the burden on farmers, Agway set a ceiling of 1.75 cents on the dollar on after-tax earnings for the 1974-75 fiscal year.

Goddard said earnings were kept within those limits for 1974, but said increasing money needs will force Agway to strive for a slightly higher earnings rate this year.

Noting the celebration of the country's bicentennial, the Agway executive also listed several actions that must be taken on the national level to assure that the next 200 years provide continued incentives to farmers. They are:

1. Develop a national energy policy aimed at conservation of and eventual independence from foreign petroleum sources.
2. Cut deficit spending in government on all levels.
3. Prevent a recurrence of runaway inflation by keeping government spending in check.
4. Recognize that there is a finite limit to all natural resources and develop a prodent management policy.
5. Make use of the country's greatest resource . . . people . . . by providing productive employment in private businesses.
6. Be vigilant in efforts to assure continuation of the free enterprise system.

In his report to the membership, George Steele, chairman of the board of directors, noted that, despite the general decline in the number of farms in the Northeast, Agway membership continued to grow. During the year, membership increased by 4,000, bringing the total to 117,000.

Members also gave "dramatic evidence of their confidence in the financial strength of the cooperative," Steele said, when $28 million in Agway securities were subscribed shortly after they were offered for sale.

"The year ahead presents substantial challenges to Agway and its members," Steele said, "but they are not insurmountable. We can solve them by working together."

Frank Philipo, owner of a Manheim butcher shop, purchased the grand champion FFA steer, held last month after the FFA animals were exhibited at the Manheim Fair. Tim Good, right, was the grand champion's owner.

Phosphorus symposium slated

Successful efforts to increase food production throughout the world are tied directly to effective use of fertilizers. Current knowledge about one of the basic fertilizers, phosphorus, will be critically evaluated at a symposium to be held June 1-3, 1976 at the Tennessee Valley Authority's National Fertilizer Development Center in Muscle Shoals, Alabama.

"The Role of Phosphorus in Agriculture," sponsored jointly by the American Society of Agronomy, Crop Science Society of America, Soil Science Society of America and TVA, will summarize current and recent research on all phases of phosphorus as it relates to crop production. The information presented will be of interest to agronomists, crop scientists, soil scientists, and representatives of the mining, manufacturing and marketing segments of the phosphate fertilizer industry.

Speakers at the symposium will present a survey of world deposits of phosphate rocks, and the supply - demand outlook for phosphate fertilizer as well as discussions of new technology for low-grade ore deposits and trends in phosphoric acid technology. The symposium will also deal with agronomic effectiveness of various phosphate sources, phosphate reactions in soil, evaluation and use of organic phosphate reserves and residual inorganic phosphate in soil, phosphate nutrition of major crops, and the impact of agricultural phosphorus on the environment.

Papers presented during the symposium will be published in a hardcover book which should be available 9-10 months after the symposium.

For additional information, contact: E. C. Sample and F. E. Khasawneh, Symposium Co-chairmen, National Fertilizer Development Center, Tenessee Valley Authority, Muscle Shoals, AL 35660; or the American Society of Agronomy, 677 South Segoe Road, Madison, WI 53711.

LOW INITIAL COST. FAST EASY ERECTION. ALL STEEL. LONG LIFE.

No till convention slated for Hershey

Farmers seeking the latest information on no-till practices for corn and soybean production should make plans to attend the 1975 Mid-Atlantic No-Till Convention scheduled for January 13 at the Hershey Convention Center, Hershey, Pa.

"This past winter a similar conference was held near Baltimore with 1,100 farmers attending," said James H. Eakin, Extension agronomist at The Pennsylvania State University and conference chairman. "With continued interest in no-till practices, we are finalizing plans for another one-day program."

Sponsors of the event are the various agribueinesses dealing with no-till production and the Cooperative Extension Service of Pennsylvania, Maryland, New Jersey, Delaware, and Virginia.

The program will start at 9:45 a.m. on January 13 with Harry M. Young, Jr., of Melrose Farms, Inc., Herndon, Kentucky, serving as keynote speaker. Hi topic will be "Economics of No-Tillage Practices."

Other topics will be techniques in planting no-tillage corn and soybeans; weed control; spray equipment and application; and new methods in seeding rye for cover crop.

Another feature will be a panel of farmers who will discuss their experiences in using no-till practices.

There will be numerous commercial exhibits on display at the Hershey Convention Center both on January 13 and from 7:30 to 9:30 p.m. on January 12.

Those interested in attending the conference may sign up for a ticket at the local Cooperative Extension Service Office.

OVER ELEVEN YEARS EXPERIENCE TELLS THE STORY!!

ROUGHAGE ANALYSIS INCREASES YOUR POTENTIAL

- For Higher Milk Production
- For Greater Income Over Feed Cost
- For Improved Net Returns

Feed, whether you buy it or grow it, represents an outlay of 25 to 45% of your milk check. Beacon's Free Roughage Analysis Service can help you lay the foundation for an efficient and effective feeding program for your herd.

"Eyeball" analyses won't do the job. You need scientific sampling, high quality laboratory analyses of the samples, and ... most of all ... the recommendations of skilled and practical dairy nutritionists on how to apply these analyses to benefit your herd.

The Beacon Roughage Analysis Service will help you toward the three goals all dairymen share: Higher Milk Production, Greater Income Over Feed Cost, Improved Net Returns.

There is no charge for this very worthwhile service. The Beacon Advisor will visit your farm, take samples of all your roughages. He'll send them to the Beacon laboratory for analysis. You'll get back a report and feeding recommendations tailored specifically to your herd, it's production level and your roughage supply.

Jeff Miller, State Star Farmer

Happiness is farming

By Pat Bradley
Berks Co. Correspondent

VIRGINVILLE — Jeff Miller, FFA State Star Farmer of the year, really enjoys farming. In fact, he says, "I wouldn't give it up for anything else in the world. I just wouldn't be happy doing anything else."

Jeff, who lives and works with his parents on their Kutztown R3 dairy farm, also finds time for winning various ag-related and scholastic awards.

He won the State Star Farmer award by managing 42 dairy cattle and two 250 acre crop farms. The major crops being: corn, barley, alfalfa and oats.

In the past he has won three gold medals for his project books, a first place in county public speaking competition and first place state and fourth national for dairy judging.

This past summer he showed the grand champion Holstein in the Junior Dairy competition at the Allentown Fair.

While attending Kutztown High School he was a member of the National Honor Society. During his junior year he was chapter president of the FFA. He then went on to become county president. In addition, he also won first place in the FFA tractor driving contest while in high school.

His other activites include membership in the Berks Junior Holstein Association, Kutztown Young Farmers, American Institute of Cooperatives, treasurer of the Zion United Church of Christ Youth Fellowship Group, Virginville 4-H president and membership in the Virginville Grange.

Jeff accredits his success to his father and several FFA advisors. "I just couldn't have done it without them. You just don't go out somewhere and start farming. You need a lot of help and guidance," he says.

Jeff enjoys the FFA and all its related activities. "Before I joined the club I was out of the state maybe twice. Since I've joined I've been travelling all the time," he remarked. "It's a good way to see a lot of places and people and learn a lot of new things," he added.

Jeff says he was travelling so much this summer, to various competitions and fairs, that his father had to hire someone extra to help around the farm.

His plans for the future include a lot of hard work on his parent's farm. Farming is his life and he wants to make the most out of it.

Later this month he will be going to Kansas City to compete for the tiele of National Star Farmer.

Berks Countian, Jeff Miller, has won numerous awards during his years as a member of the Kutztown FFA chapter, the latest one being the State Star Farmer Award for 1975. He says he wouldn't be happy doing anything else but farming.

Cox addresses Kiwanians

ELIZABETHTOWN — National Central Bank, Director of Public Relations, Dennis F Cox, addressed a meeting of the Elizabethtown Kiwanis Club [illegible] evening [illegible] the group that although the banking industry is and will likely remain involved in the financing of pollution control measures, the ultimate cost of cleaning up our environment will fall to the average American taxpayer

He pointed out that already established ecological goals will cost the nation staggering amounts in the immediate future and that while debate continues over techniques and methods there seems to be no question that pollution control has become national policy

According to the Lancaster bank executive, it will cost $40 billion a year for the next 25 years if we are serious about cleaning up the environment and keeping it clean

He reported to the group that the banking industry is already and will continue playing a major role in financing pollution control measures "The industry is accomplishing this through support of municipal bonds and through private sector loan activity." he said "However, regardless of methods of financing or techniques of pollution control, the middle income taxpaying-consumer will ultimately pay for environmental efforts through taxes, price increases, and other social tolls such as unemployment and reduced productivity growth."

Cox, 1015 Kreps Road, Lancaster, is a graduate of Penn Manor High School and earned degrees in journalism and political science at Pennsylvania State University He came to National Central from Sperry New Holland, Division of Sperry Rand Corporation in 1974.

Correspondence course on pesticides use offered

Application blanks for obtaining Correspondence Course 181, "Pest Management and Environmental Quality," and the other materials necessary to prepare for certification as a private applicator of restricted-use pesticides are available at the office of the County Extension Agent.

All producers of agricultural commodities who use or supervise the use of restricted-use pesticides must become a certified private applicator in order to purchase and use restricted-use pesticides after October 1976.

Correspondence Course 181 consists of 11 lessons on such subjects as — Management of Common Insects and Mites, Weed Control and Herbicides, Pesticide Formulations and Toxocity, and Pesticide Safety.

Pennsylvanians must complete an application blank to order the course. The Pennsylvania Department of Agriculture certification examination will be forwarded with the course to those who desire certification as private applicators.

Individuals study the course and answer the examination questions at home. The answer sheets are returned to the Pennsylvania Department of Agriculture in a self-addressed envelope forwarded with the examination.

Any individual may enroll in the course whether or not they desire certification as a private applicator.

Since commercial applicators will be administered examinations proctored by staff of the Department of Agriculture, they will not receive an examination.

The cost of the course is six dollars each. Application blanks can be completed and returned to Course 181, Room 307 Ag. Admin. Bldg., University Park, Pa. 16802, along with a check made payable to The Pennsylvania State University.

Clear up scummy ponds, sink green algae

With Wayne POND KLEER, you remove the cause of green scum on your farm ponds Such scum caused by certain algae growth can be poisonous to livestock It prevents swimming and may kill off fish as it depletes oxygen in the water

Wayne POND KLEER helps prevent green algae growth even when excess phosphate from pasture or barnlot drains into the pond You just spray POND KLEER into the water from shore or from a boat Treated algae sink to the bottom where they slowly die from lack of light and food POND KLEER won t kill fish when used as directed In fact ponds can be fished immediately after treatment And they re safe for swimming after cloudiness in the water has disappeared

POND KLEER, applied spring and fall will give you ponds to enjoy and to be proud of See your Wayne Feed Dealer Or write Allied Mills, Inc , 110 North Wacker Drive Chicago Illinois, 60606

Agway men re-elected

The three top officers of Agway Inc. were reelected Oct. 31 following the Agway annual meeting in Syracuse, N.Y.

They are: George Steele, chairman of the board and president; Henry W. Bibus, vice chairman of the board; and Ronald N. Goddard, executive vice president and general manager.

Agway is guided by an 18-member board of directors, all of whom are farmers.

Steele, a Pocopson, Pa., dairyman, has served as board chairman since 1971. Prior to the founding of Agway, when he became one of its directors, he served as vice president of Pennsylvania Farm Bureau Cooperative Association, one of Agway's predecessors.

A member of the Agway board since 1964, Bibus, a Wrightstown, N.J., vegetable and grain grower, was first elected vice chairman in 1971. For 18 years he had been a director of Cooperative GLF Exchange, another of Agway's predecessor organizations.

Goddard, the organization's chief executive officer, has been with Agway since 1937. He held a number of key positions in the cooperative's retail, planning, and marketing operations before being named assistant general manager in 1968 and general manager in 1969.

National Red Poll sale slated

Thirty-eight Red Poll breeders from twelve states will sell more than 100 lots of registered Red Poll cattle at Troy, Ohio, on November 13.

The cattle will be judged during the forenoon of sale day by Dr. Richard Vatthauer, extension animal scientist, University of Wisconsin. The auction is schduled to begin at 12:30 p.m. e.s.t.

A likely headliner in the sale is Bordendale O. Blue Boy, a proved six-year-old sire consigned by Mr. and Mrs. Wm. W. Hoffine, Lafayette, Indiana. Not only is this bull a proved sire of top cattle in the Hoffine herd, the bull himself won the grand champion award at the 1971 National Red Poll show. His dam was national grand champion female two years later.

The grand champion Red Poll bull of the 1975 Minnesota State Fair, the reserve junior champion bull of the 1973 Indiana State Fair and the junior champion bull of the 1975 Illinois State Fair are among the consigned bulls to be competing for show and sale honors.

Vying with the Hoffine bull for prime attention, will be the young cow Pinpur Heritage Starletta GR22-CR162735, reserve grand champion Red Poll female 1975 National Red Poll show. The cow is consigned by her institutiaonl breeder, Pinney Purdue Agricultural Center, Wanatah, Indiana, an outlying experimental and demonstration farm of Purdue University. The cow will sell with a bull calf at side. The Pinney Purdue station is noted for having done a more complete job of beef performance testing of its Red Poll herd over the years than is known to have been accomplised with any other herd of any breed, in the world.

Sixteen head of 91 females consigned, in addition to the national reserve champion, have placed highly in various major state and county breed shows of several states.

Twelve of the 16 bulls have weaning weight records obtained in the breed's own programs. Unadjusted weights at 205 days of age average 644 lbs. with a top of 749 lbs. Seven of these 12 "Gain Registered" bulls also have 356-day weights, which average 1127 lbs. to a top of 1201 lbs.

Among the females, 49 head have official weaning weight records, averaging 480 lbs., unadjusted. Twenty-three of the female records indicate 2.0 lbs. per day or more of average gain to a top of 2.5 lbs.

Pinpur Heritage Starletta was the reserve grand champion female at the 1975 National Red Poll Show held at the Indiana State Fair earlier this year. She has been consigned to the 32nd annual National Red Poll Sale, to take place in Troy, Ohio, on Nov. 13.

Farm-city weekend tours slated

The Chester-Delaware County Farmers' Association will be sponsoring a Farm-City weekend on November 15-16 to which all interested persons are invited.

Twenty-three farm operations, greenhouses, mushroom houses, and other agriculturally related businesses will be open next Saturday from 10:00 a.m. to 4:00 p.m. and on Sunday from 1:00 to 4:00 p.m.

Brochures describing the activities are available in schools and businesses of the area. The purpose of the Farm-City weekend is to "build a bridge of understanding with our city and urban neighbors."

Following is a list of farms to be seen, and brief highlights about each:

Amyr Farms, North of Oxford, - Dr. Richard Stoneback and family specialize in purebred Arabian horses, and a goat operation complete with box stalls, stanchions, and milking parlor.

McFadden Greenhouses, Wedgewood Rd., south of Oxford - 65,000 square-feet growing area under glass and fiberglass. Flowers, especially roses, are the specialty and they're marketed throughout the Philadelphia, Baltimore and Washington areas.

John K. Harnish Poultry Farm, Oxford - open Saturday only. A 12,000 cage operation with complete facilities for processing, washing, and grading.

Paul Johnson, at the end of Waterway Rd. on Route 472 - two mushroom houses, one double filled and one empty. Open Saturday only.

Penn Lea Farm, Mr. and Mrs. Earl Hatton - Route 896 at Elkview. Milk from their 128 Holsteins is allowed to be sold retail without pasturization. Free-stall parlor operation.

Ar-Joy Farm, west of Route 10 between Chocranville and Russellville. Owned by Mr. and Mrs. Arthur Hershey and family, the farm consists of a 50-cow registered Holstein herd and 500 hogs raised on slats in a fattening operation with automatic feeding and watering systems.

Mr. and Mrs. Melvin Lapp, Cochranville - 750 acre farm, with corn the primary crop. Chick to broiler operation for 70,000 birds raised in a 44 by 460 foot house with environmental control and continuous light.

Gum Tree Stables, just off of Route 10, north of Cochranville. Mr. and Mrs. J.K. Harris are the owners of facilities for resting, breaking, and conditioning race horses. Pony rides available with proceeds going to Children's Hospital, Philadelphia.

Modern Mushroom Farms, Inc., Toughkenamon - the largest and most modern mushroom growing plant in the East. Every phase of mushroom growing can be seen by visitors.

R. and S. Barnard Orchard and Greenhouse, three miles east of Unionville of Rt. 842. Fifty acres of fruit trees and 12,000 bushel cold storage facilities. Also a large flower growing operation specializing in snapdragons and carnations.

Louise R. McMullan, Pocopson - a small dairy farm with 21 milking cows which has been in the same family for over 60 years.

Woodward Brothers Dairy Farm with collection of old tractors and implements in working order is open to visitors on Saturday only. Located south of Pocopson.

Nussex Farms, West Chester, produces 50,000 gallons of cider, annually. A full line of vegetables are grown on his farm, which also include 160 acres of fruit trees.

The Nancy Riser Goat Farm on Pennell Rd., Glen Riddle, has a milking herd of 24 goats and has been on DHIA for nine years.

The Far Out Cactus Greenhouse, located three miles south of West Chester, features the largest collection of cactus on the East Coast. Fifteen hundred varieties can be viewed in a typical greenhouse operation from seed growing; to retail sales.

Harry Bickel, West Chester, has a 250 acre dairy farm with free stalls and 60 cows. Crops include corn, hay, and small grains.

Linvilla Orchard - largest known octagonal barn; 300 acres of fruit trees and vegetables. It is one of the last fruit and vegetable farms in the Philadelphia suburban area. Take Route 452 off Rt. 1 and look for farm on West Knowlton Road.

Patty-Run Farm, located ¼ mile west of Bridge Street exit on Route 724 on Klob Rd. Owned and operated by Daniel Klob and family, the farm consists of 170 acres, 55 Holsteins, and 500 laying chickens.

Bachelors Flowers is a retail florist operation complete with nine air-conditioned and C02 controlled greenhouses. Located at Snowdenville.

More than 100 Holsteins, a milk processing plant, and a dairy store are the chief attraction at William and Lester High's Ridglea Farm at Bucktown.

Titus Beam at Elverson has 500 feeder hogs, 150 beef cattle and some sheep on his 225 acre farm.

A 100-head of registeres Syrshures in a conventional tiestall bran can be seen at the Charles Gable farm, south of Elverson.

A fish farm covering 46 acres is the attraction at Mahlon Kurtz's about 3½ miles south of Elverson. Thirty-two ponds are used for warm water fish production.

Health charts sold unlawfully

(Continued from Page 1)

cattle re-tested," he emphasized, "otherwise it's a game of Russian roulette."

According to Guss, some cows have been sold in Pennsylvania for dairy purposes which had been branded on the cheek with a 'b' for brucellosis. He revealed that one Pennsylvania cattle dealer has been responsible for half of the herds in the state which were depopulated because of Bang's disease.

In spite of the charges, Guss defended the Bureau of Animal Industry in the Commonwealth as "the best we've ever had." He believes strongly that there is a tremendous opportunity available for farmers because of the healthy, purebred animals raised in the state. Furthermore, he would like to see disease-free gohs certified as such, for example, and challenged the industry to bring it about.

"Because of the unique position we have in the numbers of healthy livestock, we should exploit this," he suggested. Nothing that Pennsylvania has more purebred Yorkshires than any other state, and more purebred Holsteins than Wisconsin, he proclamied that a cooperative effort should be started to promote "this unique thing."

Guss mentioned several disease which Pennsylvanians should be on the look-out for and made a couple of suggestions to help overcome them.

Testing is one method he strongly recommends for keeping herds healthy and Pennsylvania on top healthwise. Vaccination is another.

A form of cancer in dairy cattle is infecting as many as 20 per cent of the dairy cows in some parts of Wisonsin, Guss warned. Another disease to beware of is Johna's disease, which reportedly has the potential to destroy a herd in a very short time. Mastitis and infectious bovine rhinitis (IBR) weren't overlooked. Guss termed the first as "the most expensive cattle disease we have," and the latter as "the most serious."

The number one disease in swine is mange, according to Guss. An effective way to detect it early is to examine the ears. "Unfortunately it isn't detected very often - we think it's natural for a pig to scratch himself that much," the veterinarian stated. He observed that the disease was especially strong in northern counties.

Swine dysentery is confined to animals which had been brought into Pennsylvania from the Midwest, and "we're in awfully good shape as far as this one is concerned," Guss related. Metabolic disease are on the rise and "the present problem," he continued.

"The milk quality program has literally gone down the drain," Guss revealed, and according to him, "no effort is being made by either government or the industry to upgrade requirements."

He believes that maybe farmers would be moved to do something about it if the resulting milk losses (due to mastitis) can be made clear to them. Don Ace, dairy specialist from Penn State who also spoke at the meeting, noted that an 800,000 leucocyte count cuts production by about 20 per cent, and at 1.5 million (when the dairy complains and threatens to cut the producer off) the loss is more than a third.

Both Guss and Ace revealed that a new somatic cell tester is being tried out at the University and it may be a valuable tool in detecting mastitis (especially sub-clinical cases) directly from the DHIA samples at some time in the future. "This somatic cell tester offers great possibilities for us," Guss remarked.

Another research development which has some potential in reducing cattle disorders is a strand of alfalfa with a balanced calcium-phosphorus ratio. "We're really excited about it and believe it would be of great benefit to farmers," the retiring veterinarian exclamied.

Parasites and breeding problems are two other areas of animal health Guss commented on. As far as worms are concerned, Guss said medicines are a good tool, but not the complete answer.

Breeding problems have a variety of causes, but the "biggest new problem in this area is the farmer-breeder," Guss said. After a short pause, he added: "And I don't know how to handle it." According to his findings, some herds have turned into disasters because of farmers not knowing how to breed a cow properly. At one point Guss asked the audience if it could be that an entire generation of dairymen may have emerged who do not even know the signs of heat in cows. One fellow in the group interrupted with: "Maybe farmers never did know, but in the old days the bull knew."

Guss claimed that at one farm 160 cows were bred and out of that number five conceived - "and these were purely accidental," he added. "The farmer was killing the sperm before he even got it into the cow."

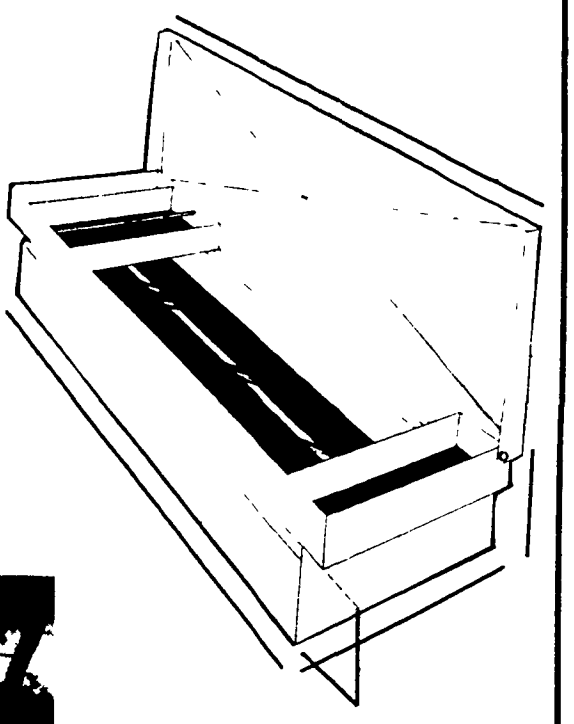
In concluding his remarks, Guss reminded the audience once more of the importance of testing cows, vaccinating against IBR, and controlling mastitis.

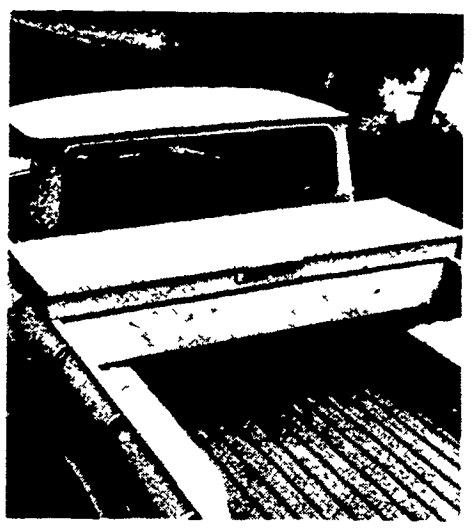
Rare plants donated

Channel 12, the Delaware Valley's public television station, will have help from many public gardens and arboreta in the area for its auction the week of November 8-15, 1975. Rare plants, including orchids, hollys, azaleas and confiers' gardening study courses; a scholarship to a summer gardening program for a child; even a personalized tour through Longwood Gardens by a high official of the staff will be donated to the station for auction at its fall fund-raising event.

COMPACT PICKUP UTILITY BOX

Especially styled to fit Datsun, Toyota, Luv, Scout and Courier, this strong tool box is made for the smaller pickups. It's easily accessible without cluttering the loading area. And like the large Delta boxes, this Model No. 7 permits unobstructed visibility for maximum driving safety. If appearance, visibility and security for tools, guns, fishing gear, etc. are your requirements — look into this box for your compact pickup. Easy to install, economical and long lasting, too!





MODEL	A	B	C	D	E	Shipping Weight
#7	59½	55½	18¾	11	7	70 lbs

Features: (1) All welded construction (heavy gauge cold rolled) (2) Baked white enamel (3) Easy accessibility (4) Permits sufficient storage for tools of all types (5) Ample storage space between floor and box (6) Water resistant (7) Parts-bin with a removable tray A tool box within a tool box.

Lew Ayres honored

(Continued from Page 1)

FFA dairy show for the past three years, and the champion County hog for four consecutive years.

This year, and once before in 1971, his dairy judging teams captured first place at a national invitation judging contest at Columbus, Ohio. A number of his judging teams have competed in Harrisburg, Richmond, and Springfield. Ayers may also take credit for having started the Lancaster County FFA hog show, the Ephrata Jaycees Steer Award, and the dairy show at the Ephrata Fair.

A graduate of Tyrone High School and Penn State University, Ayers credits his interest in agriculture to his farm background, the Tyrone High School FFA program, and his teacher, Sam Hayes.

While at Penn State, Ayers participated in numerous activities, including the school's dairy judging team. He received his Bachelor of Science degree in 1961 and a Masters degree six years later. Since beginning his teaching career he has served as officer of several organizations, including the Pennsylvania Agriculture Teachers Association (president, 1970), and the Ephrata Area Jaycees.

Of particular satisfaction to him this year is the fact that the Cloister Ephrata FFA chapter is being recognized as one of three Pennsylvania outstanding FFA chapters. The citation, known as the "Gold Emblem Award," has been won twice previously during the years he has headed the vo-ag department at Ephrata.

The Cloister FFA chapter is guided by three other instructors besides Ayers. They are Ernie Orr, Carl Graybill, and Charles Ackley. The chapter boasts 131 members at the present time and offers an agricultural science course for sixth graders.

This year 92 teachers of vocational agriculture have been nominated to receive the degree during the National FFA Convention in Kansas City, Mo. There are 11,500 vo-ag teachers in the United States. Ayers plans to attend the national FFA Convention, which takes place Nov. 11-14, where he will be presented with the degree pending final approval of the nomination by the student FFA delegates who must vote on all honorary presentations of the National FFA organization.

Queen

(Continued from Page 1)

PFA's regional talent competition and will be a contestant in the state farming association's contest later this month.

She is a member of the Lewistown Grange and plays the piano and organ for her church.

Dawn's face registered a smile of surprise when she was announced as the Queen. "I'm so happy I was able to try out for this contest and I'm anxious to serve the industry," she noted.

Dawn thanked the poultry associations for helping to carryout the pageant program. Dawn was sponsored by Agway in Schuylkill County.

Other contestants vying for the title were Julie Lanius, of York County and Judy Stoltzfus representing Lancaster County.

Judges for the event were Carl Grubic, vice-president of Commonwealth National Bank; Delphine Lynch, former pageant coordinator and Melissa Piper Bowman, Associate Editor of Lancaster Farming.

The pageant is sponsored annually by the Pa. Poultry Federation and county poultry associations. John Hoffman, director of the Poultry Federation served as coordinator for the program.

William Carlin, president of the Pa. Poultry Association gave remarks during the evening with a farewell address given by last year's queen Kathy Bicksler. Mac MacCauley served as toastmaster and emcee.

A Farmer's Creed.

I believe a man's greatest possession is his dignity and that no calling bestows this more abundantly than farming.

I believe hard work and honest sweat are the building blocks of a person's character.

I believe that farming, despite its hardships and disappointments, is the most honest and honorable way a man can spend his days on this earth.

I believe farming nurtures the close family ties that make life rich in ways money can't buy.

I believe my children are learning values that will last a lifetime and can be learned in no other way.

I believe farming provides education for life and that no other occupation teaches so much about birth, growth and maturity in such a variety of ways.

I believe many of the best things in life are indeed free: the splendor of a sunrise, the rapture of wide open spaces, the exhilarating sight of your land greening each spring.

I believe true happiness comes from watching your crops ripen in the field, your children grow tall in the sun, your whole family feel the pride that springs from their shared experience.

I believe that by my toil I am giving more to the world than I am taking from it, an honor that does not come to all men.

I believe my life will be measured ultimately by what I have done for my fellowman, and by this standard I fear no judgment.

I believe when a man grows old and sums up his days, he should be able to stand tall and feel pride in the life he's lived.

I believe in farming because it makes all this possible.

Pa. grain storage increased

HARRISBURG - Grains in storage in Pennsylvania have increased seven percent over last year, according to the Pennsylvania Crop Reporting Service.

Stocks of corn (old corn), oats, barley and wheat in Pennsylvania as of October 1, 1975 totaled 43.5 million bushles.

Old crop corn in storage at 11,034,000 bushels were up 50 percent from 1974. Off-farm stocks at 1,233,000 bushels compared to 1,658,000 while farm stocks of 9,801,000 far exceed last year's 5,678,000.

Stocks of oats at 15,746,000 bushels were only two percent over last year. Off-farm stocks of 1,216,000 bushels compated to 1,076,000 last year, while farm stocks of 14,530,000 compared to 14,303,000 bushels in 1974.

Total stocks of barley were down three percent of 5,354,000 bushels. Off-far, stocks were 842,000 bushles from last year's 920,000 while farm stocks at 4,512,000 compared to 4,606,000 bushels a year ago.

Wheat stocks of 11,321,000 bushels were down nine percent from 1974. Off-farm stocks fell by five percent to 7,506,000 bushels while farm stocks were off 16 percent to 3,815,000 bushels.

Nationally, stocks of the four feed grains (corn, oats, barley and sorghum) in all positions totaled 26.0 million metric tons, 10 percent less than holdings on October 1, 1974.

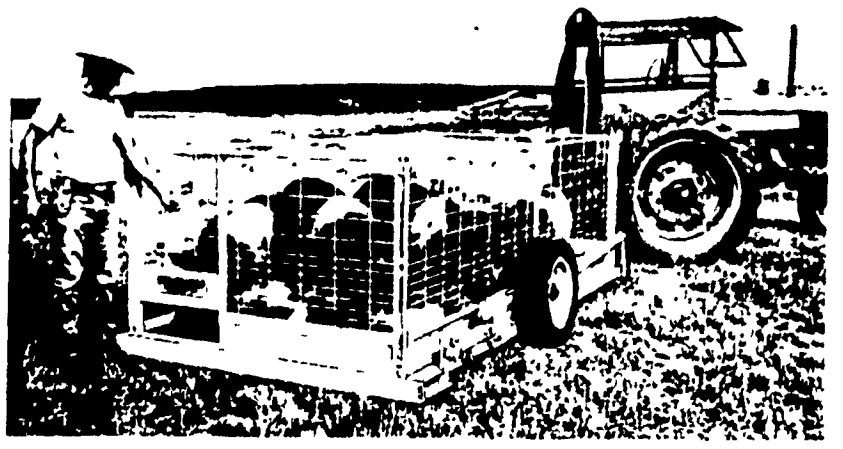
Old crop corn stored in all positions on October 1 totaled 359 million bushels, 26 percent less than a year earlier. Corn stored on farms, at 190 million bushels, was down 34 percent from last year. Stocks in off-farm facilities were down 14 percent from a year earlier.

Oats in storage October 1, 1975 totaled 624 million bushels, one percent less than a year earlier. Farm stocks at nearly 512 million bushels were three percent above a year earlier but off-farm stocks at 131 million bushels were down 16 percent.

Barley stored in all positions on October 1 totaled 350 million bushels, 13 percent above a year earlier. Farm stocks at 223 million bushels were up 22 percent, while off-farm stocks were virtually unchanged from a year ago. Disappearance during July-September was 107 million bushels, down nine percent from the 119 million bushels during the same period a year ago.

All wheat storage on October 1, 1975 totaled 1,874 million bushels, 21 percent above a year earlier. Off-farm stocks at 1,129 million bushels were 28 percent larger than a year ago. Farm holdings of 745 million bsuhels were 11 percent above a year ago. Dissappearance from all storage positions during the July-September quarter was 584 million bushels, 19 percent more than the 491 million bushels in the comparable quarter of 1974.

WALK—ON
LIVESTOCK TRAILER



★ The handiest way to move livestock or supplies on and around the farm.

★ Trailer bed lowers to ground level for loading, levels automatically, raises hydraulically to transport.

★ Operates from any standard single or double acting hydraulic system, pulls behind tractor, pick-up or auto.

★ Available in 12 and 14-foot lengths. 6 ft. width with side panels 42 inches high.

★ Open panel design provides air movement to keep livestock cool on hot days.

★ The entire rack may be easily removed to make a flat bed trailer.

SPECIFICATIONS

Weight:
LW 12 1800 lbs (12 foot bed)
LW 14 2000 lbs (14 foot bed)

Capacities:
Swine 20 market hogs, 12 400-lb sows
Cattle 8 yearlings
Sheep 35 market lambs, 25 ewes

Tobacco loan rates proposed

WASHINGTON - Proposed schedules of grade loan rates for all types of 1975-crop cigar tobacco, which average about 12 percent above 1974-crop levels, as required by law, were announced recently by the U.S. Department of Agriculture.

The 1975 rates, per pound, (with 1974 rates in parentheses), are: For Ohio, filler, types 42-44, from 30.0 to 50.0 cents (23.5 to 44.0); for Wisconsin, type 54 and New York and Pennsylvania, type 53, from 25.0 to 55.0 ccents (23.0 to 48.0); for Wisconsin, type 55, from 25.0 to 72.0 cents (22.0 to 66.0); for Connecticut valley Havana seed, type 52, from 44.0 to 84.0 cents (39.0 to 75.0); for Connecticut valley broadleaf, type 51, from 44.0 to 88.0 cents (39.0 to 80.0); for Puerto Rican, type 46, from 23.0 to 57.0 cents (21.0 to 50.0).

The proposed rates reflect average support levels of 48.0 cents per pound for types 42-44 and 53-55, 66.5 cents per pound for types 51-52 and 49.9 cents per pound for type 46.

Comments regarding the proposed rates will be considered if submitted in writing by Dec. 1, 1975 to the Director, Tobacco and Peanut Division, Agricultural Stabilization and Conservation Service, U.S. Department of Agriculture, Washington, D. C. 20250. The comments will be available for public inspection in the Office of the Director, Room 6741 of the Department's South Building.

The cooperative associations through which price support is made available will be authorized to deduct one cent per pound to apply against overhead costs.

The reasons for greater occurrence of sulfur deficiencies in todays soils are:

.. Increased use of high analysis sulfur - free fertilizers.

.. Increased crop yields and double cropping increase the withdrawal of plant nutrients including sulfur from the soil.

. Increased consumption of low sulfur fuels and greater emphasis on control of air pollution, reducing this atmospheric source of sulfur.

National FFA convention convenes Nov. 11

The nation's largest annual student convention will get under way next week as 17,000 Future Farmers of America, their advisors and guests gather in Kansas City, Missouri, November 11-14, for the 48th National FFA Convention. Heading the list of featured speakers will be Vice President Nelson A. Rockefeller and Cincinnati Reds All Star Catcher, Johnny Bench. Other features of the convention include an expanded Agricultural Career Show and the introduction of eight "Celebrate 76" activities to involve FFA chapters and members in the 1976 U.S. Bicentennial Celebration.

Hotels and motels in the Kansas City area report record advance registrations and are expecting to be filled to capacity during the four-day National Convention. The convention will be attended by FFA representatives from every State as well as from Puerto Rico and the Virgin Islands, according to National FFA Executive Secretary, Wm. Paul Gary. In addition several students from Europe and South America who are participants in the FFA International exchange program will also be in attendance as guests of the FFA.

Also among convention guests of honor this year will be Agricultural Education leaders from several Latin American and European nations who are meeting in Kansas City this year to plan the First World Conference in Agricultural Education to be held in conjunction with the 1976 National FFA Convention. The conference is being sponsored through the National FFA Foundation, Inc., by Massey-Ferguson Inc.

The convention will be a whirlwind of activity for all who attend. In addition to business sessions conducted by elected delegates, convention participants will be involved in career related contests, and educational tours of Kansas City area agribusinesses. An agricultural career show occupying a floor of the convention hall will give students an insight into careers open to students with training and experience in agriculture. In addition to award presentations and pageantry, this year's convention program includes speakers from government, business, and sports as well as from the ranks of the FFA organization.

Of the anticipated, 17,000 persons in attendance about 4,000 will be advisors, parents, school administrators and others with special interest in the Future Farmers of America. Business of the National FFA Convention is conducted entirely by the organization's 119 student delegates, all of whom are in high school or who have graduated within the last year. The delegates, who represent 485,000 FFA members from 49 States and Puerto Rico, arrive a day early to participate in committee meetings and to prepare for the convention business sessions and activities. Six National Officers elected at the 1974 National FFA Convention preside over all business sessions. All meetings are conducted according to rules of parliamentary procedure with student delegates voting on all issues of business.

Although the 48th National FFA Convention officially opens Wednesday morning, delegates will begin their work on Tuesday with a series of committee meetings, and will hold their first business session in which they will hear reports of official committees. A Tuesday evening Vespers Service conducted by the National Officers and the National FFA Chorus marks the beginning of convention activities. Following the Vespers Service, FFA members will be entertained in the Municipal Auditorium Music Hall by the Operaland singers of Nashville, Tennessee. The special performance of "Our Country" for FFA members is being sponsored by the Ararat Temple of Kansas City, Missouri.

Throughout the convention, music and entertainment is provided by a unique 115-piece FFA band and 99-member chorus. The band and chorus are selected from applications of FFA members mailed to band director, Roger Heath, director of VIP Bands, Blacksburg, Virginia, and chior director, M. D. Myers of West Lafayette, Indiana. Both band and chorus members arrive three days before the convention to practice and participate in special activities. Additional entertainment is provided by talented FFA members who perform on the stage and at banquets throughout the week, demonstrating a variety of talents from group singing to string quartets. A Talent Show on Thursday evening features these FFA members performing for the entire conventio audience prior to the opening of the "Stars Over America" Pageant.

For FFA members not directly involved in the convention program, several activities are planned. A major attraction is the AGRICULTURAL CAREER SHOW, now in its tenth year, featuring educational exhibits from many agricultural trade associations and professional societies. The exhibits illustrate the hundreds of career opportunities available today in agriculture. Trade association personnel are on hand to answer questions and discuss career opportunities. FFA members will also be offered educational tours to agricultural business and indsutry in the Kansas City area.

National livestock and animal products judging contests, a mechanics contest and a horticulture contest get under way on Wednesday as outstanding FFA contest teams from almost every state in the nation compete for top national honors. This year 276 three and four member teams will compete in one of seven contests which include: agricultural mechanics, dairy cattle, milk quality and dairy foods, livestock, poultry, horticulture and meats. Contests are sponsored by individuals, business, industry and trade associations through the National FFA Foundation, Inc. which provides administrative, award and travel funds. The contests are an annual event held in cooperation with the American Royal Livestock and Horse Show which provides the animals. Winners of the judging contests are announced at a Friday morning session of the convention.

Business sessions will be conducted daily. Major business this year includes a proposed amendment to the National FFA Constitution which would increase the number of voting delegates each state is entitled to send to the convention. Delegates will also discuss and vote on a proposed change in Alumni membership and on several other minor constitutional issues.

The official opening of the 48th National FFA Convention will be on Wednesday morning (Novemebr 12) when National FFA President Alpha Trivette gives the official call to order for the first convention session. During the morning session, convention participants will be welcomed to Kansas City by Mayor Charles Wheeler. A multi-media presentation will tell how FFA chapters can "Celebrate 76" by participating in FFA activities and using the FFA theme for 1976 - "A Future For America." The morning's activities will conclude with an address by former Georgia Governor Jimmy Carter, a large farmer and one time FFA member.

At the Wednesday afternoon business session, 309 FFA chapters will be recognized for outstanding achievement in the FFA Chapter Award Program. The Chapter Award recognizes FFA chapters for participation in 11 major areas of activity and this year will award bronze emblems to 75 chapters, silver emblems to 111 chapters and gold emblems to 123 chapters.

Wednesday evening's program will feature the speeches of four regional winners of the FFA Public Speaking Contest. Judges will score each of the four speakers and select the winner of the $300 National FFA Public Speaking Contest award sponsored by the National FFA Foundation, Inc. During the evening session five men will receive the FFA's VIP Citation for their continuing dedicated service to the National FFA Organization. They are: Bert L. Brown, Olympia, Washington; M. A. Fields, Petersburg, Virginia; Leo Knuti, Seal Beach, California, Cola D. Watson, South Hero, Vermont, and Warren G. Weiler, Worthington, Ohio. Guest speaker for the Wednesday evening session will be Johnny Bench, All Star Catcher for the Cincinnati Reds.

Distinguished Service Awards will be presented on Thursday morning to 29 men and women who have contributed their time and efforts to the success of the FFA. In addition 76 FFA members will be presented awards for outstanding

New Berks ag. center pulls it all together

By Pat Bradley
Berks Co. Correspondent

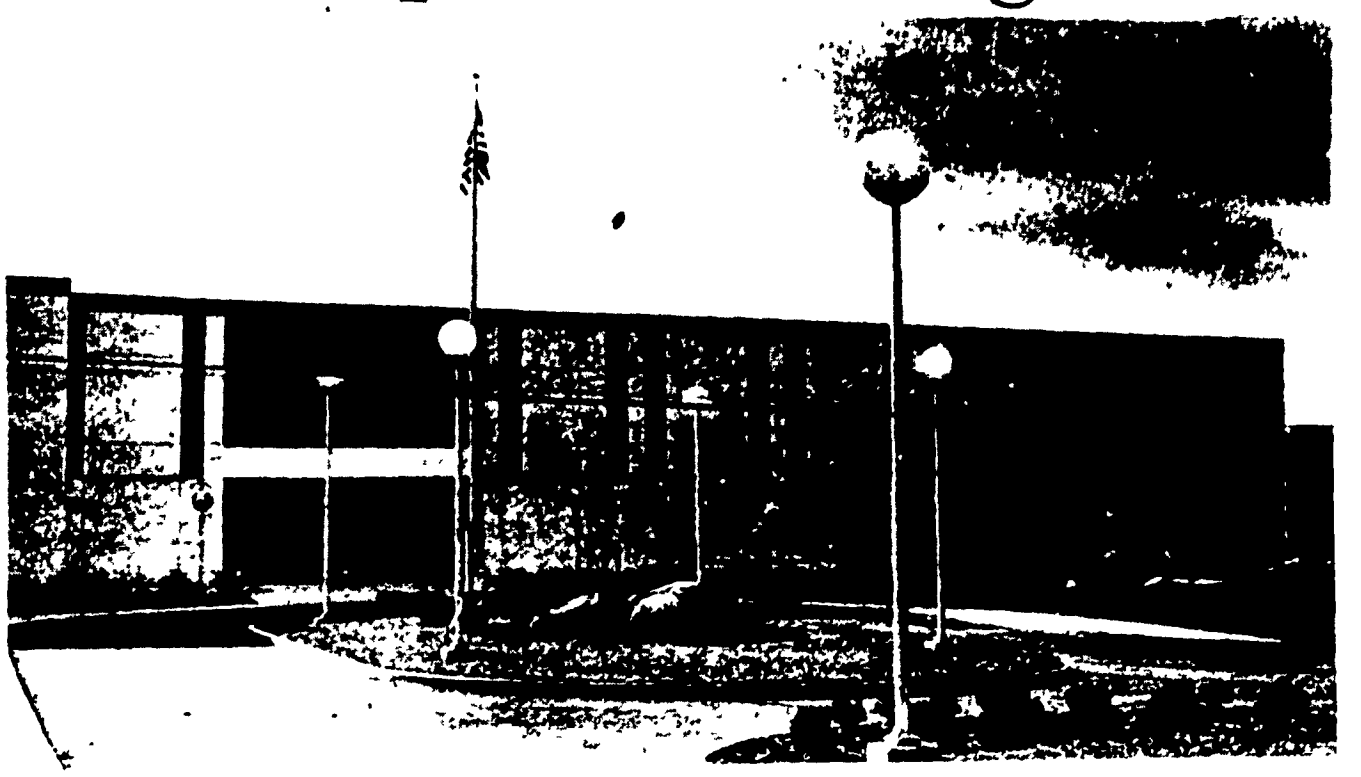
The formal dedication of the Berks County Agriculture Center was a big event on Oct. 30, 1974. It was attended by businessmen, political leaders and farm organization leaders.

But, that was last year. This year there was no celebration on Oct. 30. It was just "business as usual," according to Herbert Wetzel, associate county agent. And so it was during this reporter's visit.

There are five ag-related agencies located in the building — the Berks County Cooperative Extension Service, the Berks Conservation District, the Farmers Home Administration and the Soil Conservation Service.

The advantages of having all these agencies in the same building are many. First, it is easy for people to transact their ag-related business. The consensus of opinion among the agencies' employees was that more people have come to the building than did when most of the agencies were located in the Reading Court House.

The second advantage is that the different agencies can work with each other more easily. The closeness has a definite advantage, according to Albert Trexler, executive assistant for the Berks County Conservation District. Trexler is especially pleased with his office. The reason being that the Conservation District had no base of operation before its present office. Trexler would either work out of his car or anywhere that he could find an empty desk.



The spacious Berks County Ag Center, now one year old, offers farmers "one-stop" services and allows inter-related offices to work together more closely. Another advantage of the Center is the huge parking lot. And unlike at the Reading Court House, where the ag offices were formerly located, parking is free here.

Ralph Horst, assistant county superintendent for the Farmers Home Administration agrees that the new location has facilitated business, and he particularly likes the large parking area.

The new location of the Center has definitely opened communications between the agencies as well as with the farm public. Although there has been an increase in the number of farmers coming into the center, there has been a decrease of urban residents stopping in "just to talk." But, according to Wetzel, urban residents have kept in contact with the Center either by phone or through the mail.

The other facilities of the Center include several conference rooms, an equipped kitchen - for home economics and their related demonstrations, and an auditorium with a seating capacity of 300. These rooms are used almost daily and offer another benefit for farm related groups.

Even though there was no "birthday" celebration for the Ag-Center, its many advantages are appreciated by its employees and members of the farm community.

PCA-FBLA directors named at annual meeting

By Melissa Piper

LANCASTER - Four area farmers were re-elected as directors of the Federal Land Bank and Lancaster Production Credit boards during a meeting held here Nov. 5.

Richard B. Lefever, Quarryville R1 and Samuel [illegible] directors of the Federal Land Bank Association, while Elvin Hess, Jr., Strasburg and Jay Rohrer, Manheim were selected to return to positions on the Lancaster Production Credit Association board.

The elections were held in conjunction with the annual dinner meeting of the two organizations.

Jacob Smith, president of the Federal Land Bank Association gave the organization's annual report and noted that the FBLA had seen a steady increase over the year.

"Times," "have been good and this is noted on the bond market."

"Investors are seeing agriculture as a strong and good investment."

Smith explained that the Land Bank has seen 32.2 percent increase in the past three years.

Following Smith's address, John Long, president of the Lancaster Production Credit Association gave a short report on the organization's work through the year.

"Farm costs have gone up," Long related, "and this has caused our volume of loans to increase." He thanked the members of the group for putting their faith in the production credit association to help in their farming situations.

Brown Gives Manager's Report

Carl Brown, general manager of the Lancaster Production Credit office, gave the manager's report for the year and told the members and guests that there will be a great demand for money in the next five to ten years.

"Now is the time to plan for future needs," he stated, "you shouldn't wait too long as the market will be getting tight."

Brown noted that in the near future, agriculture would be competing with industry for money required for operating costs.

"By 1985 the demand for money by industry will be $4.5 trillion dollars." Brown explained, "that will certainly crowd agriculture's share."

The manager continued his talk by relating the importance of "getting things into perspective now and planning for the future."

The keynote speakers for the day were Mr. and Mrs. Samuel Williams, Middletown who had been volunteer agricultural consulatans to India.

Mr. Williams was a former director of the Federal Land Bank. The William's spoke about the agricultural practices in India and noted the need for conservation and increased food production.

Wilmer Campbell, representing Dauphin County, served as toastmaster for the program which was held at the Plain and Fancy Restaurant.

Mr. and Mrs. Samuel B. Williams, Middletown, were the keynote speakers at the annual Lancaster Production Credit and Federal Land Bank Association meeting held Nov. 5. Carl Brown (right) general manager of the PCA is shown looking over the program with the Williams.

Hereford record set

KANSAS CITY, Mo. - TT McK Arthur RW8, has set a new record for points gained by the progeny of a sire in the feedlot and carcass evaluation phase of the American Hereford Association's Total Performance Records program, according to an announcement by AHA officials in Kansas City.

The bull was tested by owner Gene and Chuck Schroeder, Schroeder Cattle Company, Palisade, Nb., and Harold Thompson, TT Herefords, Connell, Wa. An interest in TT McK Arthur RW8 has been recently purchased by Randy Ward, Ward Ranches, McAlester, Ok., and although no price figure was released, it was confirmed to have placed a six-figure evaluation on the bull.

TT ,cK Arthur RW8, gained 170 points on eight head tested under TPR supervision in the Masters Feedlot at Hooker, Ok., with complete carcass information being gathered at National Packing Co., Liberal, Ks., by AHA personnel.

Latrobe man sentenced

WASHINGTON - The U.S. Department of Agriculture (USDA) announced the sentencing of a Latrobe, Pa. man in U.S. District Court, Pittsburgh, for violation of the Federal Meat Inspection Act.

Robert W. Stinson, a meat manager for Skatell Markets, Inc., was given a on-year suspended sentence, placed on probation for nine months, and fined $100.

Stinson was sentenced after pleading guilty to one count of selling and offering for sale 2,600 pounds of uninspected boneless beef in September 1974 at Skatell's Depot Steer Market in Latrobe.

The investigation was conducted by the Office of Investigation, USDA.

Vegetable conference planned

Innovations in vegetable and small fruit production - including new concepts in disease and weed control, fertilizer use, and mechanical harvesting - will be featured at the annual Vegetable Conference scheduled for Debruary 9-11 on The Pennsylvania State University's main campus.

"Topics will be of interest to commercial vegetable growers, food processing company fieldmen, and allied industry personnel," said Professor Robert F. Fletcher, Penn State Extension vegetable crops specialist and conference chairman.

The program is ebing developed by representatives of the Pennsylvania Vegetable Growers Association, Pennsylvania Food Processors Association, and Penn State's Department of Horticulture. Co-chairman of the conference is Professor C. J. Noll, of the Penn State Department of Horticulture.

All educational sessions will be held, as in the past, in the J. O. Keller Building, Professor Fletcher points out. On February 11, all topics will deal with tomato production and mechanization.

According to Mr. Fletcher, additional program details will be announced when they are completed.

Thoughts in Passing

A Future For America
Arba Henry
Ag Instructor
Solanco H.S.

November 11 - 14th are very important days during the F.F.A. year, for these are the dates of the National F.F.A. Convention.

For 48 years now, F.F.A. members have been gathering in Kansas City, Missouri to compete in judging contests, set F.F.A. policy, and meet new friends. From the approximate 3,000 members who attended the first convention to over the 17,000 who attended last year, it is a time, a place, and an event which one will long remember.

A feature of the Convention is a display of agricultural career exploration booths. Here is found a wealth of information about a great number of agricultural occupations. Each booth is manned by representatives of trade associations and national organizations who stand ready to answer any questions pertaining to their particular field.

Several interesting educational tours of midwest agribusinesses have been scheduled throughout the week. Other places of interest to many include the Truman Library, Agricultural Hall of Famr, and the Truman Sports Complex.

Special Convention highlights will include competition in the National Judging Contests, National Public Speaking Contest, Conferrring American Farmer Degrees, naming of Star Farmer and Star Agribusinessman of America, plus many other awards and business session events.

Some 30 members and advisors from Lancaster County will be attending the Convention this year. In most cases the students have earned this opportunity because they got involved in their local chapter's activities and participation in judgind contests. In some instances this may have caused some sacrifices at home or work by you, the parents or employer.

With the type of leadership, citizenship, and enthusiasm which will be exhibited during Convention Week, it will demonstrate and emphasize that these young men and women are establishing A Future For America.

Consider for a moment what a hybrid like G-4444 means to hybrids comin down the road

For we took the strongest characteristics of this world record holder and bred them into our new, improved hybrids

Hybrids like G-4321 that beat out ol reliable 4444 in some areas of the country And G-4949A that produced another record yield of 303 6 bu/acre in the FFA Yield Challenge Program last year

Now, no one knows better than you that there s a lot of stress a crop has to overcome Disease, insects, weather Luck

Point is, if a hybrid can survive, and come through with a world record yield of 306 6 bu/acre like G-4444, it must have something going for it

And since we re breeding that something into our family, sooner or later it s gonna end up helping your family

So maybe you didn t think the world record yield held by G-4444 meant much But just remember, one good hybrid leads to another And another And another

Taking a new stand

Becker honored

Dr. Clare A. Becker, professor of agricultural business management at Penn State University, received the distinguished service award of the Pennsylvania Association of Farmer Cooperatives October 22 at University Park. The occasion was the annual banquet of the association.

During his career, Becker has carried out a major teaching and research effort in the area of farmer cooperatives. He was cited at the honor banquet for "assisting greatly the farmer cooperatives of Pennsylvania in areas of business management and policy during his 28 years on the College of Agriculture faculty."

"We welcome this opportunity to express our deep appreciation and gratitude for your sincere interest, good council, helpful instruction, and genuine friendship which you have shared with us over many years. We wish you well in your continuing efforts toward the betterment of rural life and the agricultural industry," stated Edward J. Hartnett of Harrisburg, president of the association.

Clare A. Becker

LEARN TO BREED YOUR OWN COWS

Sire Power and its member cooperative, Northeastern Breeders Assn. will sponsor a "do-it-yourself" Direct Herd A I. Training School during the week of

Nov. 24-28, excluding Thanksgiving Day
AT Leesport, PA

If you want to breed your own cows, Sire Power will train you. This school provides complete training in livestock breeding. Following completion you will be able to breed your own cows. You will also gain valuable knowledge in reproduction, fertility and sire selection.

The four day classes include live cow insemination practice, which is essential to develop sufficient skill for this modern procedure. The Sire Power breeding schools have been very successful and you will receive guidance from qualified instructors.

The total cost is $100.00 A $25.00 deposit is required with the attached form. Hurry, deadline is Nov. 20, 1975.

Name _____ Phone _____

Address _____ Herd Size _____

☐Please send full information about the Sire Power A I Training School

☐I plan to attend the A I Training course at Leesport, Pa My $25 00 deposit is enclosed

☐I am not interested in attending a school, but am interested in purchasing a semen tank, inseminating supplies and/or semen

Return this form to Sire Power, Inc. RD2, Tunkhannock, PA 18657.

Ag yearbook published

WASHINGTON — Contributions to consumers made by the Nation's state agricultural experiment stations - ranging from the discovery of vitamins to the creation of hybrid corn - are featured in the 1975 Yearbook of Agriculture, "That We May Eat", published recently.

This year the stations celebrate their hundredth anniversary.

The Yearbook is written in a popular style. Consumers, students, and the general public will find this an easy book to read. It will give them an insight into the fascinating search for ways to help increase food and fiber supplies and provide a better life for consumers.

As a striking example of the payoff from agricultural research, Secretary of Agriculture Earl L. Butz in his foreword to the Yearbook cites the development of a vaccine to keep poultry healthy and add to consumer meat supplies. He notes that the estimated worldwide economic value of just this one piece of research on Newcastle Disease, at the Virginia Agricultural Experiment Station, is $1 billion.

"You are directly helped in many ways by agricultural research," the Secretary writes. "The experiment stations had a hand in developing today's meaty, tasty, economical chicken. Their research made possible the fried chicken that you eat at the neighborhood fast-food establishments."

Experiment stations "controlled hog cholera which used to destroy millions of pounds of pork each year," Secretary Butz' foreword continues. "They curbed the wheat rust epidemics that threatened to wipe out wheat - and bread.

"They devised new ways to irrigate dry parts of the country so that we could have larger, more economical supplies of food and fibers . . .

"Agricultural scientists even discovered dicumarol to control blood clots in humans, streptomycin to treat TB and other diseases, and they discovered the significance of amino acids in your diets.

"Scientists also played a star role in stopping the corn blight of 1970 - the most destructive disease ever to hit corn. It killed off 15 percent of our huge corn crop that year . . .

"The miracles are so commonplace we can't report them all!"

A copy of "That We May Eat", the 1975 Yearbook of Agriculture, may be obtainec for $7.30 at government bookstores or by mailing a check or money order payable to the Superintendent of Documents and addressed to Superintendent of Documents, Government Printing Office, Washington, D.C. 20402. In addition, each member of Congress has a limited number of copies for free distribution to constituents.

The Agriculture Department produced the book but has no copies for public distribution or sale.

Connecticut founded the Nation's first state agricultural experiment station at New Haven in 1875, and was followed soon after by California. Today every State has a station, and some States have two stations. Since 1888 Congress has appropriated money for agricultural research, with States matching the money.

Chapter authors in the new Yearbook are from experiment stations for the most part, and so are members of the committee that planned the 400-page hardbound book. The book covers ongoing research as well as past successes. It includes a 32-page photo section in full color. Elsewhere in the book are 220 black and white photos.

Area soybean crop evaluated

By Dieter Krieg

Wet weather in late October caused a delay in this year's soybean and corn harvests, but the recent warm, sunny days have turned the situation around completely. The combines and pickers are frantically at work - gathering a crop which is considered to be "very good."

John Smith, extension agent in York County, reported late last month that soybean fields in his territory looked about as good as "any we've had," with an average early yeild of 35 bushels per acre shaping up.

Arnold Lueck of the Lancaster County extension service noted the past season has been "good" and "favorable" in his area, if not ideal. The only real problem reported by him and others last week was that harvesting conditions were too wet to get much done. Consequently, the corn harvest was lagging by as much as two weeks and combining of soybeans was barely started.

Over in Chester County the harvests are also behind schedule - again due to the wet weather which prevailed over most of Pennsylvania during much of October. Bob Hood of the White Horse Grain Company noted that the combining of soybeans had been going on since mid-October, but the pace was so slow that the overall conclusion had to be: "there's practically nothing started in our area."

Since then things have changed dramatically, as the corn harvest pushed past the halfway mark. A week earlier it had been estimated that about 70 per cent of the crop was still in the field in Chester County, and almost that much in York and Lancaster Counties.

Soybeans stands, for the most part, look good. Smith remarked that a few York County fields "weren't as good as we'd like to see because the heavy rains during the planting season washed them our right after planting." Weed control could also have been better, he added, explaining that this condition was also sue to the weather.

Sperry NH creates new post

Caspar R. Ordal, vice president and general manager of Sperry New Holland's Latin America - Far East Division, has been named to the company's new position of vice president for worldwide government relations.

Ausmus S. Marburger, presently vice president and general manager of Sperry New Holland's European Division, will return to New Holland from Belgium to head the Latin America - Far East Division.

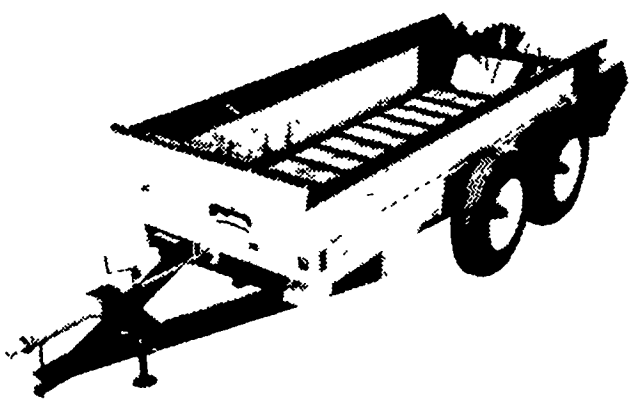
New Idea's Manure Spreaders

Giant 318-Bushel New Idea Spreader



Gets the big jobs done fast

You'll be amazed at how fast the job goes when you've got a big 318-bushel New Idea PTO Single Beater spreader. You'll be pleased with its ruggedness. And the way it handles.

2-Year Extended Warranty You'll also like the Extra Heavy Duty Conveyor Chain with its 20,000 pound tensile strength . . . so strong that it's backed by a full 2-year warranty. And it's standard on this model!

Warranty On Wood Only New Idea has it . . . a warranty that not only provides free replacement of any wood components in the unlikely event that they may some day rot through, but it also pays the freight and labor, as well. And, of course, there's New Idea's factory warranty on the rest of the machine! Come on in and compare prices. You'll buy New Idea!

Ag official says grain agreement essential

"The only person in the food production chain whose neck is out all the way is the farmer. That's why the Russian grain agreement is so essential," Kenneth E. Frick, Administrator of the Department of Agriculture's Agricultural Stabilization and Conservation Service (ASCS), told Pennsylvania ASCS officials gathered for a meeting recently in Champion, Pennsylvania. "The certainty of Russian purchases will be a plus for both the farmer and the consumer," Frick said, "because it will promote efficient agricultural production. The U.S.S.R. has become a guaranteed market the farmer can plan and plant for."

Continuing on the conference theme of International Trade - The Key to Prosperity, Edward D. Hews, Director of the ASCS Eastern Region, emphasized the need to get food moving into export channels. "Over the next 25 years world population will double," he said. "It is essential for American agriculture to meet the challenge of a hungry world by likewise increasing production and focusing on the world market."

Both Frick and Hews termed rural development and conservation important in achieving efficient crop production. Frick said - government cost-share funds are spent to improve and correct conservation deficiencies in rural areas.

Conference participants (farmer-elected ASC county committeemen, county office staffers and State personnel) also attended workshops covering the current trends in conservation, crop disaster insurance and farm markets.

Paul H. Keeney, Chairman of the Berks County ASC Committee; Mark S. Balthaser and Donald E. Lutz, committee members; Henry E. Bohn, Sr., ASCS County Executive Director; and Dianne F. Younker & Janice E. Miller, program assistants, attended the two-day conference.

Torgenson named director

WASHINGTON — Secretary of Agriculture Earl L. Butz recently announced the appointment of Dr. Randall E. Torgerson as administrator of Farmer Cooperative Service (FCS).

Dr. Torgerson had been serving as staff economist to the administrator of Agricultural Marketing Service, U.S. Department of Agriculture, since January 1974 on a special assignment from the University of Missouri. He succeeds Dr. Ronald D. Knutson, who resigned in August to become professor of agricultural policy and marketing at Texas A&M University.

As administrator of FCS, Dr. Torgerson will direct the research and technical assistance efforts of 60 agricultural economists and cooperative specialists. FCS programs are designed to increase the efficiency of the nation's 7,700 farmer - owned cooperatives involved in the production and marketing of the nation's food and fiber. These cooperatives have about 6 million members (many farmers are a member of more than one cooperative) and have a combined annual business volume in excess of $22 billion.

Dr. Torgerson is the author of numerous articles and two books related to farmer cooperatives. As an associate professor at the University of Missouri - Columbia, he taught cooperative business organizations, management programs of cooperative firms, and economics of collective action in agriculture.

He served as executive secretary of the Missouri Institute of Cooperatives, 1969-73, and as executive secretary of the Graduate Institute of Cooperative Leadership, University of Missouri, 1971-74. His father, Truman Torgerson, is general manager of Lake to Lake Dairy Cooperative, Manitowoc, Wis., a cooperative whose annual sales approach $60 million.

Dr. Torgerson, 36, native of Wisconsin, earned a bachelor degree from the University of Minnesota and master's and doctor's degrees from the University of Wisconsin, all in agricultural economics. He attended the Swedish Center for Cooperative Development in 1962-63 and was a Fulbright Graduate Fellow at the Agricultural College of Norway in 1965-66.

His book, "Producer Power at the Bargaining Table: A Case Study of Legislative Life of S.109," was winner of the 1970 Curators' Publication Award at the University of Missouri. He also authored "Farm Bargaining," a description of this farmer activity in Norway and Sweden.

He is married to the former Susan Grace Grundahl. They have one son, Knut Everett, age 3.

Ag enrollment leaping

Enrollment in the University of Delaware's College of Agricultural Sciences had taken another big leap. According to Associate Dean for Instruction, Dr. Ralph Barwick, registration in the college is up 17 percent from 1974. This is the second year in a row to see such rapid growth. In 1974 enrollment increased by 16 percent.

The College of Agriculture is now one of the fastest growing divisions of the University, Barwick says Ten years ago there were only 325 students in the college. This fall there are 937. An interesting part of the growth phenomenon is the increase in the number of women studying agricultural subjects. They now make up 33 percent of the student population

Delaware is only one of many agricultural colleges across the country new experienceing rapid expansion. Barwick attributes the sudden populatiry of agriculture on campus to its new image. There is a growing recognition that the field includes not only farming but the whole range of agribusiness - the processing and marketing of food and agricultural products, a burgeoning ornamental horticulture industry, environmental control, agricultural mechanics, the handling of laboratory animals for all kinds of research and a multitude of other job areas that call for the special knowledge and skills that can be acquired through the study of agricultural science.

Large fruit supplies will decrease price

WASHINGTON — With large fresh and processed fruit supplies anticipated in 1975-76, prices at all levels are expected to decline through early winter. However, as the economy strengthens, consumer demand for fresh and processed fruit is likely to increase, which might help offset some of the downward pressure on prices.

If the October 1 prospects are realized, U.S. citrus production for 1975-76 will be nearly as large as the record 1974-75 crop. The orange crop is expected to be smaller. Industry reports indicate that the lemon crop also is expected to be well below last year. But record large crops are forecast for grapefruit, tangerines, temples, and tangelos Noncitrus fruit tonnage is estimated 5 percent larger than last year's utilized levels The increase is due primarily to the larger apple and grape crops

The September index of prices received by growers for fresh and processed fruit increased moderately to 157 (1967 equals 100), up from 147 in August and 3 percent above the year-earlier level However, during the fourth quarter the index is expected to decline seasonally to a level slightly to moderately below a year ago as grower prices for fresh apples, pears, grapefruit, and tangerines move lower in response to increased supplies The retail fresh fruit price index, which declined moderately from August to September, is expected to continue down during the fourth quarter, but is still likely to average slightly above a year ago

In response to large supplies, wholesale prices of most processed non-citrus fruit items have weakened. The BLS September wholesale price indexes for both canned and dried fruit were slightly to moderately below year-earlier levels. Reflecting the decline in wholesale prices, retail prices of processed fruit, particularly canned noncitrus items, have also weakened, but are still moderately above last year's high level. However, as the economy strengthens during the months ahead, demand for processed fruit items could increase. Thus, the potentially larger demand combined with expected increases in marketing costs could dampen the downward pressure on retail prices during 1975-76.

The first forecast of U.S orange production for the 1975-76 season points to a crop 3 percent below last season's record Prospects are off in all producing areas except Texas In Florida, total orange production is placed at 172 million boxes, down 1 percent from the record crop last season. Early and mid-season varieties in Florida are up 1 percent, but this is more than offset by a decline of 4 percent in Florida Valencias In California, Navel and Valencia oranges are down 11 percent and 15 percent, respectively, from last season's output.

Demand for frozen concentrated and chilled orange juice, which has been very strong during 1974-75, is likely to continue to gain in 1975-76 Current prospects for oranges through this winter point to grower prices slightly higher than a year earlier, in view of lower carryover stocks of processed items, expected strong demand, plus a slightly smaller orange crop.

A record grapefruit crop is being forecast, up substantially from last season and somewhat above the previous high set in 1973-74. In the absence of strong processor demand and in view of the record crop in prospect, grower returns for grapefruit could be moderately below last year.

Shipping point f.o.b. prices for apples, grapes, and pears so far this season have generally been moderately to substantially lower than last year. Available supplies for fresh market sales are expected to be larger this season since crops are larger and processor demand is weaker due to the large carryover stocks of many processed noncitrus items. Consequently, f.o.b. prices for fresh noncitrus fruit are likely to continue moderately to substantially below year-earlier levels through this fall and early winter.

The 1975-76 pack of canned noncitrus fruit is running smaller than last season's large output However, even with a small reduction in expected pack, the total supply of canned fruit this season will still be large because of the size of canner stocks on hand at the beginning of the season. Supplies of dried fruit are also expected to be up while frozen fruit supplies could be below last season.

The deal for tree nuts is similar. Production of the four major edible tree nuts — almonds, filberts, pecans, and walnuts — is put at 465,000 tons, one-tenth above last year's utilized crop. Walnuts, filberts, and pecans are forecast much larger and more than offset the sizable decline in almond production.

Looking ahead for agriculture

Salute to farmers suggested

By James McHale
Pa. Secretary
of Agriculture

America's 200th birthday is drawing near and all segments of our society are getting ready to put their best traditional foot forward in celebration of the event

Agriculture should not be left out. American farmers played an important role in the development of this country and continue to perform wonders in keeping our hand strong at the bargaining table of the world market place.

It occurred to me some time back that American farmers, perhaps taken for granted by some in this country, no doubt have earned the admiration of their peers in other countries. The bicentennial year will mean a lot of travel in this country by foreign visitors. Many of those visitors will be especially interested in seeing any or all phases of American agriculture.

That is why I am extremely pleased that the National Association of State Departments of Agriculture (NASDA) at its annual convention Oct. 9 in Charleston, West Virginia, approved a resolution urging "the President of the United States, the Secretary of Agriculture, the United States Department of Commerce, and other related federal and state agencies to develop a bicentennial program honoring American agriculture and the part that it has played in feeding and clothing the world."

The resolution asks that a central location such as Washington, D. C., be established for this agricultural bicentennial program. The various state departments of agriculture, farm organizations and other agriculture interests would host visitors as they move around the country.

Arrangements can be made so that our guests can visit those states which have the types of farming which is of special interest to them. Some visitors will be interested in livestock and dairying, others may want to see America's famed wheat and corn belts, and still others may want to visit states like Florida, California and Texas where citrus fruits, vegetables and rice are the main products.

The NASDA resolution also requests that the United States Department of Commerce furnish funds to support these agricultural visits. All non-agricultural entertainment, transportation, hotel and other non-agricultural aspects of the visitors' program are expected to be paid for through travel agencies by individual visitors.

To explore the possibilities of federal financing where appropriate, I did write a letter to David N. Parker, deputy assistant secretary of commerce in the U. S. Department of Commerce.

I wrote that our Pennsylvania Department of Agriculture has been planning to host a World Reunion of Farmers during the 1976 bicentennial year. This plan led us to consult with other state agriculture departments to join us in hosting these visits by foreign agricultural men.

A bicentennial celebration that does not feature American farmers will surely be lacking.

In the 20th century farmers played an important role in feeding hungry people during and after World War I and World War II. We played a major role in providing food for the United Nations Relief and Rehabilitation Administration, the Marshall Plan, AID programs, Point Four Technical Assistance and Public Law 480 (Food for Peace).

Today, the average value of our agricultural exports stands at about 25 percent of the total. The significance of our agricultural exports tended to be overlooked until recent years when they became a means of balancing out trade deficits and paying for an increasingly high oil import bill.

Agriculture, therefore, not only feeds our people, but helps to heat their homes and fuel their cars.

In earlier times agriculture was the bedrock of our fledgling economy. In 1805 the average value of our agricultural exports was 75 percent. Perhaps that was to be expected from a largely agrarian economy.

Yet, by 1885, when the industrial revolution had visited these shores, the value of our farm exports averaged about 76 percent. American agriculture demonstrated a flexibility, depending first on tobacco and cotton to bolster exports and then on grain, beef and dairy products.

Our farming history is diverse, reflecting every stage of this country's growth. Let's hear about farmers during the bicentennial celebrations.

Maryland farm survey slated

The latest estimates of Maryland's primary crops, cattle, hogs and chickens on farms, the anticipated pig and calf population, and winter wheat planting in 1975 will hinge on a major nationwide survey set for November and early December by the USDA Statistical Reporting Service.

The project will be conducted here by the Maryland-Delaware Crop Reporting Service, a cooperative USDA-Maryland Department of Agriculture operation, which complies agriculture statistics for this bi-state responses are kept strictly confidential and that only state and national summaries are published.

A Maryland Department of Agriculture spokesman says that the estimates developed from this annual survey are utilized by producers, processors, planners and others in managing output and marketing operations. The information also helps maintain an orderly overall situation in agriculture.

Farmers around the state are urged to cooperate with the Crop Reporting Service in providing requested information. The national estimates will show how the American farmer, now no longer restricted by government regulations, will respond by way of fall wheat plantings, following an expected record crop in 1975, coupled with increased foreign demand for grains.

xxx

A general strode into a downtown office building elevator and barked, "Twelfth floor."

"But, sir," the operator murmured respectfully, "this building only has eight floors."

"Well, do the best you can," thundered the general.

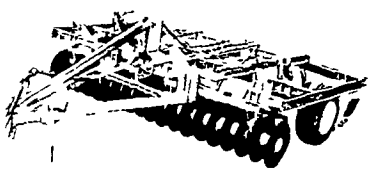
GLENCOE "SOIL SAVER"

A primary tillage tool allowing a different twist to soil management. The Glencoe "Soil Saver" mixes trash in a non-compacted, "Ridged" field that just naturally protects against erosion by wind and water. Designed so you can work your stubble immediately after harvest, generally without chopping or shredding, in one pass. And in Spring your fields will dry out and warm up earlier making a better seed bed.



TUESDAY, NOV. 18, 1975

M. M. WEAVER & SONS

N. GROFFDALE ROAD, LEOLA, PA.
(If unfavorable weather, come to Leola Memorial Hall at 2 P.M.)

REPRESENTING: **LELY—ROTERRA**

The secondary tillage tool designed to give you better crop starts, eliminate and combine tillage trips. Lely means less compaction, saves moisture and increases drainage, giving better weather and time flexability.

Come . . . See These Exciting Tools Work in the Fields

There will be an informative discussion and slide presentation each evening following these demonstrations to show how these two tools fit into your total soil management program. The object is to cut costs and increase yields by a comprehensive approach to soils management.

The evening meeting will be conducted by Don Schreifer, nationally prespected leader in soil fertility and tillage programs and director of Advanced Ag Associates.

MONDAY, NOV. 17, 1975 — **TIME 7:30 P.M.** — **TUESDAY, NOV. 18, 1975**

COCHRANVILLE FIRE HALL | LEOLA MEMORIAL BUILDING, NEXT TO FIRE HALL

Art display slated

The original artwork by Kes Jenkins and C. Richard Whitson used for the 1976 Bicentennial Calendars is being displayed during November in the following Farmers First Bank Offices:

Lititz - White Swan Hotel and Rock Ford, Home of Edward Hand.

Lancaster Shopping Center - President George Washington visiting Rock Ford.

Neffsville - Lutheran Church of the Holy Trinity, Lancaster.

Intercourse - Bangor Church and Two of the oldest existing mills.

Ephrata - Penna. Delegates to Congress and Home of Susannah Wright.

Lincoln - Ephrata Cloisters.

Marietta - George Ross and Women Produced the Cloth essential to the Revolutionary cause.

Ephrata North - Banners which appeared among the colonies.

During the month of January the entire collection will be shown in the Bridge Gallery in the Park City Office of Farmers First Bank.

Sulfur (S) is one of the many elements required for plant growth. It ranks in importance with nitrogen and phosphorous in the formation of protein. It is an integral component of certain vitamins and enzymes which are essential to life itself. In short, sulfur is an element without which plant and animal life as we know it would soon sease.

4-H dairy judging team places second at Ohio

Pennsylvania's 4-H Dairy Judging Team won second place at the National 4-H Dairy Cattle Judging Contest held recently in Columbus, Ohio.

Members of the judging team were: Richard Mellinger, Lancaster County, Strasburg R1; Dale Olver, Wayne County, R1, Honesdale; Judy Smith, Blair County, R3, Tyrone; and Cindy Rutter, York County, 53 Lightner Road, York.

In all, 140 4-H members from 35 states participated in the national contest. The team from Kentucky won first place.

The Pennsylvania team was coached by W. Paul Anderson, Extension dairy specialist at The Pennsylvania State University and David Norman, York County Extension agent.

In addition to scoring second place in the overall contest, the Pennsylvania 4-H Dairy Judging team scored first in judging Holsteins.

Richard Mellinger ranked as the third highest individual in the overall contest; first in the contest for giving all reasons, and second in giving oral reasons.

Dave Oliver ranked first in giving oral reasons.

Anderson says the contestants were required to judge Ayrshire, Brown Swiss, Guernsey, Holstein and Jersey breeds including a class of heifers and a class of cows in each breed.

Contestants justified their placings on each cow class with either oral or written reasons.

Some of the objectives of 4-H dairy projects are: to acquire information and understanding of dairy production practices and skill in executing them through the ownership and care of dairy animlas; to become aware of the scope of the dairy industry and its economic significance; to develop sportsmanship and leadership abilities; to develop an ability to speak in public through participation in related activities such as demonstration, tours, judging or exhibiting.

TM's ORTHO, CHEVRON DESIGN UNIPEL REG U.S. PAT OFF

Broadcast Ortho Unipels this fall

come spring, use just 50 pounds of Unipel Starter Special as a dry "pop-up"

If your aim is to practice high-yield, precision agriculture, you want more out of fall fertilization than just a head start on spring planting. To get it, you need a precision-made fertilizer.

Visit your Ortho dealer and check into UNIPELS. UNIPELS are uniform in analysis, shape, and density from pellet to pellet — not bag to bag or ton to ton . . . the kind of uniformity that delivers a balanced diet for every plant in the field.

UNIPELS contain both quick-acting and long-lasting forms of nitrogen and phosphate homogenized along potash in every single pellet. This means that UNIPELS, plowed down in the fall, will work for you all year 'round.

The same unmatched uniformity and high analysis enables corn growers to apply UNIPEL Starter Special next spring as a "dry pop-up" — right with the seed! With that kind of precision, all you'll need is 50 pounds per acre!

Get maximum value from your fertilizer investment this fall. See your Ortho dealer now, and learn the details on UNIPELS, the new All-Season Fertilizer.

MarylandABC-Sire Power open house attractslargecrowd

The Maryland ABC-Sire Power Open House held Oct. 16, 1975 at Frederick, Md. was a successful event. Over 700 people turned out to see the in-waiting sires, daughters of proven sires, and to meet the people who operate their cooperative.

The Annual Meeting of Maryland ABC was called to order at 10 o'clock a.m. by President Schnebly. After reading of the minutes, Treasurer & General Manger of Maryland ABC, W.L. Campbell gave the financial report. He commented on the strength of the cooperative. In a year that was financially uncertain for most businesses, Maryland ABC produced a substantial margin and is in a sound financial position.

Following the meeting, Professor M McCullough, a leading nutritional specialsit from the University of Georgia, spoke on "New Concepts in Feeding Dairy Cattle." He spoke on three major feeding aspects; intake, balancing a ration, and what you feed cows. He stated that there are many feeds on the market that will fill a cow. However, dairymen should strive to increase intake with feed that will add to production. He also stated that modern dairy rations should be formulated by a competent feed company or university because they have the facilities to do it more accurately to insure a completely balanced ration.

Following Prof. McCullough's very informative talk, the Maryland Dairy Shrine Club held their 12 Annual Meeting. Two dairy industry pioneers, John Conover and Wendell Arbuckle were honored.

John Conover served as Extension Dairy Specialist at the University of Maryland from 1922-1944. This was during the earlier days of Extension when it was very difficult to get acceptance of new and better methods and change the attitudes of farmers. His dedication to the service of farm people gained him the wide spread respect and fond rememberance of all those who knew him.

Wendell Arbuckle performed in an outstanding manner, his teaching, research and extension education responsibilities at the University of Maryland. His major research involved ice cream and the formulation of it to make it popular to the public. He also promoted and worked with other dairy products and dairy manufacturing plants. Dr. Arbuckle continues to be active, serving as Consulatant to several manufacturing firms.

Portraits of these two men will be placed in the Maryland Dairy Shrine Room along with other pioneers of the dairy industry.

Following the Dairy Shrine Meeting, Maryland Dairy Princess, Terry Leppo was introduced. She addressed the group on the benefits of milk. She said, "Milk drinkers make better lovers."

The luncheon entertainment by the "J.J.'s", two female folksingers, was enjoyed by all as was the barbequed chicken dinner.

Maryland ABC technician, Robert Pippin, was named Techinican of the Year at a brief awards program. He has bred cows for Maryland ABC since 1958 in the Lower Shore area. He had nearly 3,000 first services last year. Other technicians recognized were Sam Glisan, Russell Teets, Lewis Dixon, Albert Draper, and Warren Thompson.

Following the awards program, a parade of Sire Power bulls and daughters of Sire Power bulls was presented by J. Lloyd Ebersole, Director of Sire Development and Amon Grantham, Assistant Sire Analyst. Comments were made by satisfied owners of the daughters of A. I. Proven sires such as 9H120 MOSE, 9H121 Al, 9A076 ALBI and 9G084 DORAMOST.

After a most enjoyable day, members returned home more aware of how their cooperative works and its plans for the future.

Group members of the 1975 Dairy Tour sponsored by the Maryland ABC at the Maryland ABC Open House prior to leaving for a two day trip to leading dairy farms in Virginia, West Virginia, Maryland and Pa.

Egg voters reminded

The U.S. Department of Agriculture reminds eligible egg producers of the referendum Nov. 3-28 on the proposed nationwide research and promotion order for eggs, egg products, and spent fowl (laying hens no longer productive). Marked ballots must be received in Washington, D.C. no later than Nov. 28.

All eligible voters known to the Department have been mailed ballots and instructions. Any producer who has not received a ballot may obtain one by contacting a county office of USDA's Agricultural Stabilazation and Conservation Service, or from the Director, Poultry Division, Agricultural Marketing Service, USDA, Washington, D.C. 20250.

An official with the AMS Poultry Division said that flock owners in all states except Hawaii and Alaska who had, at any time between June 1 and Aug. 31, 1975, more than 3,000 laying hens producing eggs for commercial use, and who are now engaged in egg production are eligible to vote. Flock owners whose output is used primarily for hatching purposes are not eligible to vote.

Ayrshires complete records

In the herd of Milton M. Brubaker, Spruce Villa Farm, Lititz, Pennsylvania, a five-year old registered Ayrshire cow named Ayrwen Royal Priscilla has completed an official milk production record of 16,560 pounds, with 683 pounds of butterfat, on twice daily milking for 305-day DHIR testing period. This record is one of many being made by an increasing number of registered Ayrshires on the Ayrshire Breeders' Association official DHIR testing program.

Priscilla's record is 1⅝ times the national average for all dairy cows The Ayrshire breed is noted for persistent, profitable production of nutritious, quality milk.

Also in the herd are the following cows and their records· Monica Royal Anna. Age J-3; Milk 12,980; Fat 537; Times Nat. Average 1¼

Trees grown in pots do best as seedlings

Trees do right well when "potted," according to 10 years of experiments at The Pennsylvania State University. In recent years, the growing of Christmas trees in tiny pots for later transplanting has become big business. In 1973, for example, about 26 million seedling trees in the United States were grown in small pots much like flowers and vegetables. In 1974, an estimated 42 million container-grown trees were produced in the Pacific Northwest alone.

Such containers, often made of paper or plastic, reduce the shock occurring when seedling trees are transplanted as bare-rooted nursery stock. This improves the first and second year growth in field plantings, says Edgar H. Palpant of the Agricultural Experiment Station at Penn State.

Palpant believes the container systems compete costwise with the older nursery system using bare-rooted seedlings. He favors the new systems, especially when superior genetic seeds are planted. Idaho Douglas fir seeds, for example, are producing plants that may be 15 inches tall by the end of the first growing season, growth he terms excellent. Palpant is research assistant in forest genetics at Penn State.

In the 1975 genetic studies, Scotch pines planted one tree per pot — and grown with an undisturbed ball of soil — averaged 72 per cent taller than trees grown 4 and 5 per pot or grown in a nursery and transplanted with bare roots. The plastic or paper pots are 3 to 4 square inches in size.

One containerized system features paper pots developed in Japan. Another system uses semi-translucent plastic pots. Known as the "book planter system," the latter has advantages of providing easy removal of the plant and its miniature ball of roots and soil. The "book planter," so named since its sides open like a book, is best for species such as Douglas fir which grow poorly under wet conditions in paper pots.

Survival of seedlings in the latest study averaged nearly 100 per cent — much better than for bare-rooted seedlings on poor sites. Palpant indicated the new container systems can produce quality seedlings in nearly half the time required with the older bare-rooted system. But he said the new technique involves more than containers. Proper light, soil conditions, moisture, and nutrients are vital.

"Of course it is essential that seed of proper genetic and physical properties be used. Otherwise, the best greenhouse or nursery cultural techniques can not overcome the major deficiencies of poor sites and lack of genetic quality," he affirmed.

Two different soil mixtures were used for seed planted March 18, 1975. One mix consisted of peat and vermiculite. The other used decomposed leaf litter and perlite. The seed was treated with a fungicide and then treated weekly with a liquid fertilizer, 9-45-15, for about a month. Then the treatments were shifted to a 30-10-10 fertilizer. Since July the seedlings have been treated weekly with ammonium sulfate.

Seedlings available in Berks Co. area

Landowners of Berks County are reminded that now is a good time to plan for tree planting in the Spring of 1976. The Glatfelter Pulp Wood Company, Spring Grove, Pennsylvania, will share on a 50-50 basis the cost of seedlings with interested landowners.

Since the inception of the Glatfelter program in 1951, more than 15½ million seedlings have been furnished to landowners in 13 southcentral Pennsylvania counties.

Tree seedlings available this year are white pine, red pine, Austrian pine, Virginia pine, pitch pine, Norway Spruce, white Spruce, Japanese larch, black locust and Eurpoean alder. Orders are filled on a first-come, first serve basis so it is important to get orders in early.

All seedlings are furnished by the Pennsylvania Department of Environmental Resources. The Glatfelter Company imposes no restrictions of any kind, but landowners planting these threes must comply with state regulations covering these seedlings.

If you are a landowner in this county who would like to plant tree seedlings in 1976, act now! To obtain information on placing your order stop at your County Agricultural Extension office located at Cooperative Extension Service Berks County Agricultural Center Leesport, Pa. 19533.

FFA chapters

(Continued from Page 1)

Stevens; and Ron Zimmerman, son of Mr. and Mrs. John Zimmerman, Ephrata.

Felpel will be competing for national honors in the ag mechanics program after having won the North Atlantic Mechanics honor in the FFA program.

The Cloister FFA will be receiving three national awards which will include a gold emblem award for chapter activities; a silver emblem for chapter safety activities and a bronze emblem for the Building Our American Communities award.

Also making the trip will be Rick Pfautz who will be receiving the American Farmer Degree.

Two of the FFA'ers from Ephrata High School will be attending the conference as a portion of the State poultry judging team. Steve Strauss and John Weiler will be competing for honors in Kansas City when the national poultry judging contest is held.

Ronald Martin, also a Cloister FFA'er will be competing on the milk quality and dairy foods judging team. Ernest Orr is the coach and advisor for the youths.

Penn Manor to Travel West

Several students from Penn Manor High School will be making the trip to Kansas City also. Doug Riexinger, son of Mr. and Mrs. Charles Riexinger, Lancaster, will be competing on the livestock judging team along with Galen Long. Galen is the son of Mr. and Mrs. Howard Long, Columbia.

Robert Bachman, son of Mr. and Mrs. Frank Bachman, Washington Boro will make up the third member of the state poultry team and will be joining forces with the two members from Ephrata. This makes the state poultry team consist of members from Lancaster County exclusively.

A senior at Penn Manor, Ron Hunt, son of Mr. and Mrs. Clyde Hunt, Millersville, will be competing in the national livestock showmanship contest during the event in Kansas City.

Greg Landis, son of Mr. and Mrs. Jay Landis, Millersville, will be receiving his national American Farming Degree and will be vying for a national office. Greg graduated from Penn Manor in 1972.

Solanco Receives BOAC Award

The Solanco FFA Chapter will be receiving a bronze emblem for their community projects under the Building Our American Community program. Serving the Solanco area three years consecutivcly by preserving pheasants for wildlife, the chapter will be receiving the national honor sponsored by the Lily Endowment Inc., Farmer's Home Administration and the National FFA Foundation. The award will be presented at a dinner meeting on Thursday, Nov. 13.

Warren Schmuck, son of Dr. and Mrs. Larry Schmuck, Peach Bottom, will be judging on the milk products team combining his efforts with the Ephrata youth in the same category.

Grassland Represented by Officers

Grassland FFA from Garden Spot High School, will be represented at the National Convention by two state officers. Lloyd Hoover, Leola, the state vice president, will be attending the event with Don Weaver, New Holland, the regional fice president for the state.

Gary Stauffer, New Holland, will be receiving his American Farming Degree at the convention. Gary graduated from Garden Spot in 1972 and is employed by M. M. Weaver's.

The Grassland Chapter will be receiving a gold emblem for their outstanding FFA activities throughout last year.

A special distinguished service award will be presented to the principal of Garden Spot High School, Donald Schaffer. Schaffer's outstanding work will be noted at a dinner meeting.

Members of the Cloister FFA Chapter at Ephrata High School who will be traveling to the National FFA Convention this week are (from left) Clifford Martin, Calvin Sauder and Ron Zimmerman. (Standing) Gerald Good, Harry Leininger, Jay Gerhart and James Felpel.

Along with their trip to Kansas City for the FFA event, the youths and their advisors will be sightseeing along the way. Side trips have been scheduled to the Indianapolis Motor Speedway and Museum and agricultural centers and farms along the way.

Each chapter and students has worked for 12 months in order to participate in the judging events. Those receiving higher degrees have put in long hours of work and participated in numerous events to be awarded national honors. And team work has been the by-word of the chapters who will be receiving honors for their community service and chapter activities.

Shepherds plan for expansion

DENVER, Colo. - Directors attending the semi-annual meeting of the American Sheep Producers Council here unanimously endorsed the Blueprint for Expansion program as a 10-year master plan to rebuild the industry.

The intensified effort to halt the decline in sheep numbers was spearheaded by Howard Derrick, Council president.

"We're about to stop the decline and start the serious job of rebuilding," he told the 41 directors at the two-day meeting, October 23-24, at the Cosmopolitan Hotel.

One positive sign is that an increasing number of producers are withholding more ewe lambs and getting better prices for older ewes.

"I foresee the time when our industry will have it all together," Derrick said, nothing

"We're well on our way with the help and understanding of the National Wool Growers Association, the National Lamb Feeders Association, the Council, the Sheep Industry Development Program, and farm flock representatives.

"Self-determination as an industry," Derrick emphasized, "is the first step." He said that we can no longer speak with many mouths, but rather we must speak in one loud voice.

He singled out the Blueprint for Expansion as "one of the most important projects we can support. Unless we stop the decline in sheep numbers, all our efforts otherwise are futile."

Details of those plans are being developed now and will be outlined at the National Wool Growers Association annual meeting in Wichita, Kans., Jan. 26-29.

In 1960, some 768 million pounds of lamb and 150 million pounds of clean wool were available to consumers. Now, those numbers are reduced to 400 million pounds of lamb and 60 million pounds of wool.

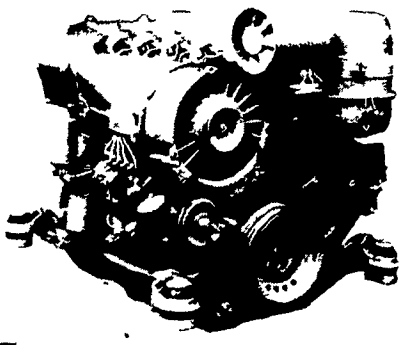
Jane Alexander helps honor Lebanon Area Fair group

MT ZION - Mrs. Jane Alexander, deputy secretary of agriculture for Pennsylvania, was the guest speaker at a dinner on Nov. 3 to honor members of the Lebanon Area Fair committee.

Held at the Zoar's Lutheran Church banquet hall, the affair was organized by the Lebanon Valley Exposition Corporation. Miss Alexander joined Expo Corporation president, Jerome Hutter, in offering congratulatory remarks and praised the success of the fair in general. She especially noted the progress in growth and facilities.

In her remarks the deputy secretary suggested that an arts and crafts division to the fair may improve it even more by attracting greater participation and interest from people more than 30 years of age.

COST



CUTTER

The cost of diesel fuel has jumped nearly 70%, since October 1973 and it's still about three cents a gallon cheaper than gasoline. Higher fuel costs call for a closer look at total operating costs when you buy engines. Deutz air-cooled engines use 20 to 40% less fuel than most water-cooled diesel engines—far less than gasoline engines. And they are competitively priced. So hadn't you better buy or specify the cost cutter—Deutz? 10 to 500 bhp.

Ken Miller honored

Farmer cooperative meets

GETTYSBURG — Kenneth F. Miller, retired manager of the Federal Land Bank Association of York, was honored as an outstanding leader at the Adams-Franklin-York Council of Farmer Cooperatives' reorganizational meeting held here on October 28. J. Wayne Kump, Adams Electric Cooperative, presented an engraved pewter tray to him and expressed the Council's appreciation for Miller's leadership and his role in creating the Master Educator's Award in Pennsylvania. Several former Council members and guests were present for the occasion — John Scott, Agway, Inc.; J. Wayne Kump, Adams Electric Cooperative, Inc.; and recipient of the Master Educator's Award, Elmer Schriver, retired agricultural teacher, Gettysburg.

Following the presentation, the reorganization of the Council was conducted at the regular business session.

Council officers elected were: President, Harold Rotz, Waynesboro, who represents the Eastern Milk Producers Cooperative; Vice-President, Robert Clark, Chambersburg, who represents Agway, Inc.; Secretary, Dan Buttorff, who represents the Stewartstown District Office of Adams Electric Cooperative, Inc.; and Treasurer, Gil Evans, who represents Adams Electric Cooperative, Inc.; and Public Relations Representative, Mrs. Ruth Ann Orndorff, Adams Electric Cooperative, Inc., Gettysburg.

The treasurer's report and proposed budget for 1976 was given by Gil Evans. A general discussion of upcoming 1976 Council activities included youth education, adult education, fair displays, and programs to promote the co-op way of doing business. Council voted to sponsor a young couple to the American Institute of Cooperation (AIC) in 1976.

John Schwartz, county agent-agriculture, with the Adams County Extension Service, will chair the Youth Program and One-Day Institute for 1976. Roy Weaner, Jr., Interstate Milk Producers Cooperative, and Bob Stover, Production Credit Association of York, will co-chair the Young Couples Program. Co-op Month Banquet and program will be chaired by Bob Whitman, Agway Feed Mill, Inc., and Forrest Stouck, Federal Land Bank and Production Credit Association.

All other committees remain the same as 1975. The next council meeting was set for Wednesday, December 10, 1975.

Dairyman selects trademark

Dennis L. Kulp, Manheim, will have the exclusive use of "Kulpstead" as his prefix in naming all Registered Holsteins bred under his ownership. The use of this herd identification name has been granted by Holstein-Friesian Association of America, Brattleboro, Vermont and will be the first part of the animal's name when used. This is one of over 60,200 officially recorded prefixes in the Association's files.

Be reserving a prefix, a Holstein dairyman establishes a "trade-mark" which is used in all published information concerning the performance of his cattle.

Fed. energy officer to speak at Grange's Farm-City Week

Will Ketner, of Harrisburg, the federal-state liaison officer in Pennsylvania for the Federal Energy Administration, will be the Farm-City Week speaker at the meeting of Valley Grange at Lewisberry Monday, Nov. 10.

The meeting, which will begin at 7:30 p.m., will be open to the public according to Anna May Snyder, lecturer of Valley Grange.

Ketner, who previously served as secretary of the Public Utility Commission, deputy secretary of the State Department of Commerce, and director of the Bureau of Markets in the State Agriculture Department, has selected as his topic, "The Same To You."

During his service in the Agriculture Department, Ketner headed a number of food trade missions to Europe and the Orient as part of a program to develop foreign markets for Pennsylvania agricultural products.

A resolution calling for state and federal welfare reform legislation, adopted by Valley Grange, was approved by the Pennsylvania State Grange at its annual convention in Lancaster last week. It has been forwarded to the National Grange for consideration at the national convention at Columbus, Ohio, November 10-18, according to James A. Kegel, Valley Grange Master.

Two members of Valley Grange, Mrs. Iva E. Craft and her daughter, Miss Mary Margaret Craft, of 120 Falls Vine St., York Haven, were blue ribbon winners in the handicraft exhibit at the state Grange convention.

Miss Craft won first prize in the afghan competition, while her mother took first place in Class C of the patchwork pillow category.

The exhibit and competition at the state session climaxed a year-long program of the state Grange's Women's Activities Committee.

Sulfur deficiency symptons:

. . Plants are small and spindly with short, slender stalks

. . Growth rate is retarded and maturity is often delayed, particularly in cereal grains

. . On most plants, younger leaves are light green to yellowish in color, with even lighter colored veins. This yellowing of the leaves is frequently confused with nitrogen deficiency symptoms.

. . On sorghum and corn, early symptoms may also be confused with those of iron and zinc deficiencies.

. . On legumes, nodulation is frequently reduced.

. . Fruits often do not fully mature, and are light green in color. Spotting of leaves may occur, as with potatoes.

Broiler placements up

Placements of broiler chicks in the Commonwealth during the week ending October 25, 1975 were 1,250,000. The placements were 6 percent above the corresponding week a year earlier, but 12 percent below the previous week. Average placements during the past 10 weeks were 8 percent above a year earlier. Settings for broiler chicks were 1,638,000 - 18 percent below the previous week and 14 percent below the comparable period a year earlier. The current 3-week total of eggs set is 1 percent above the same period a year ago. Inshipments of broiler - type chicks during the past 10 weeks averaged zero compared with 3,000 a kear ago. Outshipments averaged 221,000 during the past 10 weeks, 18 percent above a year earlier.

21 STATES: Placements in the 21 States were 55,231,000 - 4 percent below the previous week but 21 percent above the same week a year earlier. Average placements during the past 10 weeks were 13 percent above a year ago. Settings were 69,346,000 - 9 percent above the previous week and 10 percent above a year earlier. The current 3 - week total of eggs set is 10 percent above the comparable period a year ago.

Nat. FFA convention

(Continued from Page 20)

achievement in one of 19 areas of production agriculture and agribusiness.

Building Our American Communities Awards will be presented to 108 FFA chapters during the Thursday morning session. The BOAC program is a ntaional effort of the FFA to involve members in community development. Thirty-seven chapters will be recognized as Gold Emblem recipients in the award program. Of those chapters, four will be recognized as regional winners, and one of the four will be named to receive the National Citation for the top community action program in the nation.

The National FFA Alumni Association will hold the opening session of its fourth annual meeting on Thursday morning at the Radisson Muehlebach Hotel. Over 1,000 persons are expected to attend the 17,500 member Alumni Organization's meeting which will convene for two half day sessions on Thursday and Friday mornings (November 13-140.

FFA Alumni Outstanding Achievement Awards will be presented to three FFA Alumni members and over 100 Legion of Merit Citations will be presented for active leadership in building the FFA Alumni Association. In addition to the award presentations, the Alumni will conduct a business session, hold committee meetings, and elect new officers.

The Thursday afternoon FFA Convention program will feature former Secretary of the Treasury Joh Connally of Texas, and Yazoo City, Mississippi, humorist and fertilizer salesman Jerry Clower, both of whom will address FFA members who have earned the American Farmer Degree.

The Honorary American Farmer Degree will be presented to 80 persons in education, government, business and industry who have made outstanding contributions to the FFA and agriculture. This year 92 vocational agriculture teachers will also receive the Honorary American Farmer Degree for their work as teachers and advisors on local chapters.

The American Farmer Degree, highest degree presented to members of the Future Farmers of America will be awarded to 703 deserving FFA members this year, the largest number of FFA members ever to receive the degree.

Always a highlight of the National FFA Convention, the naming of the Star Farmer and Star Agribusinessman of America will be Thursday evening. An expected audience of over 12,000 FFA members and guests will be present. The Star Farmer of America award, was presented for the first time in 1929, by the Kansas City Star newspaper. Since then it has come to be a symbol of achievement in the FFA, recognizing the Future Farmer who has developed the most outstanding farming program. The Star Agribusinessman award was created six years ago to recognize the FFA member who has developed outstanding career opportunities in agricultural business. There will be four candidates for each award - one representing each of the four FFA administrative regions. A $1,000 cash award is presented to the Star Farmer and the Star Agribusinessman of America at the conclusion of the "Stars Over America" Pageant. In addition, the eight "Stars" are featured in the premier showing of a 25-minute film sponsored by CIBA-GEILY Corporation. Following the convention, the film is made available on free loan to FFA chapters throughout the year.

A busy morning session is scheduled for Friday as the convention draws to a close. At breakfast in their honor, individual and team winners will be announced in the seven National FFA Contests. Back on the convention floor participants will hear an address by Vice President Nelson A. Rockefeller, and National FFA Safety Awards will be presented to chapters that conducted outstanding safety programs during the 1974-75 school year. Later in the session delegates will vote for six national officers who will represent members during the 1975-76 school year.

Following an afternoon of participation in FFA Day at the American Royal Livestock and Horse Show, convention participants will return to the Municipal Auditorium for the final session. National FFA President Alpha Trivette of Ladysmith, Virginia, will deliver his closing address and a new slate of officers will be installed. Trivette and his fellow officers will recognize their parents and vocational agriculture instructors by presenting them the Honorary American Farmer Degree. The convention will be adjourned but few will leave the auditorium, as an evening of special entertainemnt begins immediately following the closing gavel. Over the years the variety show featuring professional entertainment sponsored by the Firestone Tire & Rubber Company of Akron, Ohio, has become a regular feature of the convention.

On Saturday morning the National FFA Band will fulfill a long-standing tradition by leading the American Royal Livestock and Horse Show parade through the streets of Kansas City. It will be the final performance of the 1975 National FFA Band singnaling the conclusion of the 48th National FFA Convention and the beginning of the American Royal Livestock and Horse Show.

The planning committee for the First World Conference in Agricultural Education will begin on Tuesday, November 11 at the Phillips House and will conclude on Tuesday (November 18). The committee, which is made up of agricultural educators and youth representatives from many of the countries which will be involved in the Conference will establish a program for the conference which will be held in conjunction with the 1976 National FFA Convention. A feature of the Conference will be the First International Agriculture Olympics in which agriculture students from all nations will compete in tests of agricultural skill and knowledge. The entire cost of the Conference is being sponsored by Massey-Ferguson Inc. as a Special Project of the National FFA Foundation, Inc.

Agronomists from Penn State recently used a new harvester to sample yields of small grain and soybeans in Lebanon County research plots. Dr. Richard Cole, (left) Penn State agronomist and Denis Hoke, agricultural agent are shown placing the samples into bags. James Eakin, Penn State Agronomist (right) looks on. The harvester was manned by a technician from Penn State.

Crop variety plots harvested

Seven varieties of soybeans and twenty-one varieties of grain sorghum were harvested last week by Penn State Agronomists. The variety plots are part of an on-going research and demonstration program to test new varieties of the major crops grown in Lebanon County.

The seven soybean varieties included a new variety of edible soybean called Emrald which was developed at the University of Maryland. It produces a satisfactory yield of excellent quality beans, which have a bright green color and good cooking quality. The other bean varieties in the test were all field types which are commonly grown for livestock feed.

The soybean plots were planted onland which is leased by the Annville-Cleona High School Vocational Agriculture class taught by Lowell Morton. James Eakin, Penn State Extesnion Agronomist, designed the experimental plots which were planted under the supervision of Newton Bair, County Extension Agent.

The grain sorghum variety plots on the farm of Clair Gerberich, Jonestown were sampled for yield and quality of the different hybrid sorghum. Sorghum yields were somewhat lower than in previous years, but were generally satisfactory. Yields ranged from 30 to 70 bushels per acre. All the data on yields, moisture, maturity and seed quality will be made available to the growers as soom as it can be compiled and evaluated.

Harvesting and yield checks of both crops were done with the help of a miniature combine designed for harvesting small plots. Self-propelled, it cuts a 48 inch swath and can handle most small grain crops. It was recently purchased by the Pennsylvania State University from a manufacturer in Belgium. The new machine has increased the effieiceny and accuracy of harvesting experimental plots, which was formerly done by hand labor.

York Co. gal wins trip to hort conference

Megan Shaub, 350 W. Railraod Ave., Shrewsbury; daughter of Mr. and Mrs. Robert Shaub, left recently for the National Junior Horticultural Association Annual Meeting in Beloxi, Mississippi

Megan was chosen for this trip by qualifying as one of five Horticulture Keystone Winners in Pennsylvania from forty applicants. Winners are chosen on the basis of their 4-H Horticulture Project work, overall 4-H experience and accomplishment, their leadership abilities and well-rounded character.

Miss Shaub, 15, has received awards on various levels of 4-H work. In the past two years she has been recognized as an Outstanding 4-H member in Horticulture and Flowers, as well as receiving the Outstanding Junior Girl and Achievement Awards on the county level.

In addition she is an officer in 4-H clubs (3); the Saddle up Horse & Pony club, (President), The Shrewsbury 4-H Community Club (Vice President) and the York County 4-H Horticulture Club (Vice President).

While in Beloxi, Megan will take part in various workshops, tours, seminars and rap sessions on various horticulture subjects.

Thanks must also go to Earl Brown's Orchard, Loganville; Ernest Horn, Pennfield Corp, Red Lion; Shrewsbury Lions Club; Glen Rock State Bank and York Bank and Trust who are sponsoring her trip this weekend to the National Junior Horticulture Association's Annual Meeting.

Recognition awards presented to five Md. extension agents

Four county Extension agents in Maryland and one Extension supervisor at the University of Maryland in College Park have been honored during the past five weeks by national associations for professional workers employed by the Cooperative Extension Service.

All five of the honorees have West Virginia or western Maryland backgrounds, although two of them are currently working on one county in the Upper Bay region of northeast Maryland.

The line-up of honorees includes:

Harford county - Lynn T. Warman of Forest Hill, a county Extension agricultural science agent at Bel Air since 1957 and chairman of the Harford county Extension staff since 1964. He received the Distinguished Service Award for Maryland at the 60th annual meeting of the National Association of County Agricultural Agents, held last month (Sept. 28-Oct.20 in Milwaukee, Wis.

Also, J. William Clark of Bel Air, a 4-H and youth agent in Harford county since 1968. He received one of two Distinguished Service Awards for Maryland at the annual meeting of the National Association of Extension 4-H agents, being held this week (Nov. 3-7) at Louisville, Ky.

Allegany county - Charles J. D. McVeigh, Jr., of Cumberland, a county Extension agricultural science agent in western Maryland since 1969. He received the Achievement Award for Maryland at the 60th annual meeting of the National Association of County Agricultrual Agents, held last month (Sept. 28-Oct. 2) in Milwaukee, Wis.

Garrett county - Mrs. Hugh (Freda S.) Denslon of Oakland, a member of the county Extension staff since 1961 and Extension home economics agent in Garrett county since 1965. She received the Distinguished Service Award for Maryland at the annual meeting of the National Association of Extension Home Economists, held last week (Oct. 27-31) in Knoxville, Tenn.

Prince Georges county - David D. Eigenbrode, a resident of the Montpelier area south of Laurel. Formerly a 4-H agent in both Baltimore and Frederick counties, Eignebrode has been employed at the University of Maryland in College Park since 1968 as a supervisor for 4-H and youth activities of the statewide Cooperative Extension Service.

He received one of two Distinguished Service Awards for Maryland at the annual meeting of the National Association of Extension 4-H Agents, held last week (Nov. 3-7) at Louisville, Ky.

What's New

A new type of all-steel metal building for farm use has been introduced by the Mitchell Engineering Company of Columbus, Mississippi, a pioneer in the metal-building field. The new building is called MECO-MASTER, and comes in a series of sizes that can be used for farm shops, farm grain storage, equipment storage, or warehousing for feed, seed, fertilizer, hay, cotton and other agricultural commodities.

MECO-MASTER buildings are available in two basic configurations: 50 feet wide by 17 feet eave height and 40 feet wide by 15 feet eave height. The 50 foot wide building is available in any length in increments of 20 feet with a 40 foot minimum length. The 40 foot building is available in any length in 25 foot increments with a 50 foot minimum length.

Maximum size sliding doors are available to accommodate the vast majority of opening requirements. For example, the 50 foot by 17 foot eave height MECO-MASTER building is available with a 24 foot by 16 foot double sliding door to meet the requirements of cotton pickers (including cab and air conditioning unit), combines with the widest head (including cab and air conditioning unit, and six row tillage equipment.

Designed for easy, fast erection, the basic MECO-MASTER building includes all primary and secondary structural framing, 26 gauge commercial grade galvanized roof and wall panels, galvanized flashing and trim, base angle, ridge cap, eave and base closures, structural bolts and galvanized panel fasteners.

Heavy-duty roof and wall panels are 26 gauge steel Mitchell Architectural Panels with a 1½ inch high major ribs for maximum leak prevention and attractive exterior appearance. The roof slope is two inches in 12 inches for additional leak protection.

Options include factory baked on paint for roof and walls. Roof available with white panels. Walls available in choice of six colors. Other options include blanket fiberglass insulation, round ridge ventilators, green or white translucent wall lights, and steel pedestrian doors. As an additional farm option, a bulk grain storage kit for flat grain storage may be obtained.

MECO-MASTER buildings are available through dealers located across the country. The company's main plant and headquarters office is located at Columbus, Mississippi, with other manufacturing operations in Rocky Mount, North Carolina and Mt. Pleasant, Iowa.

Mitchell Engineering Company is a Division of The Ceco Corporation, Chicago, Illinois, a nationwide manufacturer of construction products and supplier of services to the construction industry.

Anti-Vibration Chain Saw

Jonsereds' first anti-vibration chain saw in the mini-weight class is now available through Tilton Equipment Company. Adapted from the heavy duty, professional Jonsereds models, the 361AV takes the shake out of sawing with separate anti-vibration mountings for both front and rear grips. The result is smoother, safer, more comfortable operation when cutting for prolonged periods, according to the manufacturer.

In addition to the anti-vibration feature the all new 361AV has a double safety trigger and a strong handguard to protect against kickbacks. It is also equipped with a chromed chain and a speed tip guide bar. Both frame and large capacity fuel tank are die-cast magnesium.

Literature and additional information on the new Model 361AV is available from Tilton Equipment Company, 4612 Chatsworth Street, St. Paul, Minnesota 55112.

The following ad appeared in the classified section of a large newspaper: "For sale, 1963 Ford. Needs work. Price $2,000. Cash rebate, $1,800."

Farm has girl for herdsman

"I hate being called a 'herdsperson'," says Estelle Tulloss, a one-year veteran "herdsman" at the University of Delaware experimental farm in Newark, Delaware. Estelle graduated from the University of Delaware in 1973 as a "senior with distinction" and has worked on the farm for over a year.

Estelle was working as a "new accounts clerk" at a Baltimore savings and loan association when she heard the herdsman job was open She applied immediately and was hired. You might assume that Estelle is from a farm family, but actually she was raised in Baltimore. Her grandfather owned a beef farm, but the beltway sliced it in half when Estelle was ten. and she hadn't had any farm experience from that time until she went to college.

Her only other farm experience was after her junior year in college when she worked for a "gentleman farmer" in Maryland. She laughs at her own ignorance of some things and says she is learning things now that "farm kids learn when they're ten years old."

She's always known what she wants, though, and that is to work outdoors and with animals. She majored in animal science at Delaware. As an undergraduate she worked on a project aimed at helping sheep breeders get more uniform lambing in their flocks. What's more, her experiments demonstrated the feasibility of breeding yearlings. Her advisor, Dr. Richard Fowler, foresaw practical advantages to sheep breeders in labor and management economies as a result of Estell's research. This project earned her a "degree with distinction."

What does she do? "mostly chores right now, but during the school year I'll prep labs and be a lab assistant," she answers. She also keeps records for sheep and beef cattle and generally does "anything that needs to be done."

Estelle and the others work from 7:00 - 4:30 each day, including two weekends a month, but that isn't always enough to get the work done, so they work until it's finished. Estelle is philocophical about the hours, though "If I want to farm, I may as well get used to it," she laughs

The herdsman says she isn't limited in her ability to perform the work because she is a woman. "Your muscles develop," she says

When I first started I couldn't lift a hundred pound bag of feed" Estelle admits she still can't throw a bale of straw over the fence as easily as some of the men, but "I learned to use my knees for leverage and now I can get it over very well" She says being tall helps (5'10"), but "even a short woman could devise some method for doing the job right if she wanted to"

But it's not just physical labor, says Estelle "You're using your head too, and I'm learning more here than I would anywhere else because I'm here on an experimental farm I'm learning new things as they come out as well as the practical things that must be done on a farm." The words "women's lib" are not popular with Estelle. She prefers the term "equal rights." "Women's lib may have accomplished getting women to be aware of how they have been used, but all the slang and things associated with it are superfluous. It doesn't mean anything and it antagonizes a lot of people," she feels.

"I do a job that is usually associated with men, but I really appreciate being treated like a woman," says Estelle.

She enjoys all the "chores" and the more challenging parts of her job, and doesn't even mind the more boring jobs, such as cleaning out horse stalls. She can operate all the farm equipment except the front-end loader, which she has not tried, and drives a pick-up instead of a car.

Her ambition is "eventually to own and operate my own farm." She is engaged to a Michigan State University graduate student in zoology and plans to be married within the next two years. Her fiance, even though a nonfarmer, is agreeable to living on a farm and helping with the operation.

It's simple for Estelle to sum up her feelings about her job as herdsman, "I'm really lucky."

It's definitely "tender loving care" for the animals at the Experimental Farm. Herdsman Estelle Tulloss is using her Animal Science background as well as her affection for her four-footed charges.

Christmas Seals are 68 years old

Have you seen the 1975 Lung Association Christmas Seals? If you've tucked them away to use on your holiday mail, get them out and look at them. They have a youthful "new look" this year. For the first time, they've been designed by school children throughout the United States.

The uninhibited imaginations of 54 youngsters from 6 to 12, each representing a state or territory, have contributed a riot of color in the form of merry Santas, smiling snowmen, airy angels, caroling children, and gaily decorated Yule trees.

The Pennsylvania Seal was the creation of Carol Emery, a fifth grade student in Schuylkill School in Phoenixville, Pennsylvania.

Miss Velma Hart of the Lancaster County Lung Association said today that the child-created Christmas Seals are being mailed nationwide to more than 60 million homes and businesses, including about 90,000 in Lancaster County, as part of the 1975 appeal for funds during November and December by the American Lung Association and its 200 affiliated lung associations. The annual Christmas Seal campaign helps finance the prevention and control of emphysema, chronic bronchitis, asthma, tuberculosis and other lung ailments that afflict all ages. Lung associations also are active in combatting the hazards of smoking and air pollution

Miss Hart announced that the original paintings created by the child artists will be part of a special exhibition at the National Collection of Fine Arts in Washington, D C, November 14, 1975, through January 4, 1976 The young designers also will see their Seals featured in television spots, newspaper stories, posters and Christmas cards available from Lancaster County Lung Association

Christmas Seals were introduced into the United States in 1907 by Emily Bissell, Miss Hart recalled Miss Bissell, a social worker in Wilmington, Delaware borrowed the idea which was originated by a postal worker in Denmark, to raise money for a financially distressed TB hospital on the banks of the Brandywine River in Delaware. Miss Bissell designed the first United States Seal herself. It was a wreath of holly, with the simple greeting, "Merry Christmas."

In later years well-known artists such as Rockwell Kent, Howard Pyle, Dale Nichols and Stevan Dohanos created Christmas Seal designs. More recently, Seal designs were chosen by the lung association from entries in an annual nationwide competition open to amateur and professional adult artists.

About two years ago the American Lung Association decided on a complete departure. With the cooperation of the National Art Education Association, the first children's Christmas Seal art project was launched. Art teachers in elementary grades asked their classes to make paintings expressing their ideas about the Christmas holiday season.

Teams of art teachers and lung association representatives selected six paintings in each state and the District of Columbia, Puerto Rico, the Virgin Islands and Samoa-Guam to be sent to the nationwide selection committee. This was composed of John J. Mahlmann, Ed. D., executive secretary of the National Art Education Association; Joshua Taylor, director of the National Collection of Fine Arts, and Evart Brink, art director for Fleming-Potter Lithography in Peoria, one of the Christmas Seal printers. In January, 1974 this group chose paintings by 34 girls and 20 boys to compose the sheet of 1975 Christmas Seals.

Miss Hart pointed out that each sheet of the Seals bears the heading, "Christmas Seal Greetings from the Children of America" She added

"Let's not let the children down The best Christmas greeting we can send in return is a generous contribution to help the lung association continue its work of protecting the lungs of children and grownups Answer your Christmas Seal letter today It's a matter of life and breath"

Area tack shop is Tandy Leather dealer

Carson's Tack and Western Store, Route 23, Blue Ball, Pennsylvania, is now a Tandy Leather Authorized Sales Center.

According to Edward S. Carson, the store's owner, Carson's Tack and Western Store will stock a selected line of products from Tandy Leather. Their products include Leathercraft Instruction Books, Tools and Supplies for better leathercrafting, kits for purses, holsters, billfolds, etc., and assorted other leather projects for all members of the family.

Tandy Leather, a Division of Tandycrafts, Inc., headquartered in Fort Worth, Texas operated a chain of leathercraft stores in the United States and Canada. The company expects to establish a network of 2000 Authorized Sales Centers, like Carson's Tack and Western Store across the nation.

Carson's Tack and Western Store has been serving the Blue Ball area since June, 1975.

What's New

Aflatoxin Detector

Numerous incidents of contaminated grain have recently been reported by the FDA which could result in financial loss for the owners. Aflatoxin contamination can be readily identified using long wave ultraviolet lamps. This technique was developed at the Northern Regional Research Laboratory, U.S. Department of Agriculture Ultra-Violet Products, Inc. in San Gabriel manufactures blak-RAY Ultraviolet Lamps which can help the grain handler protect himself against such a loss. When a sample of grain is scanned with these lamps a greenish-gold fluorescence confirms the presence of aflatoxin. When the handler sees this fluorescence he should take immediate action to prove the grain is contaminated.

The B-100A high intensity lamp has proven to be the most popular device for flatoxin detection. The 100 watt spot bulb makes detection easy, even in well-lighted areas.

THE GOOD WORD from the Bible

Come, and let us return unto the Lord: for he hath torn, and he will heal us; he hath smitten, and he will bind us up.

After two days he will revive us: in the third day he will raise us up, and we shall live in his sight

Hosea 6 1, 2

NOW YOU CAN HAVE

HI PRODUCTION AND BUTTERFAT TEST TOO . . .

7H166 PERCY

SUNGOLD KINGPIN PERCY BURKE 1569187

Good Plus (82) Production Qualified 5-75

Percy represents a cross between two outstanding bulls — Whirlhill Kingpin and Wis Burke Ideal Percy has a special ability to sire well balanced and symmetrical udders, which is typical of the Wis Burke Ideal influence which he inherits. His daughters are average in stature with a proper balance between dairyness and strength. Percy can be used as an improver of feet and legs as they have proper set to the hocks and stand on correct feet We are also pleased that Percy has the ability to increase butterfat test as well as high milk production, this combination making him one of the high dollar value bulls in the Holstein breed

His Sire: Whirlhill Kingpin 1347940

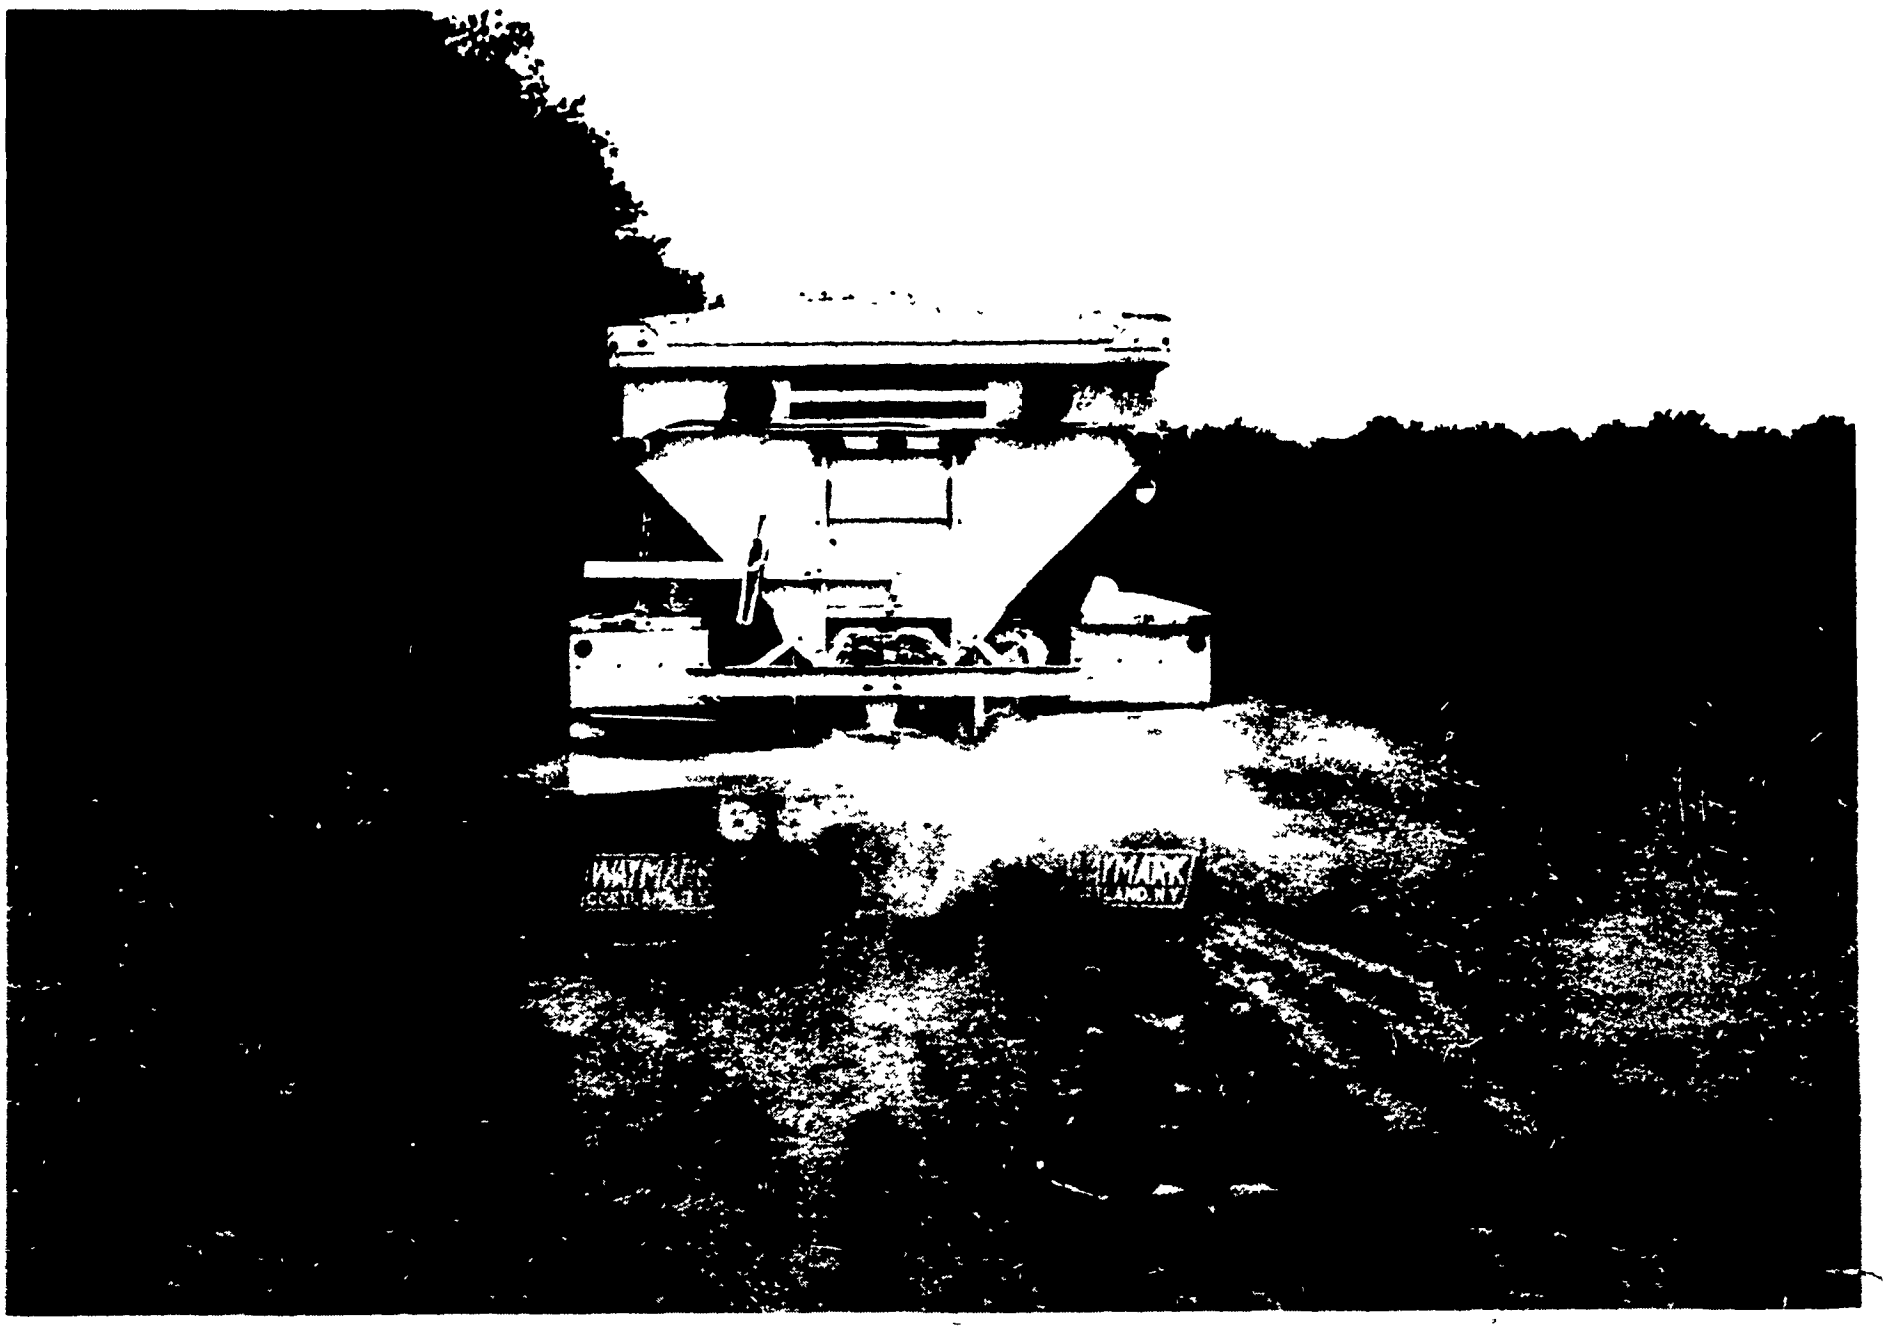
AGWAY



AGWAY SPREADS THE GOOD WORD!

Not one . . . but two discounts add up to one of the greatest price reductions ever offered by Agway for fall fertilizer delivery!

Early Take discount

- ammoniated grades, 12¢ per unit
- blends, 0 6¢ per pound of plant food

For example popular 10-20-20 ammoniated analysis equals 50 units of plant food per ton 50 x 12¢ equals Early Take savings of $6 00 per ton.

Early Pay discount

4.5% when you pay in November. Choose the Early Pay discount and you can add another savings that can equal—or exceed—the unit discount, depending upon the purchase price and analysis.

Buy with price protection

Order now and Agway will protect you against any possible price declines If Agway prices are lower next spring, Agway will rebate the difference. Here are the ground rules

All price comparisons are to be made at the original point of purchase and discounts must be taken into account All purchases of ammoniated and blend fertilizers during the period from September 30, 1975 through January 17, 1976 will be entitled to price protection through May 1, 1976.

Soil store or dry store

It makes good sense to spread your phosphorus and potash now. You free up time, labor and equipment for important planting work next spring.

Or store your fertilizer under cover and be sure of your planting needs next spring. Remember, fertilizer stored on your farm from November 1, 1975 through June 30, 1976 will be replaced if loss is due to fire or to water used in fighting fire.

Julie Houck

A USDA inspector she protects the consumer

By Sally Bair
Feature Writer

Protecting the consumer is Julie Houck's job, and she works with a great deal of dedication and enthusiasm.

Julie, who lives at Gap RD1, is a federal food inspector for the United States Department of Agriculture and is assigned to the Victor F. Weaver Poultry Plant in New Holland.

In this era of the consumer, all food processing plants have federal inspectors whose job it is to be certain that the products are processed according to very exact federal standards. The whole purpose of the inspection process is to assure the consumer a quality product.

Julie puts it this way. "The main purpose of inspectors is to protect the consumer and make sure they get a wholesome product out of healthy animals." As she talked about her specific duties, she reiterated frequently that the consumer is being assurred a quality product.

Being a federal food inspector is not so unusual in itself but Julie is a senior inspector with eight men working under her. She said supervising men offers no problem because "they respect you if you know your work." Julie herself is supervised by a veterinarian, a man.

Julie's workday often begins as early as 5:15 a.m. or 5:30 a.m. She is not required to be there until later, but she says she often goes in earlier "in order to do the job right. I don't like to be rushed." She admits that she works hard, but says, "Dedication is 50 percent of the job."

There are many specific jobs which she and the other inspectors perform regularly, ranging from doing an antemoretem, which means observing the live birds in coops, to checking samples of carcasses for defects.

The quality assured product which is produced at Victor F. Weaver's for instance must comply with certain federal regulations. They have been licensed to meet certain standards and proceduers, Julie explains, and the inspectors simply make sure this is what actually happens.

It is difficult for an outsider to comprehend the exact work of an inspector, but some specific instances point out the types of things they do in the course of a day. For instance, sanitation is checked daily, and Julie is directly responsible for checking it thoroughly once a week. A moisture test is also taken once a day to make sure the poultry comply with regulations.

All equipment must be checked before it starts for the day. "Therefore I am always there before the men," Julie says.

At various times the inspectors take the temperatures of the birds and the water being used in processing - again there are specific standards. In her conversation Julie drops worlds like rpms, oscillation, AQL and drip-line speed. They may sound strange to an outsider, but Julie makes them sound quite reasonable and comprehensible.

As senior inspector one of Julie's jobs is to make sure there are always eight inspectors on the job. That means finding a replacement if someone calls in sick. Her work with the inspectors is "to monitor them and help with problems," she says. The veterinarian checks out questions raised by the inspectors, and Julie says that in her position she works with management on problems which crop up.

Despite the activities of actual inspection work, Julie also spends "a lot of time on paperwork. In fact she estimates about 20 percent of the work is paper work.

Julie is a native of nearby Chester County where she was born and raised on a general farm. She began working in a poultry plant as a trimmer, and then became a food inspector on a parttime basis. The training she got was "on-the-job." Then she said, "I took the civil service test for full-time employment as an inspector and was in the right place at the right time."

Julie checks breasts at the salvage table as part of her inspection work.

Homestead Notes

She said she made the move from poultry plant work to inspector basically because "it paid better." But, she added, "It was fulltime - I was helping the consumer and I needed the steady work."

She has been an inspector for three years but was elevated to her present position in August. Early in 1975 Julie was awarded the Federal Women's Award, which is given "to a woman doing outstanding work in her field." Julie was nominated by her supervisor and was one of just three women in the area to be nominated. The award carries with it a cash prize of $200 and a plaque.

Julie received formal training in her work at a school in Texas which she attended for a week. There was both book work and lab work, and she was graded on her performance.

She is a member of the American Federation of Government Employees which is affiliated with the AFL-CIO and is chairman of the union representatives. She is also secretary of the safety committee.

Julie has been married for six years to Ross Houck, whom she met on a blind date. She praises him a lot as she talks about her "crazy" schedule. "I couldn't possibly work this way if it weren't for my husband. I give him a lot of credit. He always pitches in if I get behind." They have one son, Ross, Jr., who is in kindergarten.

Julie is no stranger to hard work. When she was a teenager, her father was injured and could no longer work. At 16 she worked as a waitress to earn extra money, and she worked as a library aide in the Neighborhood Youth Corps for three years during her high school years. She is a 1969 graduate of Coatesville Area High School. She attends Meadville Mennonite Church.

Julie plays with one of her English setters.

Although she is a very active homemaker during her off duty hours, Julie describes herself as "an outside person." She said she loves outdoor sports - baseball and volleyball, and plays outside with her son. She also expressed her belief in being physically fit, and has an exercise program which she does daily.

And Julie is one wife who dosen't mind when hunting season comes - she goes along. She said she really enjoys small game hunting and deer hunting. But she draws the line at going to deer camp with her husband - "I don't think that a camp is a place for a woman. I like to hunt with my family." She added that when she hunts deer she wants "one with antlers or none at all."

She said, "My father influenced me with my hunting. I used to help him skin his game." She has shot squirrels, rabbits and pheasants and says, "With the price of food it is only good economy to serve those animals in the family meals. If you learn the trick of cooking game you get really good results."

A pride of hers is a 1917 Springfield given her by her father. Her husband does woodwork and redid the stock on the gun.

Julie says she does a lot of cooking in the evenings, and says, "I love to cook, but basically simple and the old way. I like experimenting with food. But I cook everything from scratch."

She may be an outside person, but she has some very inside hobbies. "I do a little bit of crocheting and I help do quilting. I make flower arrangements and I love to read.

A very special interest of Julie's is raising English setters who also help with the hunting.

Julie has several long-range plans about her work and where it might lead her. First of all she says she hopes to get experience in different areas of federal food inspection, perhaps with red meats. Another area which

[Continued on Page 52]

Country Corner

Pa. FFA'ers receive nat'l honors

By Melissa Piper

A number of young people from all over the nation will be heading toward the center of the country this week to participate in the National FFA Convention. And while they represent many different areas of agriculture and agribusiness, the one main interest they have in common is the Future Farmers of America organization

The convention is held annually in Kansas City, Missouri, and offers a full slate of judging events, public speaking contests and agricultural competitions. State teams which have been previously selected for outstanding performances compete against one another for prizes and national recognition

But beyond the competition, the convention annually offers some of the best and most inspiring speakers in the United States Last year for example, Gerald Ford, the president of the United States, addressed the youths as a keynote speaker

This year Nelson Rockefeller, the vice-president of the United States and Johnnie Bench, the noted football player, along with the Honorable John Conally will be heading the list of speakers for the FFA'ers

Perhaps one of the most exciting aspects of the convention however, is the presentation of national awards Those young people receiving the proficiency, chapter, and community service awards realize their efforts throughout the year or years by receiving the honored recognitions.

Since the beginning of the Convention 48 years ago, Pa. has always been well represented at the national event. Over the years, many chapters and individuals from the state have received outstanding national awards for their projects and community service

Receiving national awards for their chapter's community service projects under the Building Our American Community program this year are Northern Lebanon High School with a Silver Emblem and Cloister Chapter, Ephrata with a bronze award

Seven youths from the southeastern portion of Pa will also be receiving their American Farming degrees in Kansas City. These FFA'ers have earned at least $1000 by their own efforts in agriculture or agribusiness and must have demonstrated outstanding abilities in leadership and community activities. Only one tenth of one percent of the FFA membership is selected for the degree.

FFA'ers in Lancaster Farming's prime coverage area receiving the American Farming Degree are: Richard Kurtz, Elverson (Berks Co.); Greg Landis, Millersville (Lancaster Co.); Alan Miller, Red Lion, (York Co); Rick Pfautz, Ephrata, (Lancaster Co.); Gary Stauffer, New Holland, (Lancaster Co.); Frank Stoltzfus, Elverson (Berks Co.) and Larry Wenger, Myerstown (Lebanon Co.).

If agriculture is to have a future then it certainly lies in the hands of young people such as these. Their efforts and service to agriculture and the community certainly deserves national recognition. As Pennsylvanians' we should be quite proud of these FFA members and the contributions they have made in keeping agriculture alive and well in this state.

interests her greatly is compliance work. That means, according to Julie, checking out plants for complaints.

And she says quite emphatically that the consumer does have a responsibility to complain if things are not what he thinks they should be. Julie says, "Anybody can make a mistake, and it is the consumer's right to complain." She says she feels that she may be even stricter than the average consumer because of her training.

The store is probably the first place a complaint should be lodged, but action will be taken if the consumer contacts the U.S. Department of Agriculture, Animal and Plant Health Inspection Service, U.S. Customhouse Building, Second and Chestnut Streets, Philadelphia, Pa. 19106.

Julie Houck summarizes her philosophy about work, "I really think you should set goals for yourself." She adds that another long range dream of hers is to become a veterinarian.

With the dedication and hard work she displays as senior inspector she most probably can succeed in attaining any goal she pursues.

Ida's Notebook

Ida Risser

What ever happened to the long ago habit of walking to school? Those who do not arrive on long, sleek, yellow buses come raoring in on motorcycles, jeeps, big and little cars. One fellow even came on a one-wheeler twirling a baton in each hand.

Now I walked to school and home again. Sometimes my hands were almost frozen and I remember my teacher putting them in a basin of cool water to lessen the pain. If it really poured when school was over, then a car might be waiting a block away. At least we really saw things on our walk like flowers blooming, neighbors talking and always the opportunity to watch the water flow over the dam at the flour mill. Even the dusty miller stood at the door to greet us as we went by.

How did I know how other arrive at school? Because I drove my children there last week. Of course, there was a good reason. Cindy was announcer on their closed circut television station and had to be there early. Then too, there was a package of scrapple to be delivered to the Home Ec room and put in the refrigerator for frying and sampling during a Lancaster Co. Landmarks Club meeting.

xxx

We are glad we took the time to visit Woodrow Wilson's birthplace in Stanuton, Va. He was our 28th president and worked very hard to start the League of Nations.

He was born in the Manse of the First Presbyterian Church in 1856 as he was the son of the minister. The Greek Revival Mansion was built in 1846 and the front of the house is now the back. When it was built a large field separated it from the church property but now the street runs past the back. Each room has a fireplace and many original pieces of furniture including a tiny family crib.

(Editor's Note(Due to an editorial oversight Ida's Notebook was not included in last week's issue. We apologize for any reader inconvience.

Ladies Have You Heard?

How to . . . And Where to . . . Store Fresh Garden Produce

In days gone by, families had "root cellars" - thick stone walls and packed earthen floors. Some of these still survive, spared from conversion into the modern basement, and some of these are being pressed back into service by a new generation. In dimly-lit, cold, moist air, fresh vegetables and fruits are allowed neither to freeze nor to dry out. For months the natural order of things is held at bay, the process of spoilage and decay, halted.

But - without a root celler, you can still find several good ways to store fresh garden produce at your house this fall and winter, depending on the vegetables to be held. Extension horticulturists suggest the following storage facilities: an unheated basement or cellar, an extra refrigerator, and unheated room, a partitioned-off corner of a heated basement, an attic, an insulated outdoor storage pit. Most root vegetables ideally need storage temperatures between 32 and 40 degrees F.

A refrigerator is the modern-day replacement for both a root celler and a food storage place at the spring, offering about the same temperature range for keeping foods fresh and safe. The big difference is the relative humidity, because refrigerated air is very dry. Perforated plastic bags will keep out dry air and hold in the natural moisture of fruits and vegetables.

An extra second hand refrigerator could be a good investment for keeping large quantities of garden produce. (Keep it in a utility room, garage, or even on an unheated closed-in-porch).

There's a surprising variation of temeprature from shelf to shelf in some refrigerators. Check with a thermometer and note which sections are relatively warm (over 50 degrees F) and very cold (32 to 40 degrees F.)

Study your house to see what additional arrangements you can make for proper storage of your produce. Check the temperature, relative humidity and ventilation of each prospective storage area. You should have several inexpensive thermometers and humidity gauges (cost around $10 or less). It's wise to buy one of these if you're serious about this whole foodkeeping project.

You need slatted-wood boxes, shallow lugs, perforated cardboard boxes and woven baskets for your storage containers. Set these up off the floor on shelves, or stack them on wood crossboards to allow air circultaion in between.

How to Use and Store Soy Flour

Flour made from soybeans is becoming a familiar food in many stores. The soy flour generally found in stores contains over 35 percent protein and 20 percent fat.

Soy flour has many uses in baking. It helps keep baked products from becoming stale. When used in doughnuts, it reduces the absorption of fat. Soy products also have a richer color, finer texture, and are more tender and moist than products made with other flour.

However, soy flour can't completely replace all-purpose flour because it does not contain gluten, which provides the structure for baked products.

Here are some suggestions on using soy flour:

Stir before measuring, since soy flour tends to pack in the container.

Spoon the flour lightly into a measuring cup and level with a spatula.

Products with soy flour brown more quickly so you may have to adjust the baking time or temperature slightly.

Berks Co. lady wins nat. sewing contest

WASHINGTON - A Berks County woman, Miss Mary Schuler of Fleetwood has won first place in her division in a National Grange Sewing Contest, it was announced last week by the National Grange office, here.

Over 30,000 men and women entered the 1975 National Grange Sewing Contest. Following local and state judging in May and national judging in New York City in June, first, second and third place winners were announced by Mrs. Jenny Grobusky, director of women's activities.

From the first place winners in each of four divisions a Best of Show has been selected and will be announced Thurs., Nov. 15 in Columbus, O. at a women's activities banquet. The grange is holding its 109th Annual Session in Columbus, Nov. 10-18.

The Best of Show winner will recieve a one week Caribbean cruise for two on a Cunard Line luxury ship, plus additional cash awards and merchandise presented by co-sponsors of the contest.

First, second and third place national winners in each division also receive Singer sewing machines plus U.S. Savings bonds, cash and merchandise. Miss Schuler, first place in Class B (youth division), also wins a $500 scholarship from the Simplicity Pattern Company.

All four first place national winners will be at the banquet to model their winning entires.

Thomasville 4-H holds hayride

The Thomasville 4-H Community Club recently held their monthly meeting in the form of a hayride at the home of Tim and Nancy Eisenhart which was followed by a weiner roast.

The next meeting will be the club's annual Achievement Night program on Sat. Dec. 6, 1975 at 7:00 p.m. at the 4-H Center near Bair. Awards will be presented to club members with special guests attending. A covered dish meal will be served with meat and beverage provided by the club.

Farm Women Societies

Society 11

Farm Women Society 11 met recently at the Eagle American Shop and gun museum in Strasburg. Hostesses were Mrs. Mary Nolt, Mrs. Ruth Henry, Mrs. Irene Shenk and Mrs. Viola Warfel.

Mrs. Marie Bucher, president, conducted the business meeting with Mrs. Irene Shank giving devotions.

A report was given by members who attended the visitation at Conestoga View recently.

Following the meeting, Mrs. Nolt took the group on a tour of the museum which was followed by an auction.

The November meeting will be held at the home of Mrs. Betty Burkins. Mrs. Stanley Grill will give a program on the use of herbs.

Berks Co. Society 3

Society of Farm Women 3 of Berks County met recently at the home of Mrs. Joseph Bartholomew. A Halloween party was held with prizes awarded to several members. Mrs. Harvey Moyer, Mrs. Richard Leob, Mrs. Mary Herzog and Mrs. William Moyer captured awards during the party.

The nominating committee presented the following slate of officers for the new year: Mrs. Mary Hill, vice-president; Mrs. Laverne Richard, secretary; Mrs. Hazel Sell as corresponding secretary and Mrs. William Moyer as treasurer.

The next meeting will be held at the home of Mrs. Ernest Hartline.

Society 28

Society of Farm Women 28 met recently at the home of Mrs. Christ Landis. Co-hostess was Mrs. William Harnish. Program for the evening was a game night.

The next meeting will be held November 20, at the home of Mrs. Ira Welk, Quarryville R3. Speaker for the evening will be Mr. William Musser Jr.

Berks Co. Society 5

The monthly meeting of Farm Women Society 5 of Berks County was held recently at the home of Mrs. George Manbeck, Womelsdorf, Pa.

A Halloween party preceeded the meeting with prizes awarded to the following members: most original - Charleen Moyer; cutest - Julia Grimes; most artistic - Nancy Seidel and last one guessed - Ella Bicksler.

Betty Wessner, vice-president conducted the business meeting. Devotions were led by the hostess Celesta Manbeck.

Donations were given to the George Brubaker family, Georgy Moyer family and the Harold Miller family.

The next meeting will be Nov. 24 at the Railfence in Cleona. Members are to meet at the Trainer's Diner at 6:45 p.m.

Society 26

Farm Women Society 26 held their last meeting at the Crippled Children's Hospital at Elizabethtown and played wiffel ball with the children.

Afterward the women went to the home of Mrs. Harold Musser, Elizabethtown, R3., for the business meeting and refreshments. Co-hostess was Mrs. Clyde Buchen.

Mrs. Howard Sipling had devotions. Roll call was a "Suggestion For next year,".

Results of the election are as follows: secretary - Mrs. Ralph Hostetter, treasurer - Mrs. David Garber and corresponding secretary - Mrs. Robert Brubaker.

York Co. Society 23

The Big Mount Farm Women society 23will meet at the home of Mrs. George Mummert on Nov. 10 at 7:30 p.m.

Mrs. Helen Shearer and Mrs. Doreen McGhee will be in charge of the program. Each member is asked to bring a live potted plant to exchange.

The December meeting will beh held on the 17 at 7:00 p.m. at the Thomasville Fire Hall. A family Christmas party will be presented.

Time to Yourself

A good way for a homemaker to have a few minutes to themself is to start doing the dishes

FORMERLY FURLOW'S MARKET

Dear Friend, Past Customers and New Acquaintances:

We have long been known for having been dealers in sugar and bulk food items on a wholesale and retail basis.

As of November 3, 1975, we have acquired the former Furlow's Market in Sinking Spring, Pa. This market has a long standing record and reputation for purveying an excellent quality of Fresh and Smoked Meats. We will continue to provide Fresh Cut Quality Meats and with the addition of a Deli Department, we can offer you a wide variety of taste tempting Fresh Sliced Lunch Meats, Cheeses and Salads.

We are going to install a new Produce Processing Area and have a complete assortment of Farm Fresh Fruits and Vegetables of the highest quality in the area. Our Farm Market will afford you the opportunity to do all your weekly food shopping since it is complete with Frozen Foods, Groceries, Baked Goods and so on.

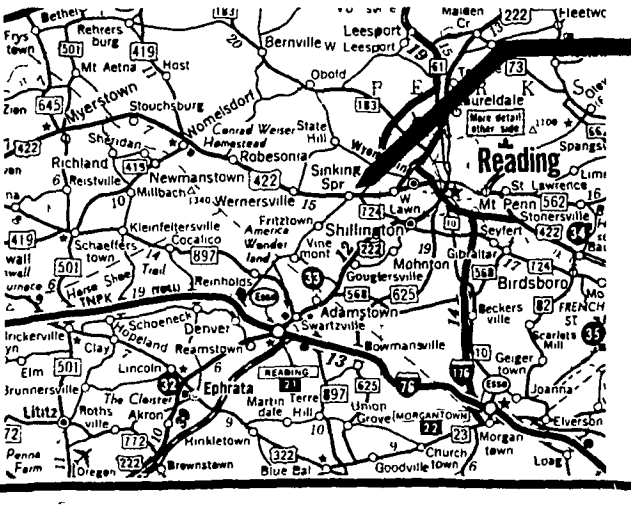
Now in addition to our former line and varieties of bulk foods, we will be stocking a large selection of gallon size cans and jars of Fruits, Vegetables, Pickles, Olives and Salad Dressings. Be sure to visit this money saving department. Case lots and bulk quantities of all merchandise will be available at thrifty prices. Quantity discounts are your key to extra cash savings. Drive a little or a lot, the savings will more than compensate for the expense. Also again available, frozen fish patties in the 40 lb. box.

Please use above telephone number for calling during store hours. Open 8:00 A.M. to 6 P.M. Mon., Tues., Wed., Sat. 8 A.M. to 9 P.M. Thurs. & Fri.

Our wholesale operations will be moved to our one stop Farm Market in Sinking Spring. (see the map below).

Thank you for your past patronage.

Our son, Paul, will continue in the operations of the market locations.



Sincerely,

Elmer P. Weaver, Jr. & Sons

Lititz woman named farm society president

By Sally Bair
Feature Writer

Mrs. Robert Gregory, Lititz R1, is beginning her first year as president of the Society of Farm Women of Lancaster County, following her election to the post at their annual convention on Saturday. As county president, Mrs. Gregory will preside over the 31 societies in Lancaster County.

In an interview prior to her formal election, Mrs. Gregory talked about the role of the farm women societies and the impact they have on members lives. She said, "Basically the women come together for a social and educational time. It offers one opportunity for women to participate in their communities."

Another real opportunity provided by the societies, Mrs. Gregory said, is an "intermixing of people." The women are of different faiths and of different political affiliations." She added, "A good portion of the members live on farms and a lot have husbands who make their living in agri-business. Basically the women share an interest in the home. Farm women may hold as their goal the preservation of family life and the family unit."

The societies contribute to women as individuals, too, Mrs. Gregory said. "Everybody needs a certain amount of companionship and can gain from some group activity." Because of our mobile society in which families are often distant, Mrs. Gregory says, "Women are more keenly aware today of the need to belong to an organization than when the relatives are near. Many times the societies can be like an extended family."

Mrs. Gregory stressed that many members belong to various other organizations, and use the society as "an extra interest group. Educationally and socially it is a relaxed type of friendly group."

She says the local groups serve a very specific purpose in community projects. Societies have individual projects ranging from fulfilling health needs to helping to pattern a handicapped child.

But each year the county board, over which Mrs. Gregory will preside, selects one county project in consulation with the local societies. This year they contributed $2,000 to the Farm and Home Center Foundation, for instance. Mrs. Gregory said, "Each society gives as they see fit. Some have more opportunity than others for raising money."

Mrs. Gregory has no grand plans for the county societies, but she has one hope as she takes over as president, "I would really like to see the farm women do something in relation to the Bicentennial celebration. Many individuals may be involved in their individual communities, but I think perhaps we should plan an observance, perhaps a social event. I feel we should contribute something."

A farm women member for 12 years, Mrs. Gregory is a member of Society 3. She has four daughters and teaches home economics at Linden Hall for Girls in Lititz.

Mrs. Robert Gregory, Lititz R1, was elected as the president of the Lancaster County Farm Women Societies at their Fall meeting held Nov. 1.

Kutztown Grange meets

The Kutztown Grange held a Halloween Party at their recent meeting. Prizes were awarded to the prettiest, funniest and the most original in dress and also the last to be guessed.

Kathryn Rabenold took first prize in the pumpkin pie contest held by the ladies' activites group.

The Kutztown grange met with the Shartelsville Grange on Nov. 4 for a meeting.

Bank reports income

The First National Bank of Strasburg reported a 7.7 percent increase in net income for the first nine months of 1975. Net income was $414,362 or $1.65 per share, up from $384,867 or $1.53 per share during the first nine months of last year.

Donald H. Hoffecker, senior executive vice president stated that the total assets of the Bank are up 8.6 percent over September 30, 1974.

Fulton Grange holds meeting

Fulton Grange 66 will kick off their Bi-Centennial celebration Monday, Nov. 10, at 8 p.m. at the Grange Hall in Oakryn. Miss S. Rebecca Kirk will speak on Early Schools and Churches of Southern Lancaster County while Norman Wood is slated for projections of the same.

Miss Janet Jackson, Fulton Grange's contestant from the Miss Solanco Beauty Contest will render harp selections. Members are asked to bring Bi-Centennial momentoes for display. There will be chorus rehearsal at the meeting.

Plan for Christmas Goodies Now

The Holiday season will soon be with us and now is the time to plan just what goodies will be used for your entertaining and family menues. We've offered a few suggestions this week and hope you'll enjoy trying them. The recipes are the courtsey of the Pork Industry Committee.

xxx

Holiday Banana Tea Bread

1¾ cups sifted enriched flour
2 teaspoons baking podwer
¼ teaspoon baking soda
½ teaspoon salt
one-third cup lard
two-third cup sugar
2 eggs, well beaten
1 cup mashed ripe bananas
½ cup chopped nuts
1 cup mixed candied fruit
¼ cup raisins

Line a 9 x 5 x 3 inch loaf pan with waxed paper. Sift together flour, baking powder, soda and salt. Cream lard and sugar until light and fluffy, add eggs and beat well. Add sifted ingredients alternately with bananas. Add remaining ingredients. Pour into loaf pan and let stand 20 minutes. Bake in a moderate oven 350 degrees for one hour or until done.

xxx

Satin-Smooth Chocolate Pie

1 unbaked 9-inch pie shell
20 marshmallows
½ cup milk
6 almond milk chocolate bars
1 pint whipping cream

Combine marshmallows and milk in a saucepan. Cook over low heat stirring occasionally. Add candy bars and continue cooking until chocolate melts. Cool thoroughly. Beat whipping cream and fold into cooled chocolate mixture. Spoon filling into shell. Chill 3-4 hours. Whip remaining dream and garnish the top. Grate chocolate and sprinkle on top.

xxx

Pumpkin Pecan Pie

Pecan Topping:
2 tablespoons butter
¼ cup brown sugar
1 tablespoon grated orange rind
¾ cup pecan halves

Mix butter with brown sugar, orange rind and pecans.

Pumpkin Filling:
3 tablespoons sugar
½ teaspoon salt
1 teaspoon cinnamon
½ teaspoon ginger
½ teaspoon nutmeg
1 can (16 ounces) pumpkin
two-third cup brown sugar
2 eggs well beaten
1 cup evaporated milk
½ cup water

Mix together sugar, salt and spices. Combine pumpkin, brown sugar, eggs and spice mixture. Mix evaporated milk and water and heat til just below boling. Add hot milk, stirring evenly belended. Pour filling into unbaked pie shell and bake at 425 degrees for 40 minutes. Sprinkle topping on pie and bake for 10 minutes until pie is glazed

xxx

Orange Jewel Cookies

1½ cups jellied orange slices
1½ cups sifted enriched flour
½ teaspoon baking powder
½ teaspoon baking soda
½ teaspoon salt
two-third cup shortening
two-third cup brown sugar
1 egg
1 teaspoon vanilla
1½ cups quick cooking oats
1 cup cocoanut

Cut jellied orange slices into small pieces. Sift together flour and dry ingredients. Cream shortening and sugars. Beat in eggs and vanilla. Stir in sifted ingredients. Add oats, coconut and orange pieces. Shape into balls and place on greased cookie sheets. Bake at 375 degrees for 10-12 minutes. Yield 4 dozen.

xxx

Petit Fruit Cakes

1 cup sifted enriched flour
¼ teaspoon baking soda
½ teaspoon salt
1 teaspoon cinnmon
½ teaspoon ground cloves
⅛ teaspoon nutmeg
⅛ teaspoon allspice
one-third cup lard
1 cup brown sugar
2 eggs
¼ cup sour milk
1 cup seedless raisins
1 cup mixed candied fruit
1 cup candied cherries (halved)
1 cup coarsley chopped nuts

Sift together dry ingredients and spices. Cream lard and sugar. Add eggs and beat well. Add sifted ingredients to creamed mixture. Add sour milk and mix thoroughly. Stir in raisins and fruit with nuts. Fill small paper lined muffin pans ¾ full. Bake in moderate oven 350 degrees for 20 minutes. Allow to cool. Yield 2 dozen (2 inch cakes).

xxx

Mexico City

Mexico City is the oldest city in the Western Hemisphere, and it's been a capital since 1325. It's full of magnificent modern architecture, and surrounded by awe-inspiring ancient mysteries. In 1957, an earth quake caused great damage to the city and since it rests on a lake bed filled with light volcanic ash some of the streets sink 12 to 14 inches a year

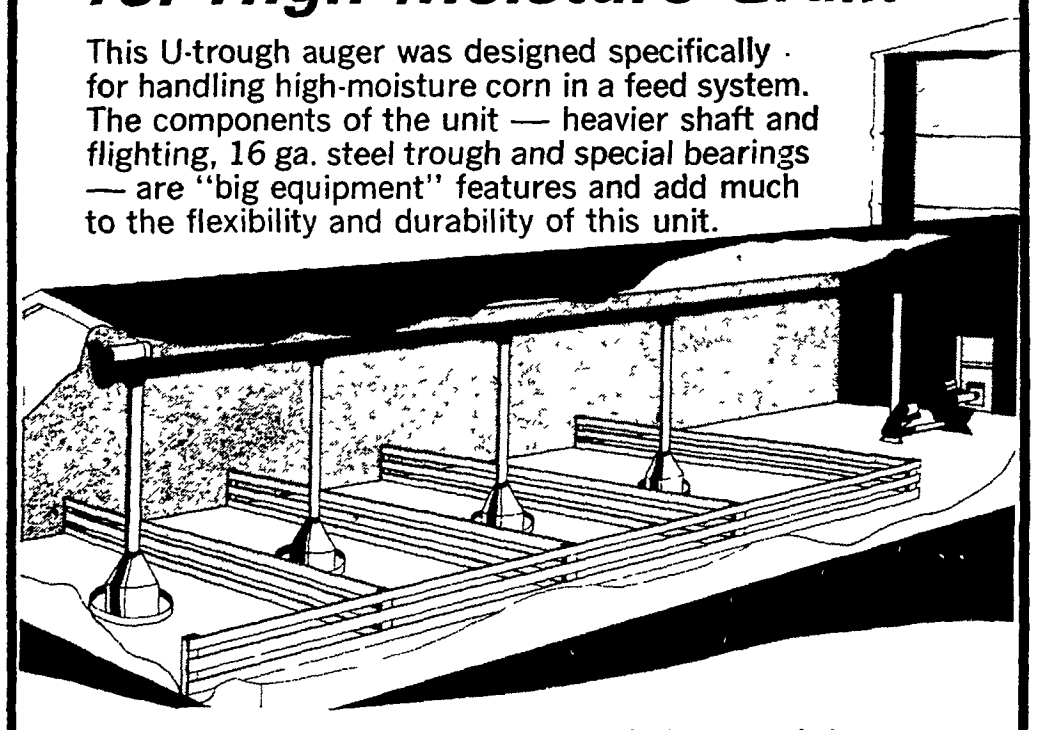
Cardinal 5-Inch U-Trough

AUGERS

for High-Moisture Grain

This U-trough auger was designed specifically for handling high-moisture corn in a feed system. The components of the unit — heavier shaft and flighting, 16 ga. steel trough and special bearings — are "big equipment" features and add much to the flexibility and durability of this unit.



- The compact chain reducer drive is fully guarded and trough covers provide safety as well as weather and dust protection.
- Drive can be mounted on either intake or discharge end, either above or below the trough on intake end. (Above the discharge end is recommended.)
- Hanger bearings are split wooden type, permanently lubricated, low friction, quiet running and easily accessible.

Farm Women attend annual Fall convention

By Melissa Piper

Lancaster County Farm Women met last Saturday afternoon at the Farm and Home Center for their annual Fall convention. Representing the 31 societies in the county, the farm women were present for a business session as well as afternoon entertainment.

Mrs. Carl Johnson, former president of the county officers, was in charge of the morning business session. Reports were given by the county officers as well as by the local groups. The morning devotions were given by Mrs. Henry Reist.

A presentation of funds for the Farm and Home Center highlighted the morning session. Jay Landis, president of the foundation directors, accepted the check in the amount of $2000 from Mrs. Carl Johnson.

The societies had agreed earlier in the year to donate the money to the foundation for toward a piano for the basement meeting rooms.

Following the noon meal, a memorial service was held to honor those members who had died during the year. Mrs. Albert Fry of Society 27 was in charge of the program. Devotions and poems were included in the service.

The Hershey's a family musical group, entertained during the afternoon session and presented a myriad of songs and instrumental numbers.

Mrs. Ruth Hand, home economist for Schuylkill County, was the keynote speaker for the day. Mrs. Hand entitled her talk "Still Holding at 39" and gave insights into staying young both mentally and physically.

The newly elected county officers were then installed by Mrs. S. Lee Richards, state president of the farm women. Mrs. Robert Gregory Lititz R1 was installed as the Lancaster County president.

A special highlight of the program was a fashion show and parade of bicentennial dresses constructed by the farm women. Outfits depicting the colonial days and early settlers were in evidence. Many of the women added a touch of nostalgia to their outfits by carrying baskets and shawls passed down by their families.

Mrs. S. Lee Richards (far left) State president of the Farm Women Societies installed the newly elected Lancaster County officers during their annual Fall convention held Nov. 1. Officers (from left) are Mrs. Robert Gregory - president; Mrs. Carl Diller - 1st vice-president and Mrs. John Ruhl, second vice-president.

Berks Co. Society 2

The Society of Farm Women 2 of Berks Co. met in the home of Dr. and Mrs. Carl Miller, Bethel, R1 for their October meeting with 22 members attending. Most of the ladies came masked with the following receiving these prizes: most hair-stuffing - Mrs. Clayton Schmehl, longest hone - Mrs. Carl Kauffman Jr., saddest face - Mrs. Mildred Emerich, best dressed man - Mrs. Clarence Klahr, and last one guessed Mrs. Mildred Emerich. Mrs. Gregory Goshorn was the judge.

After the judging and unmasking a reading of scripture was given by Mrs. Carl Seiverling, followed by the Lords Prayer and flag salute.

The election of officers was in charge of Mrs. Harvey Zimmerman and Mrs. Eugene Stump with the following new officers for a two year term: President - Mrs. Quentin Gettel, Vice President - Mrs. Daniel Harnish, Recording Secretary, Mrs. Clayton Schmehl, Corresponding Secretary - Mrs. Ada Wolfe, Treasurer - Mrs. Clarence Klahr.

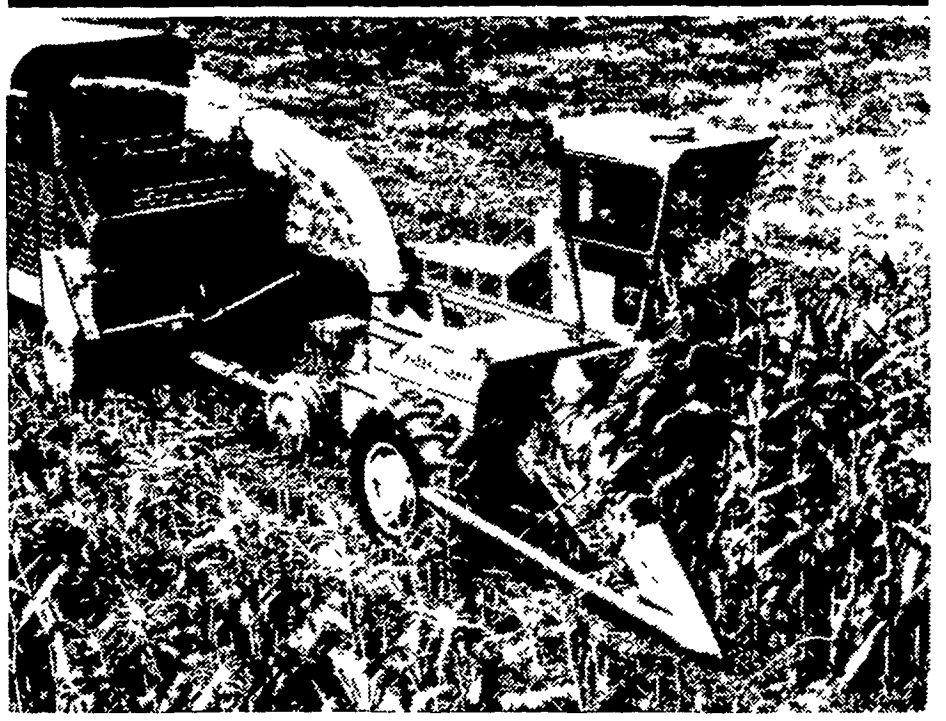
New Idea's Uni-Forage Harvester



Superchopper

Reliable. A real performer.

Today there's a really dependable forage harvester in the field! It's the new generation of choppers from Uni-System, the No. 1 self-propelled forage harvester on the market.

We call it the Superchopper.

If you liked Uni choppers before, wait till you see this one in action. See its reliability its added convenience . . . and yes, its 15% greater capacity.

Bigger, heftier cutterhead. Broader, wider design for even smoother flow of material.

Let us show you this great Superchopper. But before you buy, be sure you've got enough forage boxes to handle the greater volume.

Kutztown student chosen for national FFA band

Kevin Hertzog

Kevin Hertzog, 18, son of Mrs. Jean Hertzog and the late Mr. Ernest Hertzog of Topton is one of 120 FFA members from across the nation selected to participate in the National FFA Band. Kevin was selected from over 500 applicants representing 44 states and will play the snare drum. After two days of intensive practice prior to the convention, the band is to perform during all but one session of the 48th National Convention of the Future Farmers of America, November 11-14, in Kansas City, Missouri. Kevin is a member of the Kutztown FFA Chapter where his advisors are Ben Newcomer and Donald W. Reinert. He is also a member of the Brandywine Heights band under the direction of Philip Forlano.

Often referred to as the "mail order band" because of the method of recruiting members, the National FFA Band was first organized in 1947. Since that time competition for the honor of playing in the band has steadily increased. Under the direction of Roger Heath, director of Virginia Tech Bands, the FFA Band has gained a reputation for its polished performances eventhough bandsmen have only two days of practice together prior to their first performance.

"Bandsmen are selected on the basis of tape recorded auditions or competitive auditions in their State FFA Band with supporting recommendations from their high school band directors," explains Heath who spends many hours during the summer selecting FFA members to fill the 120-piece band. In addition, all applicants are required to list their musical experience and activities such as solo and ensemble performances, special honors and special experience such as drum majoring or baton twirling.

FFA members who play in the band arrive in Kansas City two days before the convention starts so they can begin practicing. "Although we send band members the most difficult music ahead of time, it still takes a lot of practice to get ready for our first perfromance on Wednesday morning," says Heath.

During the convention week the FFA Band will play at seven sessions. "We'll play a wide variety of music," says Heath "including marches, rock tunes, selection from Broadway musicals, serious music, and mood music. We'll also have some of the latest hits," adds Heath, who likes to "think young" when planning music for the youthful convention crowd.

Although the FFA convention officially ends Friday evening the bandsmen will not finish their week's work until noon Saturday at the conclusion of the American Royal Parade. Traditionally the FFA Band has been featured as the leading marching unit in the parade which signals the end of the National FFA Convention and the opening of the American Royal Livestock and Horse Show.

Livestock producers to meet

The annual meeting of the Pennsylvania Livestock Association will be held Tuesday, (Nov. 11) at the Penn Ram Motor Inn, Carlislw Pike, Mechanicsburg. Scheduled to begin at 6:00 p.m., the meeting will be followed by an awards banquet at 6:30. One of the features of this affair will be the selection of the "Livestock Man of the Year."

The Pennsylvania Livestock Association is one of the sponsors for the Keystone International Livestock Exposition which begins in Harrisburg today, (Saturday) and continues through this coming Friday. A list of events at the Keystone Exposition can be found elsewhere in today's issue of Lancaster Farming.

FFA chapter sponsors pumpkin contest

The Lower Dauphin FFA chapter sponsored a pumpkin contest for five elementary schools in the Lower Dauphin School District on Oct. 23.

The classes judged were (1) the largest in circumference (2) heaviest and (3) the most creatively decorated Jack-o-Lantern.

The seeds were distributed by the Lower Dauphin FFA to the elementary students in the spring.

The purpose of the project was to get the children interested in gardening and agriculture.

Hot to Cold

When hot food is ready to be frozen, it must be cooled quickly to stop the cooking, retard the growth of bacteria and to help retain the natural flavor, color, and texture of the food

NEPPCO choses Hershey as 1976 convention site.

Penna. winners named; meeting highlighted

HERSHEY, Pa. - Pennsylvania proved a strong attraction for hundreds of poultry-oriented farmers from more than a dozen surrounding states last month as visitors gathered for the annual 44th annual exposition of the Northeastern Poultry Producers Council (NEPPCO) at the Hershey Convention Center.

The council had decided to stage a return engagement at the center Nov. 9 through 11 in 1976.

Dozens of Keystone Staters were award winners at the 14-state get-together, which combined three days of educational sessions with youth, women's, social and commercial events.

Harry P. Metz, Belleville, became the 12th individual in NEPPCO's 44 years to receive an honorary life membership, the council's highest honor. The former NEPPCO president and 20-year director was cited for his unselfish leadership. He has operated the family poultry farm and hatchery for many years.

Pennsylvania's 4-H Club poultry and egg judging team took second-place honors. The team consisted of Graig Harnish, R6, Lancaster; Tim Grube, Elm, and Jim Sauder and Judy Stoltzfus, both of Mount Joy. Harnish and Sauder took third and fifth place individual honors, respectively.

A dozen large white eggs from Hess Bros. Farm. Inc., Ephrata, bearing the Pathmark label, won second place in the egg quality competitions which drew more than 200 entries. Its 99 85 score was edged by the winner's sizzling 99.90 tally. And the prize-winning carton design was entered by the Don G. Cotner Farm in rural Danville, whose eggs placed high in the quality judging, also.

Two Keystone Staters were re-elected to continue NEPPCO leadership roles. Robert H. Horsburgh, Doylestown, was re-named treasurer of the board, and George W. Robinson, Kreamer, was re-elected a director. New president of the council is Richard Stark, Walpole, NH, who replaces Dr. John W. Dodge, Hampton Falls, NH.

A top State Department agricultural speaker at the convention characterized the hue and cry against "inflationary" sale of grain to Russia as "not valid". If anything, the once-critical press "is now saying that failure to export will in the long run actually contribute to inflation," according to Dr. Robert R. Spitzer, coordinator, Food for Peace program U S Department of State

Past American Farm Bureau Federation President, Charles B Shuman, told his audience that over-regulation by the federal government and union-imposed workrules are strangling a rail network which could function effectively for the nation's farmers and their suppliers

"Conrail is the best of the alternatives available" for both the nation's farmers and its consumers, he said. "If farmers are forced to rely for bulk-shipped supplies and feedstuffs on other modes of transportation, their costs would increase markedly and many might be forced out of business. And consumers would also be confronted with increased food prices in the retail stores."

A poultry industry in which nearness to market will assume more importance than other traditional geographis advantages was pictured by one of themost successful large-scale poultry producers in the nation, Fred Adams, Jr., president of Cal-Maine Foods, Inc., Jackson, Miss.

The lower labor and construction cost advantages of the southeast are disappearing, he noted.

Events other than a dozen educational sessions attracting visitors from throughout the northeast included full scale youth competitions and women's programs, several social events and NEPPCO's annual exhibition of the latest in poultry equipment, products and services

Trap season opens Nov. 9

Pennsylvanians are reminded by the Game Commission that the trapping season for foxes, raccoons, skunks, weasels and opossums will begin on November 9, more than two weeks earlier than had been originally scheduled.

Previously, the season had been slated to open on November 27, and the latter date is listed as being the opener in the Digest of Hunting and Trapping Regulations issued with each hunting license.

There will be no change in the opening date for trapping mink and muskrat, which is November 27. Also unchanged will be the date for closing the trapping season for foxes, raccoons, skunks, weasels and opossums, which is February 28.

Fertilizer situation evaluated

READING - According to officials at the Reading Bone Fertilizer Company, prices of raw fetilizer materials are described as "firm" for the month of November. A company news release states that some prices have increased recently and more increases are expected by December 1.

The company describes fetilizer sales as having been slow in the Northeast, but booming in the Midwest, where harvesting weather has been very favorable and the fertilizer spreaders are moving in right behind the combines.

Inventories at all levels have been reduced sharply. Export demand has also picked up and some sizeable overseas and commitments have been made. Industrial demand for notrogen has also increased and some plants are now running at 105 per cent capacity, according to Reading Bone Fertilizer Co.

WAYNE FEEDS

HORSE FEED

If Horses Could Talk . . . They'd Ask For WAYNE HORSE FEEDS!

FRONT RUNNER HORSE KRUNCH

—a quality feed for use with hay or pasture. It's a real performer with high taste appeal that brings out the best in any regularly ridden animal.

TOP HAND HORSE FEED

Top Hand is an "extra energy" ration for hard-working horses. It's the kind of a feed you turn to when you develop that "gut feeling" that your horse needs something more. Ideal during periods of stress, too.

POWER PACK HORSE KRUNCH

You'll never go wrong with Power Pack. It also provides what hay or pasture alone lacks. The economy is there. The results are there. A great choice for horses saddled up just two or three times a week.

NEW HOPE COMPLETE HORSE FEED

Controlled diet is necessary for horses with, or susceptible to, heaves. Does away with buying numerous ingredients and mixing. No grain, no pasture, no extra roughage needed. Can help skinny horses and poor keepers put it back. We named this feed right.

RUFF'N REDI COMPLETE HORSE FEED

Contains everything your horse needs except care and love. It's an all-in-one balanced ration. Includes a variety of grains and roughages — other high protein ingredients, vitamins, minerals and plenty of appealing cane molasses. Ruff'N Redi keeps 'em ready for whenever you are.

COLT 16 FEED

Talk about grow and go power — Colt 16 provides foals with all they can handle. Contains grain, roughage and protein products along with vitamins and minerals — blended in a small pellet. Colt 16 contains all the growth-stimulating, muscle-building ingredients those little rascals need and it's extremely palatable.

PRO-PEL HORSE FEED

Grind and mix with local grain and roughage or mix by hand. Pro-Pel is a high protein, fortified pellet that many users claim "propel" their mounts like never before.

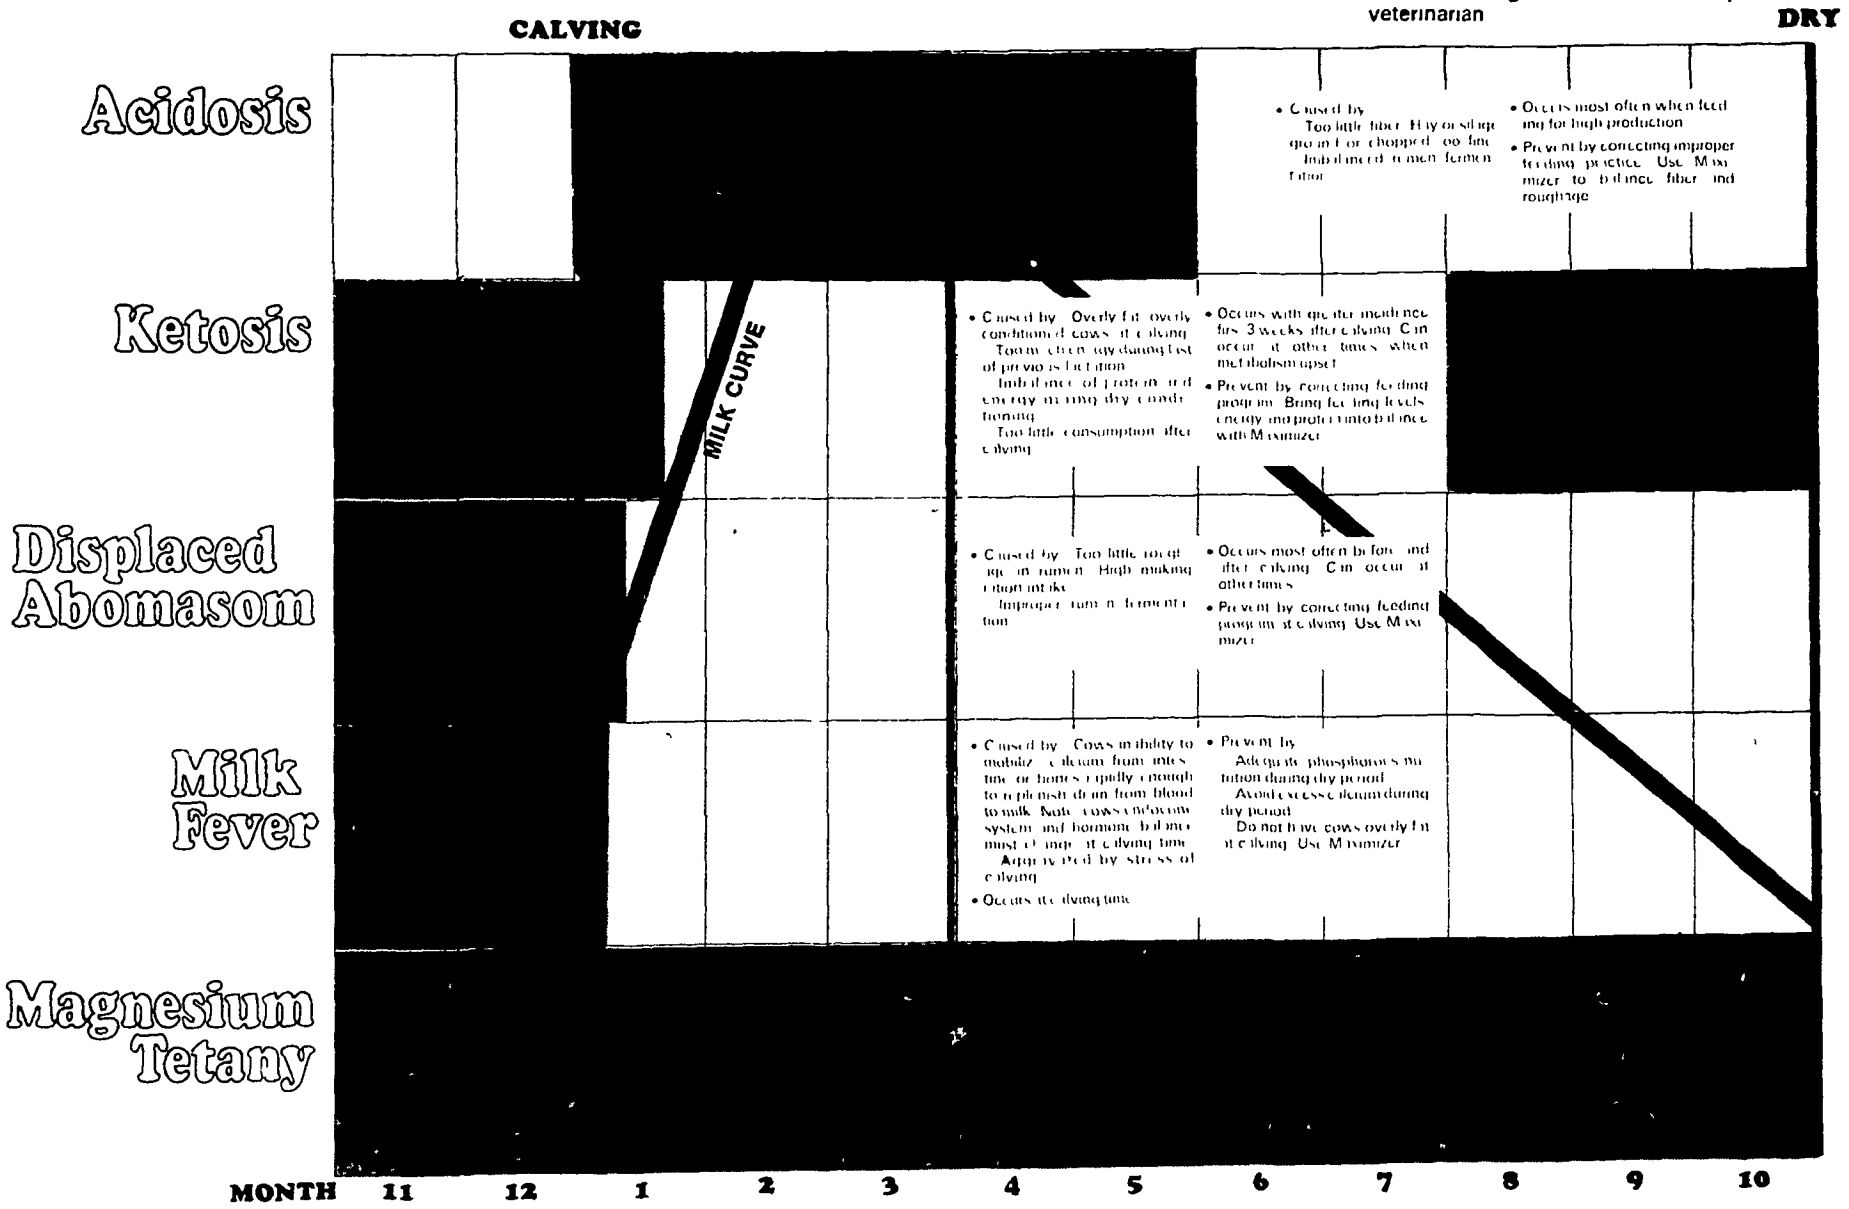
Help prevent metabolic diseases in your dairy herd with a preventive program of feeding with Wayne

The Wayne Maximizer Shows How

With today's high producing herds, there are several metabolic diseases that can chip away at profits even before their symptoms become obvious Some of them may be interrelated into a complex that sometimes makes them indistinguishable

This diagram shows the importance of a total preventive feeding program and constant vigilance against potential problems The shaded areas are the target areas for applying a Maximizer Preventive Program Note that there is no attempt to describe diagnostic symptoms Acute metabolic disorders should be diagnosed and treated by a veterinarian



CALVING
DRY
Acidosis
Ketosis
Displaced Abomasom
Milk Fever
Magnesium Tetany
MILK CURVE
• Caused by Too little fiber Hay or silage ground or chopped too fine Inbalanced rumen fermentation
• Occurs most often when feeding for high production
• Prevent by correcting improper feeding practice Use Maximizer to balance fiber and roughage
• Caused by Overly fat overly conditioned cows at calving Too much weight gain during last of previous lactation Inbalance of protein and energy in ration dry conditioning Too little consumption after calving
• Occurs with greater incidence first 3 weeks after calving Can occur at other times when metabolism upset
• Prevent by correcting feeding program Bring feeding levels energy and protein into balance with Maximizer
• Caused by Too little roughage in ration High making ration intake Improper rumen fermentation
• Occurs most often before and after calving Can occur at other times
• Prevent by correcting feeding program at calving Use Maximizer
• Caused by Cows inability to mobilize calcium from intestine or bones rapidly enough to replenish drain from blood to milk Note cows endocrine system and hormone balance must change at calving time Aggravated by stress of calving
• Occurs at calving time
• Prevent by Adequate phosphorous nutrition during dry period Avoid excess calcium during dry period Do not have cows overly fat at calving Use Maximizer

Dairy Feeding Management

WAYNE F

Wayne Animal Health Aids For Dairy

Wayne Tamed Iodine Spray	Spray the navel cord of newborn calves. Spray on cuts or wounds to help prevent infections.
Wayne ADE Injectable	A readily available source of extra vitamins. Inject ¼ to 1 cc at birth. Inject cows with 1 to 2 cc per head 2 weeks before and 2 weeks after calving.
Wayne-A-Mycin Powder	Contains the antibiotics Neomycin and Oxytetracycline plus vitamins and electrolytes. Give 1½ tablespoons per 100 pounds body weight daily for 3 to 5 days for prevention of bacterial enteritis.
Wayne Mast-Aid	Contains antibiotics and cortisone for the treatment of mastitis. Infuse into mammary glands after their last milking of the season as a prevention or treat milking cows as needed.
Wayne Teat Dip	An iodine disinfectant for use to dip the teats of all milking cows after each milking.
Wayne Cattle Wormer	Contains Thiabendozole. Feed 0.4 lb. or 0.2 kg. Wormer per 100 pounds or 45 kg. body weight.
Waynextra ADEK	Multiple vitamins in the Waynextra carrier provides readily available levels of vitamins which aid in reducing the recovery time from stress and periods of convalescence. Also, aids in the prevention of foot rot and lumpy jaw.
Wayne Min-A-Lyte	Contains potassium and magnesium in sufficient levels to aid in the prevention of grass tetany. The EDDI aids in prevention of foot rot. Electrolytes are added to maintain fluid balance in the cell and aid in the reducing shrink after stress.
Wayne P-12 Mineral	Designed for use when the majority of the roughages fed are medium to low in calcium such as corn silage, grass hay, sudan grass or sorghum.
Wayne P-18 Mineral	Designed for use when the majority of the roughages fed are high in calcium such as legume hay.

Other Wayne Health and Sanitation Products:
Wayne Super Cleaner — Wayne-Odine (disinfectant)
Wayne Dairy & Livestock Spray Concentrate (for insect control)
Wayne Pinkeye Spray

The modern Wayne dairy feeding program meets the needs of today's expert dairymen best in every important way.

It recognizes the value of home-grown dairy feed — grains and roughages, and uses these crops as a basis for most economically formulating the total program.

2nd **It recognizes that each different phase of a cow's milking and dry period calls for a carefully balanced program of its own.**

3rd **It considers proper feed balance for maximum milk production keeping total feed costs as low as possible in the process.**

4th **Dairy research at the Wayne Research Farm is planned and carried out by several of the top men in the field — working with a herd of high quality animals. They do far more than formulate feeding programs. They also deal in herd health and management matters. They are the key men behind the total programs carried out in hundreds of Wayne-fed operations from the Eastern slopes of the Rockies to the East Coast.**

5th **Modern mass-purchasing methods and computerized feed formulation to determine least-cost combinations, assure Wayne customers of the most for their feed dollars. About half the cost of producing milk is feed cost. Wayne pledges to every customer an all out effort to keep feed costs as low as possible without sacrificing quality, which would cost you income from milk.**

6th **These are all good reasons for you to call in the Wayne Team, your local Wayne Dealer and District Salesman. They'll bring along their MAXIMIZER TM BOOK and work your feeding program out exactly — based on what you have on the farm, and what Wayne should provide to develop the program your herd needs.**

Mastitis Prevention By Milking Procedure

An ounce of prevention is worth more than a pound of cure in the case of mastitis. Management to prevent infection costs less than depending on treatment. The following is a recommended milk procedure.

1. **Wash teats and udder with warm (90 degrees F) water containing Wayne Iosan (½ ounce to 10 quarts of water).**
2. **Use an individual disposable towel to wash and dry udders. Do not use the same towel for more than one cow.**
3. **Wash not less than one minute nor more than three minutes before attaching teat cups.**
4. **Use strip cup regularly on each quarter before attaching teat cups.**
5. **Machine strip each quarter and remove the machine as soon as milk flow stops.**
6. **Dip each teat in Wayne Teat Dip after removing teat cups.**

Calf Care

NOW YOU HAVE A REAL CHOICE!

ALL MILK PRODUCTS

Many millions of calves have been raised successfully and economically on Wayne Calfnip. Today's Calfnip is better than ever before as the result of continuing Research developments. Calfnip is **high in milk products with all milk protein.** Antibiotic fortification as well as high vitamin levels give optimum growth and performance under stress conditions. High energy comes from 10 percent quality animal fat in dispersible form. Smooth, glossy hair coats, growthy calves, less digestive upset, and ease of feeding are a few more reasons for the wide acceptance and popularity of this outstanding milk replacer. Calfnip saves two ways. It costs less and produces a good calf with substantial savings over whole milk feeding.

Wayne Calfnip is an excellent food for other baby animals. It can be mixed with water, as for calves, and fed to orphans or fed. dry to supplement other food. Orphaned calves and baby pigs really go for Calfnip. It gives them better condition and appearance.

MILK PRODUCTS PLUS SOY PROTEIN

Milk protein is of excellent quality. Human consumption of milk protein is forcing a change to other than milk protein for milk replacers. Treated soy protein can be used as a **part** of the protein in milk replacers.

Wayne Calf-Mate costs less than the all milk replacer Calfnip because of the use of a **limited** amount of soy protein.

Calf-Mate is completely fortified with vitamins, antibiotics and minerals. Calf-Mate and Calfnip both look like milk when mixed with water and are eaten readily.

Looks Like Milk

Looks like milk when mixed with water for feeding. Calfnip and Calf-Mate are formulated to **replace** cow's milk, not merely as a substitute for milk. Because of careful formulation and high milk products content, Calfnip and Calf-Mate are highly digestible and palatable.

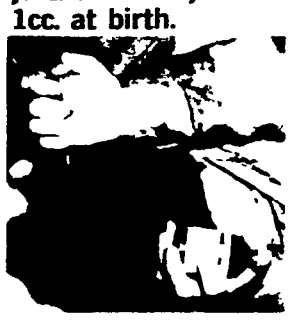
Only the highest quality ingredients are used in Wayne Milk Replacers. They contain nutrients that may not be adequately furnished by cow's milk yet are needed by calves. Vitamins A, D, E, K, and C as well as the "B" group are added.

Amino acids, vital building blocks of protein, antibiotics for growth promotion and better feed efficiency with a blend of essential minerals give a good balance.

WAHA for the Calf

1. Wayne Teat Dip ... drench navel at birth.

2. Wayne A, D Injectable ... inject ¼-1cc. at birth.



3. Wayne-A-Mycin Bolus ... one per 50 lbs. body weight daily for 3-5 days.

(OR) Wayne -A - Mycin Powder ... administer 1½ tablespoons per 100 lbs. body weight daily for 3-5 days.

GROWING AND FINISHING PROGRAMS

Converting feed to pork efficiently is the objective of the growing and finishing phase of swine production, making sure the hogs have the right balance of proteins (amino acids) energy, vitamins and minerals. Wayne balancers and complete feeds are formulated to provide the proper nutritional level that will produce fast economical gains when fed as recommended.

WAYNE PIG BALANCER

A top quality 40 percent protein concentrate designed to balance the amino acid deficiency of grain plus vitamin and mineral fortification needed to produce pork profitability.

WAYNE GRO-PORK 280
Newly weaned pigs accept this 16 percent complete feed readily. There's never a lag as a result of pigs trying to make up their minds about the change. Gro-Pork contains the total nutritional balance needed to get 50 pounders up to 125 pounds in a hurry. A complete feed, protein, energy, vitamins, minerals, in a combination that delivers solid pork fast.

WAYNE GRO-PORK FINISHER
At 125 pounds, pigs are ready for the 13 percent efficient economy of Gro-Pork Finisher. There's no reason for feeding anything else. This feed is the ultimate in a complete pelleted finishing ration. Keep hogs on it until they are ready for market.

You can't raise hogs germ-free, so give them special protection

Give them Waynextra with their feed.
Not just one single antibiotic or another Waynextras put health-saving for your hogs altogether into a single potent package You just mix the needed Waynextra into your regular feed

We'll help you pick from six different formulations depending on the kind of stress or chronic infections you're fighting And on the age of your hogs Let Waynextra help your profit
See us now

PIG STARTING PROGRAM

Wayne recognized many years ago that each pig of every litter you raise is important.

That's why we first introduced Wayne Tail Curler.

Over the years, the purpose of Tail Curler feeds has remained the same — to get pigs eating solid foods as quickly as possible — to take advantage of that certain period in the pig's life during which they make their most efficient gains. Hog producers know the importance of getting baby pigs started right. That's why so many of them have come to depend and rely upon Wayne Tail Curlers. They do the job.

TAIL CURLER ROCKETS

A specially formulated prestarter designed to provide the critical nutrients needed by early weaned pigs. The foundation of this 20 percent protein feed is its superior amino acid balance which closely resembles that found in sows milk. Rich in milk sugar energy — the ultimate in taste appeal that encourages early eating.

TAIL CURLER SENIOR

A 16 percent protein starter with added lysine and methionine for a new amino acid balance giving the performance of an 18 percent. Contains a combination of ingredients that results in higher digestability, less tendency for looseness in pigs under stress and fast low cost gains. A feed for pigs 6-9 weeks old after they have been prestarted on Wayne Tail Curler Rockets or Tail Curler Junior. Medicated with scour fighting Carbodox (Mecadox®).

WAYNE FEEDS

Poultry Feeding

Feed consumption is the guide for choosing the correct Wayne Pro-Grammed Layer.

The recommended program will furnish 15 to 17 grams of protein per hen per day. Wayne Research has demonstrated this level of daily protein intake will permit maximum egg production at lowest cost.

When only one Wayne Pro-Grammed Layer can be used for several flocks, choose the one matching the average feed intake. This will largely be determined by temperature and age of hen.

When daily feed consumption is (not known or unknown) use the 16.5 percent Pro-Grammed Layer 21-23 for most conditions. During hot weather, 18 percent will often increase production. During cold weather, 15 percent will lower costs.

WAYNE ANIMAL HEALTH AIDS FOR POULTRY

WAYNE B-COM EXTRA
A water soluble vitamin mix for use in drinking water. Mix one package (4 oz.) per 50 gallons or 190 liters of water when birds are sick or do not eat readily.

WAYNE-A-SUL
An additive for the drinking water containing three sulfa drugs for treatment of coccidiosis, coryza and acute fowl cholera.

WAYNE-ODINE —
a great disinfectant for cleaning and sanitizing equipment, shoes and housing.

WAYNEXTRA POULT & CHICK SAVER —
used as directed, this very complex chelated buffered nutritional aid keeps chicks and poults alive — reduces mortality from starve out. Also a great help to older birds in time of stress.

WAYNE PIP-Z WORMERS
Piperazine swine and poultry wormers available dry or in liquid form.

DBP-20
Increases egg production and improves feed efficiency.

WAYNE D-ODOR NO. 1
To speed drying and composting of manure solids in hog houses, feed lots, barns, kennels, and poultry houses.

WAYNE D-ODOR NO. 2
Spray into manure pits, ponds and lagoons to remove odors, digest and liquefy solids. D-ODOR has been thoroughly tested and proven effective at Allied Mills Research Center.

Egg producers scramble 'Egg Beaters'

ATLANTA, Ga. - United Egg Producers, and J. B. Gay and Son, Inc., a Georgia egg producer, filed a $50 million law suit here last Tuesday against Standard Brands Incorporated, one of the nation's largest companies, in Federal District Court in Atlanta, Georgia. The suit charges Standard Brands with engaging in a massive campaign of false and deceptive advertising, and unfair competitive practices designed to decrease the consumption of fresh eggs and to boost the sale of Egg Beaters, an egg substitute product manufactured and sold by Standard Brands.

The cooperative was joined by the Gay company, an indenpendent egg producer in Georgia who sued on behlaf of itself and other producers who are members of the five regional agricultural cooperatives which make up United Egg Producers. These cooperatives are: Northeast Egg Marketing Association, National Egg Company, Western Egg Company, Midwest Egg Producers Cooperative Association, and Northwest Egg Producers Cooperative Association. J. B. Gay and Son, Inc. is a member of the National Egg Company.

The lawsuit claims that the underlying theme of Standard Brands' ads on radio, TV, and in the newspapers, boosting "Cholesterol free" Egg Beaters, is that there is an established connection between eating eggs and heart disease. These ads are false and misleading, the Cooperative charges, since Standard Brands is "fully aware of the fact that the connection between the ingestion of dietary cholesterol and heart disease has not been scientifically established.

"Nevertheless," the complaint adds, "the Defendants have engaged in a massive advertising campaign, the theme and implication of which is that cholesterol in the diet is an important factor in the development of heart diesase, and have attempted to propagate the belief in the public that heart disease can be mitigated or avoided by eating Egg Beaters, and, conversely, that eating eggs will cause 'heart disease'."

Standard Brands is further charged with having waged a massive anti-cholesterol campaign - boosting Egg Beaters and disparaging eggs - by deceptive and improper methods in violation of Federal and State law. These included improper activities and practices designed to influence the medical and scientific communities to recommend limitations on the consumption of eggs, misrepresenting the position of the American Heart Association with respect to the ingestion of dietary cholesterol, and attempting to influence the medical profession, nutritionists and the scientific community on the cholesterol issue by false and misleading advertising campaigns.

Contrary to Standard Brands' advertising claims, United Egg Producers asserts that Egg Beaters does not have the taste and nutrition of farm-fresh eggs, that Egg Beaters is not a "fresh-frozen" product, but on the contrary is an imitation of eggs and that Egg Beaters does not look, cook, or taste like farm'fresh eggs.

In addition to damages, the suit asks the Court to enjoy Standard Brands from further violations of Federal and State law and from using the name "Egg Beaters."

Standard Brands is the manufacturer of many food products including Gleischmann's margarine, Fleischmann's liquor, Planters peanuts, Baby Ruth candy bars, Chase & Sanborn coffee and Tender Leaf Tea.

Market meeting set

HARRISBURG - Central Pennsylvania farmers will meet at the state Agriculture Building at 10 a.m., November 12, to discuss plans for continuing the open air farmer's market on the Farm Show grounds in Harrisburg in 1976.

John Musser, Carlisle, a member of the Open Air Farm Market Association which operated a farmers market on the Farm Show parking lot this past summer, urged interested farmers to attend the meeting.

He said association members will elect officers approve new by-lays anc decide dates for the opening and closing of the market There is a possibility the market will open in June next year since some association members want to sell the strawberries they raise, he added.

At the 1975 market, the first held at the Farm Show parking lot, farmers from 11 counties sold fruit and vegetables from truck tailgates from July through October.

Keystone Expo begins today

HARRISBURG - The 1975 Keystone International Livestock Exposition to be held at the Farm Show complex Nov. 8-14 will include a new horse event and reminders of the nation's impending 200th birthday.

During this 19th annual exposition of the best livestock from 23 states and Canada, more judging contests and events will be held on Saturday and Sunday than in previous years to encourage a larger attendance, according to exposition officials.

On the opening day, Saturday, a new Paint Horse Show will be held in the large arena beginning at 1:00 p.m. In all, 73 entries are expected to appear in this show.

Visitors to the exposition will be able to take a wagon ride each day from 9:00 a.m. to 5:30 p.m. The driver, Edgar Messerschmidt of Myerstown, will have his wagon and horse team hitched and waiting in the parking lot.

This year the livestock exposition, featuring nearly 4,000 head of beef cattle, swine, sheep and horses, will have exhibitors competing for more tha $80,000 in premiums. For the first time premiums are being offered in the halter classes of the four horse shows.

Numerous breeds of sheep, swine, horses, and beef cattle will be judged beginning on Saturday and continuing throughout the week. Several exotic cattle breeds will be judged again this year including the Limousin, Chianina and Simmental beef cattle.

Other special events scheduled include theNortheast Regional 4-H and Intercollegiate Horse Judging Contest on Nov. 8; Regional 4-H Horse Bowl at the Penn Ram Motor Inn, Nov. 8 and the Pa. Lamb and Wool Queen Contest to be staged in the Sheep Arena on Nov. 8.

During most of the week, visitors to the Farm Show complex will be able to view four separate rings of animal activity. The beef cattle will be in the poultry room, horses in the large arena, sheep in a corral in the main

LOOK! What only a few of the thousands of satisfied users say about —

VX-6 BATTERY ADDITIVE:

Says Lee Petty, one of America's greatest racing champions: "I'm constantly being called on to test new automotive products. So far I've yet to come across any product that can be more important to every battery owner in terms of money-savings, performance, safety and convenience. Because, what could be a better feeling than to know that your battery can never again fail you for the life of your car."

"I am convinced that your VX-6 is as good as you claim it to be." D. L. Boatright, Sandridge, W. Va.

"Six years ago I purchased a new car. When it was 2 years old, I put VX-6 in the battery. 102,100 miles later, my car still starts up like new. It has the original battery in it." R.V.K. White Cloud, Mich.

"I saw VX-6 advertised for a long time, but was always afraid to try it. I finally bought some and put it in a 12-volt battery that was dead. I recharged it, and it is amazing what VX-6 has done. I was going to throw that battery away, so you see why I highly recommend your product." R. J. Behrend, Melbourne, Florida

"We have never had tc go out and tow in one single cart since we went to VX-6, as this product dissolves all sulphation in old batteries."

•••••VX-6 BATTERY ADDITIVE GETS RID OF •••••
EXCESSIVE SULPHATION —
THE NO. 1 CAUSE OF BATTERY FAILURE!

BRED • TESTED • GROWN FOR THE EAST

If you are interested in seed corn bred for your area, tested in your area, and grown by people who have been growing seed corn in Penna. for 40 years, Doebler's Penna. Hybrids should be your choice. Last year alone sales increased 50 percent overall. Test results are great and Doeblers are one of the last to still pack 56 lb. bushels at prices that Pennsylvania farmers can afford ($5 to $15 less than many competitors). Sound interesting??

FULL SEASON HYBRIDS FOR PENNSYLVANIA'S SOUTHEAST

89X SINGLE CROSS — 125 DAYS

Has highest potential yield of any full season hybrid we have tested. 200 bu. yields are not unusual. Ideal ear type on a good stalk. Excellent blight resistance. Fits Southeast Pennsylvania, Maryland and Delaware for maturity as 89X is a full season hybrid. Very upright leaves

A MOST POPULAR HYBRID, GAINING MANY FRIENDS EACH YEAR!!

85X SINGLE CROSS — 120 DAYS

A popular full season Single Cross. Excellent standup and top-notch appearance Ears are low and girthy Ideal for Southeastern Pennsylvania and Maryland grain production Official yields have reached 221.8 bu. dry shelled corn per acre A very consistent performer

83X SINGLE CROSS — 118 DAYS

New in '72, this Single Cross Hybrid has gained a large following. Look for a good sized plant, a vigorous grower and yields that compare with the very best. 83X is a fine stander and shows resistance to eastern blights. A good picker-sheller corn.

8703 3 WAY — 118 DAYS

A Penn State released 3-Way Cross with exceptional yield and standup. Averaged 184.3 bu. dry shelled corn per acre in the 1970 Agronomy Tests in five Southeastern Pa. locations. Percent erect plants — 94.6 percent!! An excellent choice for grain or silage. Very blight resistant.

SOLD BY 250 DEALERS IN PENNA.
NEW YORK, MARYLAND & DELAWARE.

800 - 3 WAY - 115 DAYS

New in '73, 800 3-way is outstanding in yield, standup and tolerance to thick planting and drought. Yields of 200 bu. dry shelled corn have been reached in test plots. Look for a close attached ear of substantial length and girth. Excellent for silage.
800-3 was No. 1 of 84 hybrids tested — 14 bu. better in yield than any other hybrid brand in the 1973 Maryland Extension test in Carroll County!! Has the highest 3 year average in Dorchester Co. with 159.1 bu. dry shelled corn per acre.

80X SINGLE CROSS — 115 DAYS

A super hybrid, 80X is the straight single of the modified 800-3 way. It is very uniform, has an ideal ear type and is protected with multi-gene blight resistance. An excellent stander. This is a difficult hybrid for us to produce, but is something very special when farm-planted. Latest strip test yield on 80X is 226 bu. dry shelled corn per acre!! Supply limited.

Hog system unveiled

Farmers from throughout Pennsylvania are expected to gather at the Harvey Veldhuizen Farm near Greencastle from 10 a.m. to 4 p.m. on Friday, November 14 to view one of the most modern hog finishing systems in the state.

The Veldhuizen Farm is located northwest of Greencastle. Open house signs will be posted along the route. The attraction is a total confinement hog finishing system. The 86 foot long by 38 foot wide building will finish approximately 1,500 hogs yearly.

Everything in the system is designed to reduce labor and increase the efficiency of hog production. Automatic feeding and a work saving manure handling system will cut the workload of Veldhuizen and leave more thme for the important task of management. Specially designed pen partitions, a floor feeding system and a high capacity ventilation system will give hogs the proper environment for top production.

Keystone Expo

(Continued from Page 70)

exhibition hall, and swine in the small arena. There will be 679 beef cattle entries, 1105 horse entries, 1417 sheep entries and 724 swine entries.

The exposition is sponsored by the Pennsylvania Livestock Association in coopwration with the Pennsylvania Farm Show Commission and the Pennsylvania Department of Agriculture.

The live hog evaluation contest will be held on Sunday, Nov. 9 with the Eastern Seaboard Sheep Council to be meeting at the Penn Ram Motor Inn on the same day.

The Pa. Livestock Association Annual Meeting and Banquet will be held at the Penn Ram on Tuesday, Nov, 11 at 7:00 p.m.

For additional information on the show and the complete schedule please see Page 58

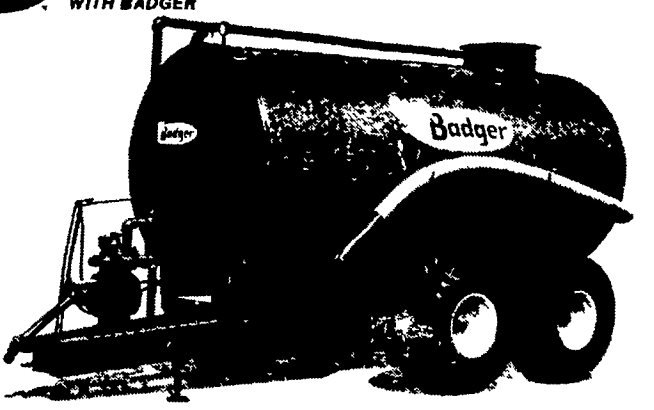
Badger FARMING IS BETTER WITH BADGER



One Tank Does It All

Pumps, Spreads, Injects

The Badger Vacuum Spreader Tank is both pump and spreader in one convenient, low cost unit. Designed for slurry manure, Badger tanks come in 1,000, 1,500 and 2,300 gallon models. Rugged PTO driven pump forms a vacuum for filling or pressure for spreading. Tanks fill in 3 to 5 minutes—empty in 5 to 6 minutes in the field. Choose from adjustable spreader plate or manure injector. Heavy duty construction including full length tank support skids makes Badger the most dependable vacuum spreader you can buy. HIGH OCTANE HOG CHOW 2827 M

OFTEN IMITATED . . . HASN'T BEEN EQUALLED YET!

Let your hogs show you the difference

when you feed

Purina® High Octane

Just about anybody can mix up a batch of ingredients of one kind or another and end up with the same guaranteed analysis you see on a feed tag for Purina High Octane. That's easy.

But the formulation for High Octane, is based on hog nutritional information representing thousands of hours of research. You won't see this difference listed on a feed tag, but you will see it in the ways hogs look and perform.

The superiority of High Octane begins with the way energy is supplied. Purina has now completed over 6 years of research into energy requirements of hogs.

Purina High Octane is also formulated to provide an exact balance of amino acids. The crude protein guarantee for High Octane might look exactly like that found on a competitor's feed tag, but hidden within that Purina protein claim is a highly specific balance of amino acids. Trace mineral, vitamins, and other nutrients are also correlated and balanced to the specific needs of hogs.

Wouldn't you rather plan a feeding program based on Purina's best research information — rather than somebody's guess? A feed tag is only a listing of ingredients. It is performance that really counts. When hogs are fed a ration of Purina High Octane, there is a "good-doing" difference you can see.
